Thread: [Wifi Hack Is Possible Now in Android \[Rooted Only\]](#)

Salman Khan - September 11, 2014, 9:59 pm

Hello friends today m back with new apps which through you can use other persons wifi connection hacking through. In play store many apps are present for wifi hacking but most prank apps they are only making foolish to users . I found these apps from other sources information to provide you wifi Hacking facility in Smartphones.

Here are 3 methods to u can hack wifi password.

NOTE :- THESE APPS ARE ONLY FOR ROOTED MOBILE

1) Reaver for Android v1.20a (HACKING OF WPA2 WPS ROUTERS)

[IMG]http://lh4.ggpht.com/-SuygOtHhq_k/VBJrx6w2TGI/AAAAAAdI/B_UJ8AVcUSQ/s1600/kdzybgp4.png[IMG]

!) First U have need a rooted mobile for this app if not rooted then root.

!!) Download/install bcmon.apk from

<http://adf.ly/rz9lq> (Adf Link - You Can Use It Guys :Oui:)

<http://goo.gl/CT2uPh> (Direct Link)

!!!) After installation, run the app and tap "monitor mode" option.

!V) Download and Install Reaver app which helps to crack the WPS pin.

v) open app then app is confirming that you're not using it for illegal purpose

vi) Tap the APN or access point you'd wish to crack and continue.

Many times, u need to verify monitor mode to proceed, and this would cause the bcmon to open again.

vii) verify ur settings and dont forget to check on Automatic Advanced settings box.

viii) in last time click on START ATTACK then it can be take 2-10 hours for cracking of WPS to be successful.

2) BCMON App Hacking of WEP Routers

[IMG]<http://lh3.ggpht.com/-VOuE04xxuuU/VBJxAnuSisI/AAAAAAdU/J47o-BuPR1U/s1600/como-des cifrar-contrasenas-wifi-facilmente-con-speedkey-para-android-2.jpg>[IMG]

!) First download BackMon App

<http://adf.ly/rz9lq> (Adf Link - You Can Use It Guys :Oui:)
<http://goo.gl/CT2uPh> (Direct Link)

!!) After installation, open the app and tap “monitor mode” option.

!!!) Then click on the “Run bcmon terminal ” option and type “ airodump-ng ” and Enter.

!v) Once the airodump loads finish, you would be directed to the prompt command in which you’re to type “ airodump-ng wlan0 ” then tap the Enter button.

v) In this stage, a Mac address would appear, in which you’re to jot down.

vi) Start scanning the channel by collecting information from the access point before attempting to crack the password, then type, “ airodump-ng -cchannel#–bssidMAC address-w outputath0 ” and tap enter, then it would start scanning, try scanningtill it reaches 20,000 – 30,000 packets.

vii) To finally crack the password, return to the terminal, but make sure you’ve reached the suitable number of packets, then type “ aircrack-ng output*.cap ” and tap enter at the terminal.

viii) Once the password is cracked successfully, you would recieve a message alerting, ‘Key Found’ and would display the key in hexidecimal form. So when entering the key, make sure you eliminate the dots ‘.’ or double dots ‘:’, i.e if it displays 12:34:56:78:90 , then enter 1234567890 as the code.

3) Osimo Wifi App

[IMG]http://lh6.ggpht.com/-CIV4fxEzdSU/VBJ19k91SkI/AAAAAAdk/iwaytZrdkzg/s1600/xFUXvKUTqEHRc3fz-aNZspyqXHs5rrJLbRCtjIGdBKMDhygl8jTU8hslIW0_xjLJkhk%25253Dh310.png[IMG]

!) First downloadOsimo App

<http://goo.gl/v1yUqv> (Play Store Link)

!!) It's not a Wi-Fi hacker app!

!!!) You can check the nearest open networks on our Wi-Fi hotspot map. Service that provides access to wi-fi hotspots details around the world WITHOUT HAVING TO CONNECT TO THE INTERNET. And above all, you can find a wifi point right around you on the streets and in different places with the help of augmented reality.

[IMG]http://lh4.ggpht.com/-_v1mKwL_hzA/VBJ1EZCc56I/AAAAAAdc/t7aEHTX_IFM/s1600/unname d.png[IMG]

iv) this app is not a hacking app this app will automatically find wifi network and register which is already hacked or used in this app

Sorry If Repost

Hope, It will Surely Help You Out Guys.

Regards

Farhan ?

Huskar - September 11, 2014, 10:02 pm

I will try it out right now and post results.

Charliep938 - September 12, 2014, 3:10 am

This actually work? must take a while to crack though

TheExclusive - September 12, 2014, 3:23 am

Thanks for the information i didn't knew reaver was created for android.

Going to try this soon.

uk3yo - September 12, 2014, 6:18 am

Compatibility

Developed and tested on: Nexus 7 2012 (Stock 4.3)

RfA should work on all devices with bcmon support (Broadcom bcm4329/bcm4330 chipsets)

Simply try by installing bcmon. Don't worry, if something goes wrong a simple reboot should fix everything.

Tested & works on:

Nexus 7 2012 (Stock 4.3, Cyanogen 9)

Huawei Honour (Cyanogen Mod based ROM)

Does NOT work on:

Samsung Galaxy S3/4/5

HTC One

LG G2

Nexus 4/5

Nexus 7 (2013)

Realdad - September 12, 2014, 8:07 am

will try and get back to you soon!!

thnx for the share OP!

Totally agree with you brother.

Enjoy unlocking :Oui:

Hydrogen Fluoride - September 30, 2014, 5:52 am

Tested this on an nvidia shield tablet and it says firmware model not detected so i assume it doesnt work on this

DrPanda - September 30, 2014, 6:22 am

Nice Share Thanks man :) really look forward to using this over and over again haha

OK found one issue second download link is the same as the first... also dosnt work on Nexus Z models ...

Shit! So I'm guessing it won't work on the S6 when that comes out?.. :/

BangBro1 - September 30, 2014, 9:01 pm

Thank you for this share bro I appreciate it

Developer - September 30, 2014, 10:35 pm

Now possible? I've been using my phone to hack since 2008.

you can try it out.

it is working on selected rooted models. ?

MaEsOs - October 1, 2014, 9:55 pm

I already know this but thanks for the share ! ?

sudhanshu15 - October 2, 2014, 3:32 am

Does it work on Moto X (Rooted),

Thanks
