Arctic Wolf - September 13, 2014, 5:06 pm

Here is your Thread Design mate :)

Spoiler ([Click to View](#))

Microrobot - September 13, 2014, 9:12 pm

Very good service, the server is free, but the quality, and dedication made, was as if you paid him to create things for you.

Arctic Wolf kept continued contact with you on the status of your thread design, he's fast, and very cool to talk to, and really put in time making your thread design. He seems to always want to help everyone. As I was typing this he wanted to make me a better signature for free. We have to look at the status of HF I have seen people open a PayPal dispute over \$1 dollar, and this guy is willing to do all this work for free.

I even asked him why he did it for free, thinking it was just to get rep, he said he just wanted to fiddle around with Photoshop, and learn as he works. If you need GFX done, I highly, and truly recommend Arctic Wolf. He's such a good person, and kindhearted, he's an asset to HF and what the community should be all about Giving back.

It was a pleasure to meet you, and I will continue contact with you again.

Lint - September 14, 2014, 1:11 am

Free service, high quality, done quickly. That about sums up my experience with Arctic Wolf.

The last signature I had made I waited about 6-7 hours WHILE they were online, an experience I'm sure most people have had while they were trying to update their graphics. You won't get that with Arctic Wolf.

Minutes after posting I was interested I got a reply back (check time stamps on posts) and in the same instant was sent a PM updating me on his progress as he went along.

Couldn't of asked for a better avatar & signature from a paid service, did I mention this one was free? :D HUGE thanks, quick easy and painless, would recommend anyone looking for high quality graphics use this service.

Munch - September 14, 2014, 5:16 am

Can you look at this [thread](#) to see my requirements, basically I need a logo for a website title 'Techno Bay' or 'TechnoBay'(no space between words) that fits the meaning of the title and blends well with the theme like this([demo link](#)) and all it's different layouts(dark background, light background, header only dark background).

As for colours & fonts, I leave it to you & your professional opinion to decide what fits best.
