Thread: [best free and paid rat and paid crypter](#)

Joann - September 10, 2014, 8:07 am

hi guys im new to hacking i just wana know best free rat and paid rat and best paid crypter works with .net rat and non .net rat

iKick - September 10, 2014, 8:29 am

Free RAT: Darkcomet

Paid RAT: Depends on what you're looking for

Best paid crypter: depends on how much you're willing to spend but Dataprotector v2 is very good

thnx for replay

about paid rat im looking for a very stable rat

paid crypter im willing to spend 60\$ for it

arhumkabir - September 10, 2014, 9:12 am

Free RAT: Darkcomet

Paid RAT: NanoCore or Imminent Monitor 3,

Best paid crypter: its depend on your budget there is alot crypter available in market from \$5 to \$50/\$60

if u really need a very long lasting FUD then go for some private crypter not sharing one

thats what im asking about? private crypter

M3g4J1v3x - September 10, 2014, 11:25 am

Free: Cobalt Strike

Paid: Cobalt Strike

Crypter: Cobalt Strike

All in one <3

Salam ?

Free Rat I would say DC. Paid one I would say Nanocore. For Crypters, just look yourself in this Section. [Cryptography, Encryption, and Decryption](#)
