Thread: [\[GDI\] Quicktime Player - Template/Recreation](#)

SIM-1847363 - September 6, 2014, 9:07 am

This was my morning project i did today. It was going to go on my [Anime Streamer](#) but WMP video went black when i hooked up the components to the player, so i got screwed over on that part, since i can't really use it, so i'm releasing it, because i hope someone can use it.

Example i was going off:

[img]http://images.macworld.com/images/news/graphics/142424-quicktime-player-x_original.jpg[/img]

The re-created version:

(remember this was going to go on a [Project](#) of mine.)

Controls:

[+]Player Template (Main Control that contains most of the features)

[+]Volume Control (by Mava, modified by Netro)

Download - Code

[Download - Pastebin](#)

Code that i used to hook up the Sound, Trackbar, Pause & play button, fastforward button, and the fastreverse button.

```
Spoiler (Click to View)Code Private Sub AxWindowsMediaPlayer1_PlayStateChange(sender As Object, e As AxWMPLib._WMPOCXEvents_PlayStateChangeEvent) Handles AxWindowsMediaPlayer1.PlayStateChange
    If AxWindowsMediaPlayer1.playState = WMPLib.WMPPlayState.wmppsBuffering Or AxWindowsMediaPlayer1.playState = WMPLib.WMPPlayState.wmppsPlaying Then
        ' set trackbar1 min and maximum values
        ThemeContainer1.Maxnum = AxWindowsMediaPlayer1.currentMedia.duration
        Me.Timer1.Start()
        ThemeContainer1.PlayState2 = True
        ThemeContainer1.Refresh()
    ElseIf AxWindowsMediaPlayer1.playState = WMPLib.WMPPlayState.wmppsMediaEnded Or AxWindowsMediaPlayer1.playState = WMPLib.WMPPlayState.wmppsStopped Or AxWindowsMediaPlayer1.playState = WMPLib.WMPPlayState.wmppsReady Then
        Me.Timer1.Stop()
        ThemeContainer1.PlayState2 = False
        ThemeContainer1.Refresh()
    End If
End Sub
```

```
Private Sub Timer1_Tick(sender As Object, e As EventArgs) Handles Timer1.Tick
    If AxWindowsMediaPlayer1.playState = WMPLib.WMPPlayState.wmppsPlaying Then
        ThemeContainer1.Destination = AxWindowsMediaPlayer1.Ctlcontrols.currentPosition
        ThemeContainer1.VolString = AxWindowsMediaPlayer1.Ctlcontrols.currentPositionString
    End If
End Sub
```

```
ThemeContainer1.VolString2 = AxWindowsMediaPlayer1.currentMedia.durationString.ToString
End If
End Sub
```

```
Private Sub ThemeContainer1_FastForward(sender As Object) Handles
ThemeContainer1.FastForward
    If AxWindowsMediaPlayer1.Ctlcontrols.isAvailable("fastForward") Then
        AxWindowsMediaPlayer1.Ctlcontrols.fastForward()
    End If
End Sub
```

```
Private Sub ThemeContainer1_PlaystateChanged(sender As Object) Handles
ThemeContainer1.PlaystateChanged
    If ThemeContainer1.PlayState2 = True Then
        AxWindowsMediaPlayer1.Ctlcontrols.pause()
    Else
        AxWindowsMediaPlayer1.Ctlcontrols.play()
    End If
End Sub
```

```
Private Sub ThemeContainer1_VolumeChanged2(sender As Object) Handles
ThemeContainer1.DestinationChanged
    AxWindowsMediaPlayer1.Ctlcontrols.currentPosition = ThemeContainer1.Destination
End Sub
```

```
Private Sub SoundCloudVolumeSlider1_VolumeChanged2(sender As Object) Handles
SoundCloudVolumeSlider1.VolumeChanged2
    AxWindowsMediaPlayer1.settings.volume = SoundCloudVolumeSlider1.Volume
End Sub
```

```
Private Sub ThemeContainer1_Revious(sender As Object) Handles ThemeContainer1.Revious
    If AxWindowsMediaPlayer1.Ctlcontrols.isAvailable("fastReverse") Then
        AxWindowsMediaPlayer1.Ctlcontrols.fastReverse()
    End If
End Sub
```

If you know any solution to WMP going black, i would greatly appreciate any help.

Your player looks sweet ! :)Thanks it looks like after i have read that its a driver issue or a codec issue, i will try vlc and see if that tends to be the problem other than that thanks for your help, and i'm glad you like it

This doesn't look good at all, bad netro :c

Spoiler ([Click to View](#)) Jk, it looks good!

Onin42 - September 6, 2014, 10:49 am

Sweet player you've made. Good Job.
