Thread: [Remove Scammer-Database Advertisement v2](#)

Raz?r - September 7, 2014, 2:42 pm

Here is the next version of the ad remover:

<http://razorsoft.co/remove.user.js>

And here the source:

Spoiler ([Click to View](#))

Code // ==UserScript==

// @name Remove ScammerDatabase Ad

// @version 0.1

// @description Removes the gay advertisement

// @include *hackforums.net/*

// @copyright 2014+, Razor

// ==/UserScript==

var get, ids;

```
GM_xmlHttpRequest({
  method: "GET",
  url: "http://razorsoft.co/annoying.php",
  onload: function(response) {
    get = response.responseText;
    ids = get.split(';');
    ids.forEach(function(id) {
      var annoying = document.getElementById('xero_message_'+id);
      if (annoying) {
        annoying.parentNode.removeChild(annoying);
        console.log("[RSDA] Removed ad with id: " + id);
      }
    });
  }
});
```

This one grabs the ad message ids from my server and removes them then.

I will try to update the IDs as soon as I see a new one, if you see any new ID that I missed feel free to send me a PM.

Please note: I made this because the ads are extremely annoying atm and as soon as the ads are getting displayed less annoying I will take this down.
