Thread: [Skype Resolver](#)

Michael J. Scofield - September 27, 2014, 12:32 pm

I realise a lot of people will say that there are many skype resolvers out there.
I believe this one is way different and has features which make it better.
It will resolve the desired skype users IP(s) from multiple of the best resolver website's.

It will also get the skype users profile picture but I will also expand on this so it gets the date of birth, location and previous IP's providing that this information is given by the skype user. This will help you to compare the information with the user to make sure that this is infact their IP. I will also soon add a IP2Skype allowing you to check the IP linking to the account using it. This is useful to see if the IP is a VPN.

With this you never need to load up multiple resolvers to check if the information is correct since this program is focused also on saving your time. Thank you.

Tips are always welcome !

thanks to Kallelzza for helping

Why not just use the website? Seems like less hassle.

Also hawt picture in the sceenshot, 10/10.

because you got here multiple website's, this is way faster and easier.

Sedo - September 27, 2014, 12:37 pm

Would like to see other people try it first. Then i will try it myself.

Kouichi - September 27, 2014, 12:38 pm

Personally, I wouldn't download this, there are tons of web resolvers which are much safer.
skyperesolver.com
mostwantedhf.info
resolvethem.com

Much more.

Why would you ever need more than one?

The all use the same method.

The all use the same method.

But sometimes one website gets the IP and other wont on the first resolve at least.

ErroSenn - September 30, 2014, 12:25 am

there are many results when i type your name in skype. would u like to add me ? (izaya-sho)

No Offense, but the extra features are pretty much useless, when people search up "Skype Resolver" They just want to be able to type a Username and then get their ip.

Most people who look up for a skype resolver wouldn't bother with the extra feature.

Just my opinion :)

Yes thats true, but this one is way faster then those site's and it does show multiple site's at once.
So if you'r favorite site is offline, u got 5 other backup site's.
