L'appel du vide (French for 'Call of the Void'- a reference to a former identity of the group), is a group of sophisticated individuals: we hold our own. A standard that has yet to be defined; we continue our advance towards infinity. While some dust may linger in our wake, swiftly it will be swept aside. No longer will mediocrity be standard while we exist.

Not even relatively close.

Astonish + Respawn =

sits around doing nothing expecting all of his members to do shit, activity at 0

Me + Skill = active leader, active members.

The irony of it all is that you've never been in either Respawn nor Skill and you think you have even the slightest clue what you're talking about lol

It's been a year bro, stop being butthurt because Platinum got you banned and move on with your life

Edit: Or have you brainwashed your members into thinking you got the blackhat award for actually being some godly blackhat? lmao

For anyone interested.

Skill was around when Lannisters was still around. I had a mutual respect for Platinum and Vinnie, then one day Platinum started shit with Vinnie behind his back and Vinnie got banned for being accused of being Justin Poland. Vinnie comes to me asking if I knew anything about it and I didn't want to get involved, but he received the Blackhat award for proving he wasn't Justin Poland and said that he wasn't mad, he just wanted to know who it was, so out of good faith I told him. Ever since all he has done is publicly and privately bash me and Skill although I wasn't the one who caused him any problems in the past.

So if something that minuscule and unrelated to me got you that butthurt about me even existing on the forum, that you started a huge hate campaign to try setting a bad image for me and Skill even a year after the groups departure then you must either be autistic or just jealous. Haters gonna hate homie, bring on the flame with your lowest quality group. ;)

Not to rain on the parade here or anything but isn't the results already deterministic before it even began? Instinct has almost double the members of the next highest group.

Statistically this cannot even be considered relative. Based on the current percentages to current group members their score is actually lower than the 4 or so runners up. If of course this is how the actual results were to be calculated.

But anyway good luck to all groups participating. I still wanted to cast my vote regardless.

Ok. I am not very clued up at all about groups. Just had a quick look at the link supplied in the first post and saw the members numbers and did a quick vague calculation based on that.

Was not knocking your group or any group on this forum. Only mentioned Instinct as they are in the lead. What actually made me want to look at the figures was Ops statement about the winning group being the official best group on HF.

Surely that requires more specific criteria and results calculated to some formula. But it isnt. Kinda like getting the whole world to vote for the best country. How can China lose?

Thats the link I was referring too in my previous post.

Look I am not saying you and Instinct shouldnt be winning. I am sure its a really good group based on the sheer size of members.

I was only pointing out that you were likely to win based on that and that the results were deterministic. Nothing implying anything other than that. But I feel like you are not happy about my original post for some reason and I am not sure why?

There's a reason they got removed. Void obviously wasn't their go-to group and most of them were members of other groups that they liked more anyway. Instinct members enjoy Instinct more than Void members enjoy Void, at least generally.

That is basically how these votes go, members in the group will vote for the group they are in (and if they are in multiple then it is their favorite).

Either way it sounds super cliché, but there really is no "best" group.

We invited like 4 members from the list to join who voted for us.

However, like I said, I represent many groups so I'm not voting.
