Thread: [How Do People Get Hundreds Of Thousands Or Even Millions Of Emails?](#)

BananaTree23 - September 10, 2014, 5:41 pm

Hi, I Was Wondering How Some People Are Able To Get Hundreds Of Thousands Or Even Millions Of Emails? I Wish To Get Emails So I Can Promote And Get Traffic On My Websites Etc.... Any Help Is Appreciated Thanks!

mfwMyUsernamesTaken - September 10, 2014, 5:44 pm

If you are looking for emails to spam. It won't be very effective due to spam filters and etc.
If you are looking to recieve tons of emails, just sign up for lots of newsletters and mailing lists.

Storm- - September 10, 2014, 5:48 pm

It's pretty easy to code something that just grabs every email from a webpage. You could even one up that and make a script that searches common terms, and scrape email's from every page in the google search.

BreakTheMeta - September 10, 2014, 5:49 pm

Companies pay other companies for there email database so they may advertise on it.

Some people sql inject into vulnerable website databases, and dump them all.

WillHackForPizza - September 11, 2014, 5:03 am

Hackers just leaked 5 million Gmails - that should be enough for you - you can find them with a clever google search. I have a copy.

BananaTree23 - September 11, 2014, 8:19 am

Can you send me a link via PM? Thanks!

Cammy - September 11, 2014, 9:11 am

I Really Don't Know Why You Are Capitalizing Every Word Like This

I'm sorry I can't help you with your question, just wanted to say the way you write some of your posts is really annoying ;)

Niely - September 11, 2014, 11:13 am

A lot of mails get sold (to advertisers), leaks, database dumps,... :)

Not so long ago 5 million (old and out-dated) Gmail accounts were leaked as well.

Some people also manually make/use spammers or auto-clickers to make tons of mails.

Hooded Robin - September 11, 2014, 10:44 pm

the 5M Googles, were actually part of a larger 10M dump: 5M Google, 4M Mail.ru, 1M Yandex. But they are pretty old and the vast majority not working from what i hear so prolly not good for marketing (only for pumping up your lists to sell to marketers, lol)

mrmario - September 12, 2014, 8:19 am

Google advance search will help you

joneh heil - September 12, 2014, 4:08 pm

What do you mean? How people get so many emails?

If so, it is when you register at websites that aren't very trustworthy they sell your email address to advertisers.

This is the email inbox I've had for 6 years

PoisonKnife - September 12, 2014, 4:32 pm

It's very easy to harvest emails from the internet and websites and it's even more easier to send the emails so the go to the inbox.

Use a email harvester to get the emails.

Cyber Saint - September 12, 2014, 6:53 pm

Years ago, grabbing e-mails from web pages using a script was fairly easy and because the spam filters were not as advanced as they are today, it was effective. Nowadays - e-mail services have much better filtering to help keep the spam out. However, if you do it right - it can end up in the inbox. Good luck though with your attempt.

Spaark - September 12, 2014, 7:12 pm

Spamming really doesn't work anymore, If I where you, i wouldn't bother wasting my time.

Nakamoto - September 12, 2014, 8:05 pm

Purchase email lists, harvest emails, from user databases, etc.

Spamming isn't very effective anymore. You won't be making \$1k/day.
