Thread: [\[Tutorial\] Hitleap 7200 Minute in 24 Hours \[Tutorial\]](#)

kannss - September 22, 2014, 7:56 am

- 1.Download and install VMware workstation
- 2.Download windows XP or Windows 7 (Any lite version)
- 3.open VMware and install windows XP or 7
- 4.Install any free vpn on that
- 5.install hitleap viewer
- 6.click on start button and search "adjust the appearance and performance of windows" >Click on it
- 7.click on adjust for best performance>Save and exit.
- 8.shutdown machine
- 9.Right click on OS>Setting>Provide 512 MB ram to your OS>Save Settings
- 10.right click on OS and click on clone
- 11.click next > Select linked clone
- 12.Repeat step 9 to 11 and make 5 or more clone
- 13.Now you have 5+ one OS
- 14.Run them one by one
- 15.open VPN and connect > Run Hitleap viewer on every machine
16. Booom....you can earn 75200 or more Minute in one day

Sorry for Bad English

If anyone have problem in setting Up thing.may contact Via PM or Ask Here

Tutorial Created By me (Kannss)

I am running 10 more Hitleap Viewers using this method :D

Thanks Kannss!!!

I didn't know you could use VMWare for different installations of the same OS. Thanks, it's quite useful actually.

v1001 - November 11, 2014, 4:14 am

how much space requires for one os installation ? can you give me download link for xp / 7 which will lite ?
