Thread: [\[PREVIEW\] My First Project - Skype Resolver - CloudFlare Resolver - Port Checker](#)

GaelicRabbi - September 12, 2014, 2:59 pm

Hey guys, this is my first program and I am just seeing if people would download this if I released it, it's very basic and there is probably more out there, so thanks for viewing. ?

Features:

Skype IP Resolver

CloudFlare Resolver

Port Checker

What's my ip - shows you're ip

Website Pinger

I will make more features if people would like this program.

Tomorrow, if there is a good number of people wanting this ill add the download link.

If the picture is not showing here is the link:

It's probably your first project, and you are probably still learning you know, and thats cool and all, but I wouldn't suggest releasing this here.

Use the async method to get the IP from the website, this way it won't freeze.

This is the most stupid first program anyone can make. If you were learning this language in College, is your first programming going to be a Skype resolver? Go pick up a book and read it. Stop releasing shit like this here. Learn correctly. Good luck on your education, and stay away from retarded programs/projects/ideas like that.

GaelicRabbi - September 15, 2014, 8:39 am

well, im going to delete this and thanks for the help +Haze

My reaction on seeing your thread title.

"First project" -> Great thing. Welcome to .net programing. Wish you all the success.

Next

"Resolver" -> Bitch, please .There is already tons on hf.

Give it to me, in PM.

Cause sometimes I'm to lazy to open my browser :D

Give the link to me.

I'll use it, cause sometimes I'm too lazy, to open browser and enter resolver site.
