DLT. - September 12, 2014, 4:17 am

This is the current member list for this official help desk:

[Crypto Miner](#)

Please be patient when waiting for a response. Thank you.

Bull™ - September 12, 2014, 4:22 am

Don't hesitate to post your questions on our Official Help Desk guys!

Billie Joe - September 12, 2014, 4:26 am

A bunch of high quality dudes from a high quality group.

Regular Guy - September 12, 2014, 4:28 am

How do you join the specialists? I have a very high area of expertise in Crypto Currency and I would love to help out with this thread.

Is there a recruitment thread currently open?

DLT. - September 12, 2014, 4:36 am

Sorry, this thread is not for recruitment. It's for questions which you may have related to crypto currencies. I suggest you wait for the next recruitment thread, hosted by the leader: [Bull™](#)

Realizm - September 12, 2014, 4:52 am

What would you guys say the most profitable coin would be to get into right now if using a mining rig? Bitcoin is so challenging, and LTC doesn't get much better with its 1/100 of a price compared to BTC. I've heard of like Dogecoin, FeatherCoin, etc. So if I were to say, get a 500kh/s machine, what would be the best coin to mine right now?

Sam Winchester - September 12, 2014, 4:56 am

I have a similar question in mind but I'm going to wait for an answer to this one instead of posting it. These guys definitely know what they're doing.

First of all, thank you for your question.

Are you mining script coins (Litecoin) or SHA-256 coins (Bitcoin)

If you've script ascis i would recommend researching on new alt coin releases. On this forum: [Alt Coin Pre-Ann forum](#). Find a new coin which has major hype, and has got investors drooling. After you've found a coin which you believe will make high expectations, you can either a hire a rig for the launch day, or use your current equipment. Get in early, and take all the easy coins.. wait for the devs to do their work (get it listed on exchange, etc) wait for the pump.. then DUMP.

If however you have SHA-256 ascis i would recommend mining bitcoins. It's the most profitable, as you can see by the website: [CoinWarz](#)

Alright thank you for the fast reply, this helped me out a lot ?.

The GRim - September 12, 2014, 5:14 am

Looks nice, I'll also try to answer the questions if its within my knowledge.

Dorrance - September 12, 2014, 5:27 am

Well I have been renting lots of rigs in the past, so today I was think of purchasing my own personal rig. Do you think this a good idea & do you have any rigs in mind for n00bs?

Sam Winchester - September 12, 2014, 5:28 am

Where do you recommend to rent rigs? I'm willing to pay for quality.

DLT. - September 12, 2014, 5:36 am

(Sep 12, 2014 05:27 AM)Dorrance Wrote: [\[CITE\]](#) Well I have been renting lots of rigs in the past, so today I was think of purchasing my own personal rig. Do you think this a good idea & do you have any rigs in mind for n00bs?

May i ask where you've been renting your rigs, and what rate what you provide the service out of 10? In regards to buying rigs, i assume Script asics? It all depends on your budget, the more you spend, the more profitable it is per day. What's your budget?

(Sep 12, 2014 05:28 AM)Sam Winchester Wrote: [\[CITE\]](#) Where do you recommend to rent rigs? I'm willing to pay for quality.

I've heard many positive reviews on this website: [Rentals](#)

& the feedback on this website is also very good. On and off the forum.
<https://leaserig.net/>

Forum thread: [Here.](#)

I haven't personally rented any rigs, so it's hard to say which one is the best. I've just asked

Dorrance which provider he used.

Dorrance - September 12, 2014, 5:39 am

Well I have used Nicehash, Betarigs, & leaserig. But overall I would have to say I love Nicehash is the best to my opinion.

DLT. - September 12, 2014, 5:43 am

(Sep 12, 2014 05:39 AM)Dorrance Wrote: [\[CITE\]](#) Well I have used Nicehash, Betarigs, & leaserig. But overall I would have to say I love Nicehash is the best to my opinion.

Thank you. In regards to your last question, what is your current budget to spend on rigs?

Dorrance - September 12, 2014, 5:54 am

I am looking to spend around \$50-200 for it, also note that I will be using this for various coins.

Aceman - September 12, 2014, 8:32 am

(Sep 12, 2014 05:54 AM)Dorrance Wrote: [\[CITE\]](#) I am looking to spend around \$50-200 for it, also note that I will be using this for various coins.

\$50-\$200 isn't likely going to get you an extreme amount of hash power. Personally I'd recommend spending up to \$500 on a miner as you'll usually have a return on investment in less than 3 months. That ROI can go a lot faster if you follow altcoins on Bitcointalk for new releases and look for coins which are likely to succeed or draw a lot of hype. Mine until they hit the exchanges and then profit. If you are set on your price you'd probably end up with a Raspberry Pi but I'll let someone more knowledgeable in hardware recommend specific pieces for you to buy.

(Sep 12, 2014 05:28 AM)Sam Winchester Wrote: [\[CITE\]](#) Where do you recommend to rent rigs? I'm willing to pay for quality.

Betarigs will give you a chart showing how much hashing power is being submitted which is nice but you have to open a ticket if the rig has been falsely advertised. While I've never used Leaserig it looks as though it's essentially the same idea as Betarigs where you pay to rent a specific miner.

I personally prefer Nicehash as it usually turns out to be cheaper despite the fact that you're bidding against other people interested in buying hashing power. You pay for the VALID hashes you receive and not the invalid ones which is a very big plus in my book. Nicehash pools all their hashing power together from miners and divides it up based on the amount each person is looking to purchase which is why you could go up to 20Gh/s provided you had the top buy order.

Minimum order on Nicehash is 50Mh/s whereas there is no minimum order on Betarigs or leaserigs. Nicehash you can stop mining at any time but Betarigs and Leaserig you purchase a contract for a certain amount of time.

Sam Winchester - September 12, 2014, 9:02 am

Is there a pool you recommend (specifically for NiceHash)? I'm thinking of making an invest of \$2000 to mining bitcoin.

Aceman - September 12, 2014, 9:18 am

(Sep 12, 2014 09:02 AM)Sam Winchester Wrote: [\[CITE\]](#) Is there a pool you recommend (specifically for NiceHash)? I'm thinking of making an invest of \$2000 to mining bitcoin.

I don't recommend renting hashing power to mine BTC. The 24 hour average price for 1TH of SHA256 mining is 0.022 BTC/TH/Day. One TH of power will get you 0.00001834 BTC per day.

$0.022 - 0.00001834 = 0.02198166$ BTC loss

$0.02198166 \text{ BTC} = \$10.47$ loss

If it were profitable for them to mine BTC they would be doing so instead of renting it. That's why most people who rent power usually end up using it on altcoins. Usually it happens this way because the person who owns the miner either doesn't know how to keep up with the markets or doesn't care to.

Ortek - September 12, 2014, 9:25 am

Yes mining btc isnt profitable for starters unless you have a large amount of money to invest in a (mini) farm. You might want to consider buying a Zeusminer Volcano (Scrypt miner) which has a hashrate of 300MH/s and only uses 1000W. It will mine for you 24/7 and make a profit.

If you mine on a pool such as Clevermining you will be mining on a multipool which auto switches to the most profitable coin and exchanges your profits to btc automatically so all you need to do is watch the miner and your btc wallet ;)

What's your opinion of the current BTC happenings, what's the reason?

DLT. - September 13, 2014, 1:49 am

(Sep 13, 2014 01:33 AM)Autopost Wrote: [\[CITE\]](#) What's your opinion of the current BTC happenings, what's the reason?

There are many reasons on the decrease, but it's hard to point it at one possibility. After all this is my opinion.

Bitcoin is a risky payment method, it fluctuates daily and who knows what the price will start and end with. Personally, I think Bitcoin will manage to increase steadily to its average price of \$550.. that's when I'll be dumping. I believe when December is here, it was go low as \$380, & that's when I'll be buying back in.

This is just a speculation, so don't take my word for it.

Moen - September 13, 2014, 2:04 am

I agree with what you are saying. Just want to add my 2cents to this.

Withe more online vendors accepting bitcoin with bitpay. It seems like this is causing alot of sell pressure since bitpay converts the BTC to USD.

Yeah, buy into coins. I purchased 500 litecoins when they were at \$3 a piece, two days later they hit \$6. Doubled my money that easy. You need to be prepared to take the risk, only invest what you're willing to loose. Same goes with primedice.

Aceman - September 14, 2014, 10:01 am

(Sep 14, 2014 09:51 AM)Crypto Miner Wrote: [\[CITE\]](#) Yeah, buy into coins. I purchased 500 litecoins when they were at \$3 a piece, two days later they hit \$6. Doubled my money that easy. To add onto this, if you do enough research, watch the markets, and pay attention to news you'll be able to have much more success. Treat cryptos like the stock market and you can day trade your way to wealth if you're good at it.

Ninetales. - September 14, 2014, 10:11 am

I have about 800\$ to invest into a rig. I'd prefer Script since that seems to be much more profitable.

What to buy, where to buy it?

I plan on using one of those pools like Clevermining during my busy time, then scoping out BCT for new alt coins and selling once they hit sites like Cryptsy.

Realizm - September 14, 2014, 10:19 am

So for somebody with only say... \$2000 to invest in any crypto-currency. Which would be better, buying into mining? Or trying to play the market with a decent amount of dedication?

Also, I've seen gambling sites and what not. Would any of those possibly be profitable? Does anybody have experience with those?

Do you want fast return? Or do you want to make like \$10 a day from mining? (That's from mining coins from coinwarz) If however you mine new alt coins on launch days it can vary high or low.

We can't discuss gambling on hackforums, but just quickly.. I've literally just lost \$200 from primedice. You win some, you loose some. I wouldn't recommend it to make a daily wage. Lets move away from that subject. ?

?Thorium - September 14, 2014, 11:58 am

What would you guys recommend to someone who is using IM3 to mine.. on some good computers ?? I have tried to mine OMC which is script and it seems i can get to about 1000KHS.. I know its not much but its because I'm using lower intensity..

I'm not looking to get a lot of money i just want to know if there is a good altcoin to mine while doing nothing lol.. just to get a few coins that i might exchange later for some other coin.

Jordana Brewster - September 14, 2014, 1:42 pm

Hi,

I want to buy a 50GH/s HasletGenesis miner from GAWMiners

What would be the payback time mining bitcoins? (The cost of the HG is \$49.55)

Or would it be better to get HashletSolo or a HasletPrime

Ortek - September 16, 2014, 9:10 am

Im going out for a few hours, ill answer your question and post the calculations when im back. Cheers

EDIT: im back and i have checked the Hashlet Genesis. The one you mentioned has 50GH for \$49.95. They charge a \$0.02 maintenance fee per GH per day, which means \$0.10 per day for your 50GH HG (HashletGenesis)

50Gh will get you:

0.00003512 btc per hour, which is \$0.02

0.00084297 btc per day, which is \$0.40

0.00590082 btc per week, which is \$2.81

0.02528924 btc per month, which is \$12.40

0.30768576 btc per year, which is \$146.44

When we deduct the maintenance fee's which are charged daily, you will get:

\$0.30 per day

\$2.11 per week

\$9.40 per month

\$109.94 per year

With these numbers you will reach your ROI in 5 months and 1 week (approximately)

Its up to you to decide if its worth it or not.

Imo you will make more with the Solo or Prime, but ill crunch some numbers to see which one is most profitable.

Monkeyboy - September 16, 2014, 11:56 am

If I spend 500\$ on a rig, what sort of profit would I get in a week?

DLT. - September 16, 2014, 12:00 pm

(Sep 14, 2014 01:42 PM)Jordana Brewster Wrote: [\[CITE\]](#) Hi,

Pointless to say the least, all you'll be doing is burning out your computer and paying for electricity bills. Don't bother trying to mine OMC, it's dead.

(Sep 16, 2014 11:56 AM)Monkeyboy Wrote: [\[CITE\]](#) If I spend 500\$ on a rig, what sort of profit would I get in a week?

You'd probably make a few dollars a day, at most. That's if you mine coins from the profit calculator on coinwarz. Invest your money into a coin.

Anything under \$5000, invest.

Fix Yo Bottles - September 16, 2014, 12:02 pm

That's some wishful thinking brother, but I don't agree with you. The recent issues and threats with Russia have influenced the BTC value a lot. It will even get worse even though a lot of vendors and hardware sellers have embraced the BTC and accepted it as a payment method it just makes things a bit less worse IMO. Eventually it will rise again but not that fast I'm pretty sure of that ;)

DLT. - September 16, 2014, 12:24 pm

The truth to that statement lies in the demand for btc at the time. If the demand is high and the supply reduces it will mean that people will be willing to pay more for the item so that they can accumulate it. Although you also have the issue that before the block halving your bitcoin could become worthless. It is a risky business to be in. But yes i think that when the block halving occurs the price will increase.

A good model for this is below.

Tor - September 19, 2014, 3:28 am

How much will this BTC fall go? And most important why is this happening?

Is it because of Russia?

Rubentastic - September 19, 2014, 3:34 am

(Sep 19, 2014 03:28 AM)????? M??GH?L??S™ Wrote: [\[CITE\]](#) How much will this BTC fall go? And most important why is this happening?

I'm also wondering why this is happening. I don't see another other reasons but Russia. I want to know when it's a good time to invest again. I sold all my Bitcoins at \$480 cause I needed the money on my bank and now it's already down tot \$400. I want to invest a few grand when the time is right ..

Tor - September 19, 2014, 3:37 am

Good thing , you already have 80 \$/ BTC. At 100 BTC this owul be crazy !

Aceman - September 19, 2014, 9:45 am

Nobody can predict where BTC's price will fall to as we are not fortune tellers. There is no algorithm or chart to follow which can predict its price. All we can do is sit and watch.

Crypto Miner, do you think that Butterfly Labs being shut down has an impact on the price of the coin? I think it could in that illegitimate competitors are not going to be taking money away from people who would be contributing to mining.

DLT. - September 24, 2014, 7:48 am

I can see where you're coming from, i don't see it effecting the price to dramatically but it may cause a few hiccups, nothing to serious.

Now that PayPal is in partnership with BitPay..Bitcoin, looks very promising. Those who didn't panic sell, at \$380/lower. Goodjob. ?

The recent news of PayPal integration of Bitcoins really helped the price climb again. Hopefully there isn't any form of off-chain payment system for Bitcoins though...

Aceman - September 24, 2014, 8:11 am

I'm surprised to see such a low rise in price. I believe many people are skeptical of PayPal given all the trouble many have had in the past with them. Though it may not be an immediate rise like I expected (\$50+) we should see the price start climbing now at least.

Supervisor - September 24, 2014, 6:13 pm

Its not that big of a deal. PayPal partnered with other payment processor. Its no more special to other news like Dell, Dish ... "accepting" it via a third party.

Wait till PayPal really accept and integrate Bitcoin then you will see a huge price rise.

Aceman - September 24, 2014, 6:40 pm

Actually it's much, much larger than those companies accepting it. The fact that the largest payment processor is going to allow BTC to be processed is huge. It allows regular people to be able to pay and accept BTC with little to no knowledge about how it works. Bringing it to the masses does a great deal in terms of acceptance amongst the general population.

Is it a good time to invest in bitcoin now?

What is the ideal rate for PP to Bitcoin?

Is the price of bitcoin going to climb anytime soon?

Is Christmas or Cyber Monday going to have a effect with bitcoin?

How should I invest my \$100 into bitcoin?

Thanks for any help I receive!

Aceman - September 29, 2014, 7:08 am

(Sep 28, 2014 02:23 PM)Paste Wrote: [\[CITE\]](#) Is it a good time to invest in bitcoin now?
I'd say so, it's relatively cheap right now.

(Sep 28, 2014 02:23 PM)Paste Wrote: [\[CITE\]](#) What is the ideal rate for PP to Bitcoin?
The ideal rate is 1:1 with no extra charges. Coinbase and BTC-E offer better rates than trading on HackForums.

(Sep 28, 2014 02:23 PM)Paste Wrote: [\[CITE\]](#) Is the price of bitcoin going to climb anytime soon?
There are many projects in the work right now which could have a massive impact on the price. One of the most recent ones is the [announcement by PayPal](#) in which they stated they have now partnered with several payment processors in the bitcoin scene. Once we see this, among other projects, come to fruition then we should (hopefully) be seeing an increase in price.

(Sep 28, 2014 02:23 PM)Paste Wrote: [\[CITE\]](#) Is Christmas or Cyber Monday going to have a effect with bitcoin?
It's difficult to say. It's likely that more companies may start to accept bitcoin around the holidays if other companies find success with it. That would give even more of a market for the coin to be used in which could cause a bit of a price rise.

(Sep 28, 2014 02:23 PM)Paste Wrote: [\[CITE\]](#) How should I invest my \$100 into bitcoin?
However you want. Do not invest money you are willing to lose and my honest advice is to do the research yourself in order to be confident. With that being said, I myself have invested more now because I believe this to be close to the low point, if not the low point itself.

The GRim - October 16, 2014, 8:03 am

Kindly post here if anyone needs help :)

DLT. - October 16, 2014, 12:36 pm

Yup, we're online and ready to help anyone in need. We are very experienced and can be the solution to your troubles! Don't hesitate.

Aceman - October 20, 2014, 1:16 pm

We've been helping people out in many different topics but it makes it much easier for us if people would be willing to post here. Makes it easier to respond to multiple people / issues at once and you may even learn something reading our replies to other people's questions. ?

Fluxify - October 21, 2014, 7:12 am

Which site would you recommend to rent a miner? BTC, LTC or any other cryptocurrency.

Aceman - October 21, 2014, 7:37 am

(Oct 21, 2014 07:12 AM)Fluxify Wrote: [\[CITE\]](#) Which site would you recommend to rent a miner? BTC, LTC or any other cryptocurrency. Your options:

[Nicehash](#)

[Leaserig](#)

[Betarigs](#)

I personally use Nicehash for all my rental needs. More often than not you'll face cheaper prices than those set at Betarigs or Leaserigs. Nicehash also charges you by the successful submitted hashes as opposed to the other two websites which work off an estimated hash rate (set by seller) and a price (set by seller). With Nicehash it's as simple as the money goes to the highest bidder and you set your prices.

Nicehash has higher minimum power than the rest but it allows much more flexibility in that you don't need to rent for extended periods of time and can cancel at any time.

What do you think about the current market? Invest hundreds or thousands etc. That's a very general question. You can't just give a lump analysis of all markets. You need to investigate them individually or in correlation to eachother as well as past volumes in order to understand and know when to invest.

(Nov 1, 2014 02:29 PM)Aceman Wrote: [\[CITE\]](#) Are you renting hashing power or looking to buy a rig

of your own?

Depends what seems to be the best route, could be looking to buy a rig.

Aceman - November 1, 2014, 6:13 pm

(Nov 1, 2014 05:12 PM)Sunkist S0D4 Wrote: [\[CITE\]](#) Depends what seems to be the best route, could be looking to buy a rig.It depends on your financial situation. Can't really give you good recommendations unless we have an idea of what you're willing to spend. You could spend \$60 on a raspberry Pi or spend a grand and get even more power. The return on investment is pretty similar so the thing that matters most is what you're willing to invest to start. Do you have a price range?

Realizm - November 1, 2014, 6:15 pm

Would you start buying right now if you were to buy low sell high? Or would you wait?

Aceman - November 1, 2014, 6:48 pm

(Nov 1, 2014 06:15 PM)Realizm Wrote: [\[CITE\]](#)

Would you start buying right now if you were to buy low sell high? Or would you wait?

We have to watch to see what happens with the bitcoins the Australians have from Silk Road.

<http://www.coindesk.com/australian-government-soon-hold-9-million-bitcoin-auction/>

If they do auction the coins off you can expect a price drop. People panic sell over news such as this knowing it'll cause a small drop, which then snowballs. I'd say wait and see what happens with this otherwise you put yourself at risk of a loss unless you want to hold long term.

dineshdina - November 23, 2014, 9:35 am

hello

I have a small doubt

can I invest in <https://cointellect.com/> does it seems legit ??

or u can advice another site that seems legit ?

Aceman - November 23, 2014, 4:40 pm

zilo - November 24, 2014, 12:51 pm

How do people invest into crypto currencies? Like you buy it for \$X and sell for a bit more when the price goes up?

Can I basically wait until it's \$1 less than usual and then sell it for \$1 more the day after and get easy money? If that would be that easy everyone would do that... right? Kinda messy I hope you understand my question

Ariana Grande-Butera - November 24, 2014, 1:09 pm

easy money? If that would be that easy everyone would do that... right? Kinda messy I hope you understand my question

Well usually there's a fee associated with buying and selling currencies like bitcoin.

Moen - November 24, 2014, 1:58 pm

What to think here?

Whale dumping to buy more with profit or whale that wants to cash out?

Aceman - November 24, 2014, 6:25 pm

(Nov 24, 2014 01:51 PM)Dilbert Wrote: [\[CITE\]](#) How do people invest into crypto currencies? Like you buy it for \$X and sell for a bit more when the price goes up?

Can I basically wait until it's \$1 less than usual and then sell it for \$1 more the day after and get easy money? If that would be that easy everyone would do that... right? Kinda messy I hope you understand my question Yes but most people do so in short spurts so that they don't end up losing money if there was a crash in price over night. It takes a lot of watching the market to know what you're doing and be successful. As another user stated, be aware of the fees you're paying as those cut into your profit margins.

(Nov 24, 2014 02:58 PM)Moen Wrote: [\[CITE\]](#)

What to think here?

Whale dumping to buy more with profit or whale that wants to cash out? Well I'd speculate most of the people who are selling now are doing so over the DPR bitcoins which were seized are going to be sold off. Nobody knows where the price is going to be and it's incredibly difficult to predict it given that last time it dropped before the auction and raised afterwards. A lot of people I know expect the price to drop further leading up to the auction and many have cashed out a portion of their coins. He could be playing the market or he could be dumping for good, hard to tell as of now.

dineshdina - November 24, 2014, 8:47 pm

Hi

Mining by buying contract or getting slaves to run silent miner ??
which one is the better one?

Mr. Infamous - December 15, 2014, 4:03 am

(Nov 24, 2014 09:47 PM)dineshdina Wrote: [\[CITE\]](#) Hi

Mining by buying contract or getting slaves to run silent miner ??
which one is the better one?

In the end, unless you have a lot to invest it's not worth it.

The best is getting a contract that's profitable.

Feel free to ask people here on HF about the contract.

They can tell you if it's profitable or not.

Unless you have a lot of slaves, and with a lot,
I mean A LOT, you probably won't get a lot of BTC out of it.

mti1993 - December 15, 2014, 8:06 am

hey , did you hear about CLAMS ?

for more info : <https://bitcointalk.org/index.php?topic=623147.0>

do you recommend investing in it ?

RancorsRectum - January 7, 2015, 3:31 am

Ive been reading through the entire post history and I must say i now have a better understanding of cryptocurrency, for that I say thank you.

I would like to know if you could recommend a profitable contract? I suppose you could say my start up amount would depend on the time/amount returned.

DLT. - February 19, 2015, 9:19 am

Game Changer - February 19, 2015, 12:19 pm

Is it worth investing in BTC?i mean buying miners to make money?

DLT. - February 19, 2015, 12:38 pm

(Feb 19, 2015 01:19 PM)Game Changer Wrote: [\[CITE\]](#) Is it worth investing in BTC?i mean buying miners to make money?

What's your total investment. I don't recommend purchasing rigs/miners to mine bitcoin. You'd make more money day trading, + its a permanent skill if you're consistently using the markets/graphs and other resources needed.

Disziswhoiam - February 19, 2015, 5:30 pm

Looks nice, a group to help eachothter

(Feb 20, 2015 12:37 AM)Game Changer Wrote: [\[CITE\]](#) I can spend good amount of money but only if its worth,trading you mean exchanging services like?

With trading i mean buying altcoins at a low and then selling at a high. It's not as easy as you think. It takes weeks to learn how the markets fluctuate and it all depends on any media attention, new releases, or updates for the coin.
