Thread: [I'm going to be assisting an ebola patient](#)

SnoopityDiggity - September 8, 2014, 2:39 pm

Well, I was offered today to help an ebola patient with meals, I will be cooking the food for an ebola patient and making sure the water is clean and decontaminated.

Think it's kind of cool, I'm a bit scared, however I am excited to do the least bit of work to help such a significant patient

Just wanted to share this with you guys ?

Are you going to bring him the food yourself or a nurse will do it?
