The only issue I have is the phone doxer isn't working properly - tried it on several numbers and didn't work mate.

M8™ - September 17, 2014, 1:39 pm

Im posting to bookmark this thread, when someone reputable vouches I will download.

GL.

Bonfire - September 17, 2014, 1:49 pm

I've taken a look at the source and I'm pretty sure this file is clean. This doesn't mean you should run it unprotected though. Make sure you have measures in place that would stop this program (if malicious).

They use the following API: <http://abrasivecraft.com/api.php>

Virustotal on the deobfuscated executable:

<https://www.virustotal.com/en/file/1da04e20347e684619dc443c9e59e12f980a40e17c021296ea5e5b9f86ff7475/analysis/1410986823/>

Grindal - September 17, 2014, 1:57 pm

Mate your program looks just a bad use of a open source code, you're using the same API's of www.abrasivecraft.com , im pretty 100% sure , and you have the same tools than that site so...

?

XmysteriousX - September 17, 2014, 4:49 pm

nice coding dude seems interesting thanks

Rote - September 17, 2014, 4:54 pm

Thanks for sharing this for free I will be sure to check em out!

Thanks for nice words. I have sent you the source code on PM as you have requested for it.

Enjoy :) ?

Have you tried this format?

xxx-xxx-xxxx ?

It should work. Cheers mate!
