[Quiver's Premium Account Shop](#)

Hey everyone! I'm back in the account business again! Right now I only have a few different types of accounts for sale but as the next month goes on you can expect me to be adding quite a few more. If you have any requests, feel free to let me know and I'll see what I can do.

Accounts:

Netflix - 1 Month Warranty

Netflix - Lifetime Warranty

Uplay

HBO Now

DIRECTV

Minecraft

Origin

All of these accounts are private accounts. Meaning they are not shared with anyone else besides the original owner so they will stay working for much longer!

I'll start by saying, every account works that I've generated; some users have changed their passwords since - But I've never received a dead account.

The main point for writing this is for the owner; The generator stopped working earlier today due to me being at a University and my IP changing quite frequently I received an auto-disable of my license to prevent account sharing.

Quiver was not only friendly about my PM regarding the issue, he raised the threshold so that issue wouldn't occur again.

Good product, good owner - Worth the buy.

Once some netflix accounts are generated, are they deleted from being generated again?

(Sep 4, 2014 07:49 PM)-Chronik Wrote: [\[CITE\]](#) Once some netflix accounts are generated, are they deleted from being generated again?

No they are not automatically deleted, they are shared by anyone that uses the generator. However, I run a check on all of the accounts in the database 1+ times a day and delete any that are no longer working. So you are guaranteed to have working accounts. Not to mention, I update the database at least once a day.

I'm online and ready to answer questions! Also just updated the database today with all new WORKING accounts!

It is only developed for Windows, however, it would of course be possible to run on Linux with the use of a third party application. But no, it will not natively work on other operating systems.

It's currently an .exe file.

So I've had this Netflix generator over a week now, and decided to come back and post a note about the program and the owner of it.

I'll start by saying, every account works that I've generated; some users have changed their passwords since - But I've never received a dead account.

The main point for writing this is for the owner; The generator stopped working earlier today due to me being at a University and my IP changing quite frequently I received an auto-disable of my license to prevent account sharing.

Quiver was not only friendly about my PM regarding the issue, he raised the threshold so that issue wouldn't occur again.

Still selling this awesome generator! Buy a lifetime license today!

Sucrose - September 26, 2014, 11:19 am

Hi, i bought the license but i do not have a computer,. Only Samsung tab, please generate some acc and email me them (ba*****@gmail)..

Quiver - September 26, 2014, 4:29 pm

Over 200 accounts added today! I will be out of town for the weekend and will not be able to check or update the database for 2 days. With over 200 accounts added though, there shouldn't be much of an issue of generating dead accounts.

I'll still be able to provide support but only through PM. So if you have a question or need help, please PM me here on HF. And be patient, it may take me a couple hours to respond since I won't be on HF 24/7 like usual.

I would have to get an exact number at home. But at any given time there are no more than 3-4 people using it at the same time. The Netflix/Spotify generator has about 20 active users per day but that can be lower and higher on certain days.

However, with other 8,500 accounts in the database...the amount of users atm doesn't really matter or affect how many accounts work.

Let me know if you have any other questions. ?

arent LoL accounts free? thanks anyways for the generator :)

King?????? - November 4, 2014, 10:56 am

The LoL Accounts are cracked or stealed, which means that these accounts can have skins or high lvl etc.

Just like SuperRetards said. The accounts are cracked so they are random levels and have different skins and what not.

It's just a false positive. Gets detected as a virus because it constantly makes a request to my website to get the accounts while it's running. Other than that, it's perfectly harmless.

I'm a customer and I think adding stuff that aren't in other account generators will increase your sales. Accounts that can be added:

Porn accounts

[disallowed]
Sport watching sites
Origin accounts

It's a mixture of both servers. In the future I may organize it between which server but for now it's just random.

UPDATE: Minecraft update for generator WILL be out by tomorrow night. Ran into a few issues tonight but have it all working now and will push the update tomorrow. ?

Yes I do. I've been gone all weekend though so I'm just now catching up with it. And that's a feature I may be able to incorporate...but it's not something on my list as of now. That could be a easier said than done. I'll take a look into it though.

EDIT: Just checked and updated the LoL database. Only 7 accounts went dead over the past 3-4 days...that's actually pretty surprising haha.

I'll see if I can remember to run a checker tonight when I get back from work to remove duplicates. I try and add new LoL accounts at least once a week. They last a lot longer than other accounts so I don't usually have to add a ton every day like I do with Netflix.

The email will have been sent automatically to your PayPal email that you paid with.

UPDATE: Added Spotify accounts back into the database!!

Reminder: Please remember to not change the passwords on the accounts you generate and also inform your customers to do the same. The accounts die a lot quicker when everyone gets greedy and starts changing the passwords for themselves, this makes it harder for me to keep a good amount of alive accounts in the database at any given time.

The best thing to do for that is make the music or playlists offline. That way if someone else logs into the account, you can continue listening.

UPDATE: I am removing LoL from the generator. At this point in time it is too hard to keep updated with all of the school work I am doing right now. I am sorry for any inconvenience this might cause. Hey, Just posting a vouch, Since I've been using this for a few months and I LOVE IT! This generator is amazing, I would recommend you buying the full package, with spotify+LoL+MC. Even if you don't use any of those I would recommend it, as my friends always need a spotify, or MC account. Also I love how this generator has the "Check account" option, as this comes in handy so I don't have to manually check. This would be amazing if you added that to spotify, and MC! The netflix accounts work 99% of the time! rarely will I get a duplicate. It would also be great if you added Hulu+ as that would REALLY come in handy.

DINEROMASTER - December 4, 2014, 2:20 am

Somebody is going through and changing all of the passwords to the Spotify accounts. I am going to start investigating and find out who is doing this. You will be banned when caught as it is against the TOS that you agreed to when purchasing the generator. Don't ruin it for everyone else.

Quiver - December 4, 2014, 7:01 pm

The generator is experiencing some downtime at the moment. I will have it back up and running asap!

Alright guys, I have just released version 3.0 of the All-In-One Generator. I have made a few necessary changes to how it works. The most noticeable will be a tracking feature. What this will do is limit how many times each account can be generated to once.

This means that if I, for example, generate a Netflix account, that Netflix account will be removed from the list of accounts available to generate and will be assigned to me only. This shouldn't have much of an affect on how many accounts you can generate for Netflix and Minecraft but it will on Spotify atm since there are not many accounts in the database.

This is going to allow me to see who is generating which accounts. Hopefully I will be able to see who has been changing all of the passwords on the Spotify accounts too...you know who you are. For the next few days I will be monitoring the Spotify very closely and will be resetting the tracking when all accounts have been generated so that others can still generate them too. Please be patient with me as I try to make your experience with my generator as fair and pleasant as possible.

If you have any questions, comments, concerns, problems, etc., please PM me here on HF or on Skype.

Thanks guys.

I am aware that some are having the odd issue of "Sorry cannot authenticate Netseal user!". I am not sure why this is only happening to some and not others but I am going to work hard tomorrow to try and figure out the issue. I am sorry for any inconvenience that this might cause!

UPDATE:

I have just pushed out version 3.1.1.1 of my All-In-One Generator. I am very excited to say that this new version includes Hulu+! ?

As always, the price will remain the same at \$7.99 even with this new addition.

I have also included a "Latest News" in this update so when you launch the generator you will see the latest News Post from me. This will allow me to communicate with you easier on if there are any issues with the generator or any planned downtime. Or whatever else I decide to put in there ?. I hope you guys enjoy it and thanks again for being such loyal customers!

On a side-note. I am still working to resolve the issue with some users getting the error "Sorry cannot verify Netseal user!". Please be patient as I try to figure out what is causing this for some.

It worked for me earlier today+your website is up?

Quiver - December 10, 2014, 8:53 am

For anyone getting the update error, try restarting the generator and see if it's fixed. The site was under a ddos attack so I had to put up a firewall, which unfortunately also blocks Net Seal from connecting to my site (since it's like a bot). The attack is over now though and I have taken down the firewall..the generator is working for me as of this moment. So if it's still not working, give it an hour or so. You can also try clearing your cookies and cache in case that's having an affect on it.

I apologize for the recent downtime. I will be extending all active 7 day and 30 day subscriptions by one more day.

If I get the time I will. However, the more accounts I add the harder it is for me to keep the database always checked and updated. Because cracking accounts isn't a very fast process all of the time (unless it's Netflix), so it requires even more of my time to be spent on the generator. I already spend about 1-3 hours a day helping customers with any questions or issues and keeping as many accounts as possible working.

Netflix has been updated. I will not be checking the database or responding to many PMs today. It's Christmas.

UPDATE:

I have decided to auction off this project. It's been a great run but it's time to move on. I simply do not have the time anymore to run this generator and need to focus on school and another project that I'm working on for HF. If anyone is interested in possibly taking over, you can check out the auction thread here: <https://hackforums.net/showthread.php?tid=4602537> I will only be selling this off to someone that I believe can continue to keep this great project running so smoothly.

It is also worth mentioning that if I do not find someone, I will not give up on the project. I will continue running it until I find someone appropriate to take it over.

With all these people on the account generator, is it hard to find a working account that lasts for a couple weeks instead of a couple days?

Perpetuum - June 6, 2015, 1:32 pm

Vouch, just paid for a lifetime all generators account and it's working great! Fantastic price! Some Spotify accounts weren't letting me log on so I did the right thing and flagged them.

I did have one question though, if I generate an account, does that let someone else generate that same account info? Just because with Spotify you can only play on one device at a time and I'd figured if more people were using that account it would cut me off more often while trying to listen to music.

Thanks!

Quiver - June 7, 2015, 7:35 am

I will be adding more account types to the generator today so the price will be going up either tonight or tomorrow morning. So get the cheap lifetime package now!

(Jun 6, 2015 09:55 AM)jfishy Wrote: [\[CITE\]](#) With all these people on the account generator, is it hard to find a working account that lasts for a couple weeks instead of a couple days?

It kind of depends on who is already using that account. It is possible to generate an account that not many have generated or are using. But it also depends if they change any account details or not. There are a lot of things that affect the lifespan of an account unfortunately so I can't give a real accurate answer to that.

(Jun 6, 2015 01:32 PM)Perpetuum Wrote: [\[CITE\]](#) Vouch, just paid for a lifetime all generators account and it's working great! Fantastic price! Some Spotify accounts weren't letting me log on so I did the right thing and flagged them.

Yeah everyone else still has access to it. That's the thing that sucks with Spotify accounts. Unfortunately they're not as easy to crack so I don't have a ton in the db. If I ever get a lot at one time then I may think about implementing a feature where each once can only be generated once.

Quiver - June 8, 2015, 11:42 am
