Thread: [Girlfriend might be pregnant...](#)

Telstra - September 12, 2014, 5:43 pm

Okay, so my girlfriend and I had sex about 2 weekends ago (we rarely see each other) and yesterday she messaged me saying her period started and stopped. I looked it up and this is what i found:

Quote:If your period is usually right on schedule and you're now late, you could be pregnant. Some pregnant women notice light spotting called implantation bleeding around the time their period is due.

This bleeding may be caused by the fertilized egg burrowing into the blood-rich lining of your uterus (a process that starts just six days after fertilization), but no one knows for sure. Implantation bleeding is a lot lighter than a typical period – just a little spotting over a day or two.

I'm freaking the fuck out, anyone had anything similar, and what can I do?

x41N - September 12, 2014, 5:44 pm

Not sure if troll is trolling seriously.

I mean sometimes girl are just late, usually it isn't a big deal until they're like a month late. I'd still have her take a test if I were you.

LegacyGaming - September 12, 2014, 5:44 pm

My girlfriend was 6 weeks without hers and she came back on, chill out bro.

Could be nothing - although I would get the all clear.

But it's not late, it came, did the spotting thing and left.

Chance Acid Rapper - September 12, 2014, 5:46 pm

Happened to me before, girlfriend freaked out took a test, completely fine. Unless you finished inside her without any B.C. then you're probably fine.

How old are you, just curious. I mean you learn this in your first year of high school sexual education.

But yeah, ask her to have a pregnancy test. Either way you're still a troll. Also you have a girlfriend but you hardly see her, long distance?

Shrooms - September 12, 2014, 5:47 pm

Just get her to take a test dude, that's the only way you can be sure. Good luck OP ?

9ine - September 12, 2014, 5:48 pm

My girlfriend is 4 weeks pregnant; good luck.

I'm 17, 18 in december. Girlfriend is 16 with strict parents. I learnt it all a while ago, but she doesn't know too much, and her stress is passing off on to me, making me worry 100x more than I should be.

Seems to be the only answer, if her parents find out, I willl be fuckkkkeed.

hyhyhhrf4 - September 12, 2014, 5:53 pm

It's ok OP you have the rich bitch award, you can raise a child if you have one of those.

Well then your conclusion is simple. Fuck the girl as in leave her.

Then you don't get fucked. It's pretty much a win-win situation. You fucked, but didn't get fucked.

10/10 is worth.

I'm kidding of course, don't do that.

Planet VI - September 12, 2014, 5:55 pm

If you wore a condom then she probs isn't pregnant. It's your fault if you didn't wear one. Ever hear of precum?

I wore a condom, and it didnt break or anything which is the only reason I am staying positive at this point.

Nah tied it up after, and it was 'all' in there, no holes or breaks. I've always been sure to check that.

Planet VI - September 12, 2014, 5:59 pm

Bro you are fine, your gf needs to stop making you worry its that fufu lame shit, I aint wid it.

Just call her and tell her she might be pregnant.. She should know.

Not_Anonymous - September 12, 2014, 6:12 pm

Your gf is just being a whiny bitch or she's fucking with you. Tell that hoe to stfu.

Can't get pregnant without sperm. Shit, not like she's pregnant with Jesus.

Damn that really sucks to have that suspense and scare. Good luck man!

Enronitis - September 12, 2014, 7:07 pm

You said yourself you wore a condom and there was no holes or anything.

You're fine.

She isn't pregnant.

Seriously; unless your sperm can teleport, or phase-shift through shit..you really have no reason to worry.

This might be a TMI, but periods aren't always regular.

For example, mine wasn't. I'd have months where it was nothing, and months where it was everything.

Is she on BC? I'd assume not because her parents are strict.

If not, do you know if she has an irregular period? Because that could likely be the cause for all of this.

(Sep 12, 2014 05:55 PM)Telstra Wrote: [\[CITE\]](#) I wore a condom, and it didnt break or anything which is the only reason I am staying positive at this point.

Condom didn't break or leak, you're fine.

She's probably having such issues cus either irregular or she's stressing herself out.

It's pretty common for girls to stress and it effect their periods even more.

Spoiler [\(Click to View\)](#)op maybe you just tore dat shit up and it made her bleed???? it happens bruh.

Seriously, if she's pregnant, it's a fucking miracle if it's yours.

Like how could it be???
