Thread: [\[VB6\] Quickstart Guide / Discussion Thread \[VB6\]](#)

Azok - September 22, 2014, 10:01 pm

[Before I begin, I would just like to make it clear that this thread isn't for VB6 bashing or bashing people who use it.]

[Secondly, The VB6 Runtime will be supported until 2024, so VB6 is still a very usable Programming language.]

Download:

I'm sure if you look around, you can find a clean Installation of the Visual Basic 6.0 IDE to install.

Learning:

Fire up Google and search: "106 Visual Basic Ebooks". You might have to delete some .NET ebooks from the Collection.

Skins:

"Xtreme suite Pro 15.3.1" as a Google search should get you started with the much known bss-black Theme.

Theme Installation:

<https://hackforums.net/showthread.php?tid=840174> - Thread poster is currently banned, Still works though.

Tutorials:

www.vbtutor.net/vb6/vbtutor.html

<http://www.vb6.us> <http://www.vbtutes.com/p/visual-basic-60-tutorial.html>

<http://www.dreamincode.net/forums/forum/21-vb6/> Google!

Video Tutorials:

http://www.4shared.com/rar/-VL9NADO/Visual_Basic_-_Video_Tutorial_.html (If this link isn't allowed, let me know!). YouTube ?

Source Codes:

<https://www.planet-source-code.com>

* Google!

There are many, many more. Just look around the internet.

This is a quick guide and my first tutorial and share. If anything here isn't allowed or if something needs to be changed then, let me know.

Odus - September 23, 2014, 2:02 am

All you've really done is told people to Google and given links from Google.

And I'd remove the part about skins, I think people should learn to program before worrying about skins/themes. ?

May we get the source for this claim, please?

+Haze - September 23, 2014, 11:48 am

You should really rename the thread title to "How to use Google 101".

Haha that's some shit right there.

Anyways OP, you shouldn't use VB6 anymore.

Why do you even bother posting a thread about this?

That must be the most offending insult I've ever heard. That'd be the worst thing ever.

Wow man, I'M SORRY NO NEED TO BE SO MEAN! :'(

If that does happen I don't know what I would do, guess I will just use a different computer.
