Thread: [Visual Basic RAT Example](#)

Xenotek - September 6, 2014, 5:35 pm

Screenshot:

[Download](#)

Features:

When Client Runs Client.exe, it shows up on the Listview as "IP:PORT"

Doesn't have remove function.

Virusscan (Of RAT):

<http://razorscanner.com/result.php?id=572239>

On an unrelated note:

Why the fuck was my previous thread removed?

Edit: Oh, it's because I posted a sinisterly link.

SIM-2250608 - September 6, 2014, 6:33 pm

Nice example OP, looks pretty clean :)

Voidlight - September 6, 2014, 6:43 pm

Thanks for this, great learning tool

Xenotek - September 6, 2014, 6:50 pm

Thanks guys. How it works is it uses Async Sockets. Thought that would help.

taktaktak - September 6, 2014, 6:54 pm

Looks very interesting thanks for the post!

oRequiem - September 6, 2014, 9:28 pm

Looks real good, keep up the good work.

Xenotek - September 7, 2014, 4:10 pm

Thank you all for the praise and support. I will soon finish this project with a Stub Builder.

Centuries - September 7, 2014, 4:50 pm

It looks a bit like DC. Try a Theme Maybe? Earn has got a nice one with minor bugs

Lol it recorded all his anti spywares as malware

TheBarret - September 7, 2014, 5:13 pm

I don't wanna burst your bubble kid, but ;

Quote:- When Client Runs Client.exe, it shows up on the Listview as "IP:PORT"

- Doesn't have remove function.

Are no features as a feature is a distinctive attribute or aspect of something and i cannot fit those in that same definition.

SIM-1676753 - September 7, 2014, 5:43 pm

Vouch for this program. Better then Lazy's shitty RAT. <3

\$lick - September 7, 2014, 5:43 pm

Vouch for Mr. Trvp he knows what's up.

Centuries - September 7, 2014, 6:17 pm

Hey You may have purposely want this, you have the source codes in the download. 100% stealable.

Only3 - September 7, 2014, 6:29 pm

u cant call it rat u just cant ?

Xenotek - September 7, 2014, 7:39 pm

(Sep 7, 2014 06:29 PM)Only3 Wrote: [\[CITE\]](#) u cant call it rat u just cant ?

Uhh, it is a RAT because It uses reverse connection async sockets to let you control what the user's doing. Sure, it doesn't have any features other than connection itself, but it's a start. A template if you will.

TazzyOpz - September 7, 2014, 10:42 pm

Nice Share :) Good contribution... I'm sure people will find it useful

Proton! - September 12, 2014, 4:40 pm

This is more like a Server -> Client tutorial. There are no Remote Administration features, anyhow it can come handy to those who want to learn about Sockets programming ^^

Xenotek - September 12, 2014, 5:21 pm

Well, you're right in a way, but I take it as a template to create RATs. If I coded features for all of you, then this would be one of the most C&P'd RATs on Hack Forums (Aside from Alaa Bawaneh's Simple RAT or MaxXor's xRAT).

So I guess this is a tutorial.

Oliver Sykes - September 13, 2014, 11:27 am

Does this have the source? If so, I'm interested in it. Thanks OP.

Xenotek - September 13, 2014, 6:32 pm

Yes it has the source included. You're welcome.

H0ney Singh - *September 13, 2014, 11:22 pm*

Looks very interesting , keep up the good work buddy

zukkfb - *September 14, 2014, 5:07 am*

Thanks for this, very very good simple rat code!!!
