Thread: [\[Help\] How To Add A Progress Bar On WP Post/Page?](#)

sevenjah - September 18, 2014, 5:31 am

Hi guys! I saw a WP site awhile ago. I tried to clone that feature, unfortunately I failed because I am just a noob on WP, css, Js, jquery and other stuff. I don't have any idea how to add that auto start progressbar on a page/post.

When the page load the progressbar will load 1-100% after that a button will appear under the progressbar.

Anybody here knows?

Hope some WP, Css, Js, JQuery Guru here will help me. I'll be glad to give a cup of coffee to someone who can help me.

God Bless!

What kind of progress bar? A preloader? If so, look at [PACE](#)
