Hey guys, watch for this <https://hackforums.net/member.php?action=profile&uid=2378929> guy here who scammed \$6 by telling that he will provide me cracked Vps.

We had deal of 50-50 earnings from my method using cracked VPS and he agreed that he will work with me. He asked me \$6 for buying a vps so that he could crack VPS but after taking my money he didnt contact me.

Then he said the VPS seller turned scam so i porvided him with VPS and told him that it only lasts 7 days and he said he it was enough. Then he done the initial setup and he was gone. Today my VPS is about to expire and I yesterday I asked him to give me \$6 back and he said he will do it yesterday but he didnt do yet. Hes a scammer and I recommend not to deal with him

Invalid scam report; he didn't 'take' your money, he set up the VPS for you to start cracking.
