Big Vouch for this product.

'Il tell you now why this page is simply great. I bought this product a few days ago because I thought it would work on my Mac. Unfortunately it did not. So I simply send the owner a message explaining my problem, and I recieved great and kind support immediately.

So here is what came out:

Since I can not use the program in getting a list of alternative accounts.

But here comes the best. The owner does not even want to ban my account, nor he wants do delete it. This behavior shows how good the customer support is what reflects the site. Big vouch to this product, I can recommend everyone to get this. Especially since it is just reduced.

Explanation?

Maybe a false positive?

This program is made by me. I do not want to infect anyone. I just want to sell my product. If you do not trust OverShop don't buy.

We have a good client base and 0 complains.

EDIT: I saw the file is not the same as default. Are you scanning another gen or did you change the name?

If it's an application..does it support Mac and Linux? If not, you really need to make it web based. Web based is far more secure, anyways.

Why isn't it web based? I mean..you have a domain...surely the generated accounts aren't client side?

They have to be pulled from somewhere...

It would be way easier to push updates if it was, well, hosted on your own server as a web application.

If you want help making a web based version, I'd be happy to help, it's way better than actual apps.

Websites work on every device with internet, not just Windows which is a big limitation.

But I'm sure you will want a payment and right now I cannot afford nothing. I do not have the chance to make updates. That's why the prices are low. I was going to make this Web Based and

pay to a web designer to make and turn it more secure. That's why I said the prices will raise up, but the people that already have lifetime they do not need to bother. But I'm still thinking in this, any of this is 100%.
