Thread: [Syslogger Mediafire download link is not loading.](#)

CyberFox_ - September 16, 2014, 11:03 am

Please provide me a link to syslogger or a keylogger that is working.

Koffee - September 16, 2014, 12:02 pm

<http://www.mediafire.com/download/nr7j4ke4c6zbezf/Syslogger.zip>

This is the original download from E V O himself, It should be working, and if it doesn't then disable your Firewall/ Anti-Virus (As Known As AV). It's probably most likely your AV, you'll get a false positive because obviously it's a virus

Thank you. The problem might have been me being connected to a filtered/censored network earlier. But its working now appreciate it.

the link is dead now does anyone have the actual link to it still?

ase016 - September 12, 2015, 11:22 am

Yeah dead link :/ Please send actual link

Zer0Degree5 - September 15, 2015, 4:21 am

Link is dead. Need new link if possible :/

yo_02 - September 26, 2015, 6:34 pm

search for project neptune...you have the search on top right?!
