Thread: [Free Icons \[1000+ Icons\]](#)

Cummodo - September 11, 2014, 5:04 pm

Hey Hackforums, A couple of weeks ago I made a thread about a website I use for Icons and users posted a couple more.
So I put them all together here. If you know any websites that have free icons feel free to contribute.
Hope this thread helps!

It's always fun to use icons :) There's also [Github's Octicons](#). Another cool thing is [Fontello](#), which allows you to pick and choose which icons you want, so if you only want/need a few icons, you don't have to load a huge icon font library. :)

Fontello is also good. Not as big but it's nice.
