Thread: [Pros to Epic Upgrade?](#)

Programming - September 7, 2014, 4:10 pm

Has ANYTHING been added for Epic or no? I'm deciding on whether I should get it but I'm not going to pay more for literally nothing.

Is there ANYTHING that Epic offers?

CrypticX - September 7, 2014, 4:12 pm

I think that you can check the features right here <https://hackforums.net/extras.php>

MD5 - September 7, 2014, 4:12 pm

It only has vacation ban and larger pm box. Worth the money though.

Kouichi - September 7, 2014, 4:12 pm

Uhm, you look like you have more money than other members if you're Ep1c I guess. (Does not include Ub3r members, nobody is cooler than an Ub3r member. ?)

Seriously though - The only thing I'd upgrade to it for is more PM space.

My Dixie Normous - September 7, 2014, 4:12 pm

I think more PM space and the ability to self vacation ban (which you can do anyway)

youngselfiegod - September 7, 2014, 4:15 pm

You get more PM space and the ability to vacation ban (if you're not UB3r).

Programming - September 7, 2014, 4:28 pm

So basically I'd be paying for more PM space..

youngselfiegod - September 7, 2014, 4:29 pm

And whatever updates Omni implements in the future.

khaleesi - September 7, 2014, 4:29 pm

I bought it the day it came out. Everything still feels the same, no special features or anything.
REGRET REGRET REGRET.

My Dixie Normous - September 7, 2014, 4:31 pm

(Sep 7, 2014 04:28 PM)Programming Wrote: [\[CITE\]](#) So basically I'd be paying for more PM space..
Omni will be adding more features and when he does the price is going to go up. so you might as well get it now.

Chrazy - September 7, 2014, 4:31 pm

It's got nothing except PM space and a userbar. Omni said himself no point buying it at this point in time.

R?DSPY - September 7, 2014, 7:43 pm

3P1C provides a handy userbar which most people prefer.

They should remove the edit limit if you're 3p1c.

Mr. Lahey - September 7, 2014, 7:45 pm

I dunno, nothing has changed for me.

Helipads - September 7, 2014, 7:46 pm

PM space, userbar, and self-ban.

More to come, so I'm happy.

Skorp - September 7, 2014, 10:45 pm

I am sure there will be more features in the future. Just be more patient OP.

Autocorrect - September 7, 2014, 10:47 pm

As mentioned by other users, Omniscient will be adding more features and abilities for 3P1C members soon.

I would advise that you purchase your OMC now, then wait until the features are released before buying.

The amount of OMC will be reduced, but you will still have \$15 worth before buying into the group.

In other words, 3P1C will cost less OMC, but still be worth \$15.

So you'll have 10,000 OMC, but only need to spend 5,000.

That's under the assumption that price lowers when features are released, however.

Bugatti - September 7, 2014, 11:39 pm

Omni will be adding more features.

As of now all you get is.

- 1). More PM space
- 2). Vacation ban
- 3). Userbar

zSerity - September 8, 2014, 1:47 am

I don't think it has any other special features, just a cool userbar. ^^

420 Blaze It - September 8, 2014, 2:28 am

Userbar, PM Space and ability to self Vacation Ban.

Also, Omni said there's no purpose buying now, but people buy it for the hype, and in case the price will increase.
