Thread: [Paypal Question](#)

????II?I - September 16, 2014, 2:13 am

I think this is not the right section, forgive me for not posting it in the right one if it isn't right.
I just wanted to ask, I registered PayPal from a US VPN so that I don't have to use a CC at registration and had the account valid for 7 days. Now it gives me this message
Spoiler ([Click to View](#))

Can I get away from this with a particular method?
Willing to open a new PayPal as well.

Thanks guys, appreciate your help.

You can only lift your limited by verifying a card.

That's what I heard, but my friend has it without a card?
How :|?

It doesn't matter how you create a paypal. If your not 18 it is going to backfire at some point.
