I'm here today trying to sell a domain named: OvernightForums.com , This could be very useful if you wish to create a hackforums like website, or a forums website for a huge group of people.

How much is this domain worth? <http://www.siteprice.org/website-worth/www.overnightforums.com>

Starting bid: 10\$

Buy it now: 60\$

Sorry to say, but this Domain name is not worth 91\$.

I would lower the starting bid and buy now if you want to get this sold.

Just because it was registered 9 days ago does not mean that it is worth nothing. I had bought it but i found that i don't need it at all.
