It's better than Halo 4.
Halo 3 is fun, but there's too many boosters and modders now.

Hmm. I try and go for a download & it tells me that it's not allowed for some reason. It lists off that it's my region (Canada) & some other bs things like it's corrupted.

Anyone else?

*Alright, took the liberty to go onto the microsoft/xbox website & download it off of there. It's working now.

Games with Gold is usually half a month.

I've had this on GOD since I participated in that beta test a long time ago, but now that my homeboy can get it time to achievement hunt.

It's most definitely 2 weeks. I just looked around.

Once the next game comes out September, 31. It won't be free anymore.
