File list:

Spoiler ([Click to View](#))

I dont own any of these!

I did not help make any of these.

I just found them in a pack and removed the garbage.

ALL credits to the original creators. their names should be in the source somewhere.

Nathan pls. Y u do dos. The innocent. Think about the innocent. .-.

taktaktak - September 16, 2014, 7:34 pm

I appreciate the compilation it makes my skidding job much easier. ITT you might as well sell all of these in the premium section. Let the skideroos dive over them.

ByteCapone™ - September 17, 2014, 12:28 am

Well, I was going to say "Woo! Selling crypter \$5 lifetime! 100% FUD *GUARANTEE!"

But mediafire already blocked it.. lol

SaketSaket - September 17, 2014, 2:15 am

Nice compilation but Mediafire has already blocked the file... ;)

Link is broken. ?

nathan72389 - September 17, 2014, 4:40 am

lol, updated the links, i didnt think they would remove it.

topLevel - September 17, 2014, 4:41 am

thanks for this, should be quite educational ;)

TheBarret - September 17, 2014, 5:27 am

im amazed of how badly these things are made, dear lord some of them are truly an abomination in the programming community.

Diggydog - September 18, 2014, 4:03 am

Thanks for the share gonna change the codes a bit and make my own.

SaketSaket - September 18, 2014, 4:34 am

Mega.co.nz link not working & getting following message when try to open google drive...

This has been posted a milion times already. Cheap bastard.

uhartem - April 29, 2015, 5:13 am

Watch the Cryptography subforum get flooded with "unique" and "high quality" crypters. I don't think you should've posted this here.

?lixir - April 29, 2015, 5:17 am

The market subforum is already flooded with resold shit.

This is a very old post.

Maybe not the correct sub to post this, but:

Maybe we could divide the Cryptography Subforum in to 2 or more subs, 1 for trusted and HQ crypters, and 1 for new stuff (:

I'm curious. Where did you get the Cryptex source? I had it a while back, and it's absolute shit, but Killamuvz gave it to me. Was it leaked or something?

SupremeBot - April 30, 2015, 9:45 pm

Thanks so much man, gonna enjoy this.

mundi_86 - May 1, 2015, 12:24 am

thx for the post, nice to see other code to learn from it ?
