Thread: [Exploit to the biggest radio company in Romania](#)

Pitimauf - September 27, 2014, 5:05 am

The Radio is called Kiss FM Romania

Is the biggest radio ever and they have an exploit to their server

They didn't hidde the login panel to their server as it was pretty easy to find

<http://128.140.230.3:80>

They also don't have captcha for login error so all I have to do now is to deface their website using a bruteforcer to login as admin :D ?

adrian35 - September 27, 2014, 10:28 am

For the biggest Radio Company here , I strongly belive they got a 200 character password, which nobody gonna try hacking, or maybe that login it's just for mocking people, some devs. wanting to play with hackers.

Just my thoughts...

FantaSec - September 27, 2014, 10:32 am

@adrian, doubt it. Would probably be in within a day or two knowing typical large companies.

Hooded Robin - September 27, 2014, 9:05 pm

lol, you found admin panel - must mean they are super vulnerable.....
