Impulsive™ - May 28, 2010, 5:09 pm

Please Rate 5* if you like!!

Manny People asked me how i did most of my spreading and it was by Using youtube.

Theses are a few of the most common methods i use for using youtube.
A Downloaded video of a fake program - post a keylogger what just give an error.

Make/ Find a Fake Program, Make a video of it and Log it.

Find a working keygen for a new product and bind your keylogger to it!!!! And make a Video with the keylogger actually working!!! trust me you'll get crazy hits! (they get something and you get something!!! andy every ones happy!)

Download a new song that not manny have posted - load it up with tags and since its new you will get toons of hits!

Use these previous videos i have made and post them on other sites.

Movie got removed from youtube. dl it [Here](#) (mediafire)
