That sucks, hope that isn't how it is going to be when my mom starts working as a nurse (not a nursing home nurse). I especially hope she doesn't go to work in the ER because then she will be gone for a lot of the day \ night.

one day just show up to her work naked with a rose in your mouth and go in one of the old people's beds and when she comes in to make bed just be like "ayy lmao"

Just tell her not to take her anger out on the old people. My grandpa had a shitty time in multiple nursing homes until the day he died.
