Thread: [C++ pdf Ebook thats recent](#)

Echoe - September 25, 2014, 10:39 am

Hello

I have looked around and seen many different versions of C++ books. I am starting c++ in university and I want a head start so I would like to learn it from the beginning as a beginner.

Can someone recommend me a eBook they use or suggest one which would be useful for me to learn from? If anyone has a pdf file or link to one please could you also pm me with this ?

THanks for help!

Check this: <http://stackoverflow.com/questions/388242/the-definitive-c-book-guide-and-list>

Then google the name of the book + pdf.

Ah yeah thanks alot! I think im going to go with Programming: Principles and Practice Using C++ (Bjarne Stroustrup) !

Thanks :D

Make sure you get the 2nd edition of it though as the first isn't updated for C++11.

i also need suggestion for c++ and i will also go with the book mentioned above Programming: Principles and Practice Using C++
thanks for suggesting!
