Thread: [\[GFX PACK\] MrTrippyGFX's Free GFX Pack!](#)

MrTrippyGFX - September 9, 2014, 9:16 am

So first off if you clicked on this thread then i want to say thank you! I'm new to HackForums as you can tell and im just trying to meet some cool people on here. I'm not a scammer or a jerk or anything like that. Like i said im just trying to make some friends and have a good time. So lets talk about this GFX pack that i have made. It's all in Photoshop! It's a .PSD file and basically it just has folders filled with some Stocks, Layer Styles, Textures, Wallpapers, Etc. I did not make every single thing in this pack so please don't tell me i didn't make some of the stuff in here because i already know -_-! I will provide a image of the GFX pack below! Also i wanted to say that the original file was almost 300mb and my upload speed is terrible so what i did was put it in a .rar so it would upload to drop box faster. Hope you guys enjoy it <3

Thanks
~RealElite

To be honest i just looked up how to scan the file for a virus and every sight only allows up to like 80mb files to be scanned. I don't know how to scan the file to be honest lol. Im not really good with all this type of stuff. If you could help me then yeah i'd provide a virus scan haha.

Yeah, the link is down :(

amosquito4eva - March 23, 2016, 5:53 am

? The Download link is gone. And it looked very useful ?

yasoyasin - March 24, 2016, 12:51 pm

The download link is "broken". I wanted to download it, anyway :(
