Zautra's Instinct Application

~ Username ~

My Hack Forums username is Zautra.

~ Country of Residence ~

My Country of residence is the United States.

~ Gaming Platforms ~

I game primarily on my PC as of now.

My Xbox 360 used to be my primary gaming platform, however I obtained a new computer therefore, I don't use it any longer.

I've also used a PS3 for quite some time, but I felt as the Xbox had a bigger community not only between my friends, but on Hack Forums and other gaming communities as well.

This resulted in an upgrade to the Xbox 360, and eventually I had the funds to buy computer parts to assemble a PC.

~ Most-Played Game ~

My two most played games would probably be Runescape and Minecraft.

I've been playing Runescape since 2006, and It's been a great joy ride ever since.

I've also spent a tremendous amount of hours in Minecraft.

There was a period in my life where all I played and did was Minecraft.

Those would be the two games that I've accumulated probably 300+ hours on.

I've also played a lot of games that really stand out to me such as:

1. Forza Horizon
2. Call of Duty
3. GTA (San Andreas / GTA 4 / GTA 5)
4. Euro Truck Simulator 2

I probably have the most hours in Call of Duty from those games as many, many of my close friends play it.

Forza Horizon is a truly special game for me because it really got me interested in cars, and introduced me to whole new communities.

Even though I got around 60-70 hours just driving around in single-player after I beat the game within the first 20 hours, I still greatly appreciate this game even with the lack of content.

GTA games were never really special to me, I never really played them growing up.

I do really enjoy them now, in terms of how unique and how endless the possibilities are.

Finally, Euro Truck Simulator is an amazing game that I have played, and I'm happy I've bought. I've really never seen something so close to realism, it's just outstanding.

~ Primary Genre ~

I don't really have a primary genre, I'm really open to any genre there is as long as it's a fun game. I do usually enjoy a lot of: Driving games, open-world games, and FPS Games.

It's really easy to adapt to a new game / new genre if it has a lot of content that's interesting and

engaging, or a good competition.

~ Why I Should Be Accepted ~

I believe that I should be accepted because I'm very active on Hack Forums, and I would be able to provide a good name for the group.

I strive to be as much of a high quality member as possible, unless I'm dealing with an obvious troll.

I really take groups such as these seriously because I've never actually been in one but I know what the HF community is like, and I really do enjoy being here and striking conversations with other members.

It's all up to you to decide if I get accepted or not, but I've had a tremendously fun experience gaming and I would like to see other members' story and experience gaming.

This also seems like a really good group for me because I do enjoy dedicating a lot of my free time gaming.

I'd like to explain my warning level in this last section here just because it might be something that would lower my chances in joining in the group, and I feel it should be cleared up.

The Story:

I saw a scam report of an extremely sketchy user.

I gave him a neutral reputation because I felt as if the community should be more aware of people like this and avoid dealing with him.

Turns out that I must have been directly scammed by this member in order to give him a reputation regarding him being sketchy.

I believe it's unfair because I'm trying to help out the community, but Omni's forum, his rules.

Thank you for reading c:

Hope you consider this thread, I've put a lot of work into it.

Gaming Platforms: PC

Most-Played Game: CS:GO, BF4, Arma 3.

Primary Genre: Shooters, action, mature games in general.

Why I Should Be Accepted: Because I don't have the money to join Instinct, I put all my money into buying a new PC I built and left me with nothing but small change but that's what I used to buy BF4,

Arma 3, and some peripherals for my PC gaming. I want to make new friends and so far, this seems to be the group where you won't get bashed on for who you are. It seems everyone accepts you, and as long as you're a gamer, you're welcomed into the group. Allowing me to be part of this group will get you good contributions whenever I'm able to, and I'll also be forever thankful. Plus, I'm tired of playing with a bunch of 14 year olds. I'm an all-around cool guy and I'm sure everyone will like me once they get to know me. I've met some pretty cool people in the group that play CS:GO competitively. I know that this was posted within 9 minutes of the thread creation, I spam "View New Posts" all day and as I saw the thread, and the application recruitment, I saw this as a chance to be able to be apart of Instinct. I shall sell my soul to the group.

Most-Played Game: LoL, CS:GO, Rust

Primary Genre: FPS, or survival games like rust

Why I Should Be Accepted: Other then work and college, all i do is game, from when i get home until i got to bed, other then surfing HF in between games. My whole life I've been into gaming from cod, halo, to just the random simulators or games like rust. My dad even calls me a nerd and says I'm like those on the show big bang theory, i love gaming it has been my life since i was a about 8 years old, I'm always buying the new games, the next console, i used to have a ps4 but sold it because i pc'd game more. I am really into league of legends right now, that's the game i've been

focusing on all summer and been trying to get better at, im in silver right now but am trying to climb out, i'm a very good jungler. I mainly am into first person shooters, like cod, or csgo, but i have a new passion for league, i also am waiting for borderlands the presequel to come out. I love any game that has a competitive scene too it and am always willing to try new games out. I think i would fit into this group because im willing to try any game out and always like to find new people who enjoy the things i do and also because of my insane gaming passion. I'm pretty easy to get along with also, I'm very laid back and like to joke around and have fun, but i also am very competitive at games, i want to win at all cost. I used to play cod competitively out of all my friends everyone knew me as the best at video games, but as my friends grow older they game less and less so i would love to join a group based on it so i can make new friends to game with.

I hope i get accepted looks like a great group ??

Why I Should Be Accepted:I always thought instinct members were some of the coolest members on the forum. Im a pretty hardcore gamer but recently i havent been able to find a game to play. currently just playing clash of clans am lv82 running a clan;p. I have worked on some RSPS's. and owned runescape private servers. Heres a list of games i play/played. Diablo series (i loved d2). Runescape. warcrafts and wow. CSGO Cod. Starcraft1/2. Clash of clans. Minecraft. Dayz. I like razer products alot. i have spent to much on there stuff. ive bought 4 headsets and every peripheral i use is razer.(including my earbuds). I have a custom built pc. I work sometimes with my dad doing Tech things for places. such as setting up stuff wiring etc. I'm a pretty enjoyable person to have around and i like to crack jokes and get along with people and throw friendly insults(once i get to know ya). i stream and youtube but i quit. i had like 3k subs on youtube and 800 followers on twitch. I think it would be pretty cool to be able to have one specified group to talk about games about and play with and help out with.

Thanks for checking out my application! I really appreciate it. OH and my names Josh. Have a good day:D

Why I Should Be Accepted: I've been gaming since birth and love video games and believe it relives stress and helps people gain a more creative mind. I belong in this group gaming is in my blood and this group will help me get even more educated in gaming and help those who aren't. I hate how the media say gaming makes people kill people but it's just people who kill people. I have seen lot of Instinct member around the forum and everyone I've seen has been cool people. I play lot of everything but my main platform is PC but I love playing my old console every now and again. Love that nostalgic feeling of the 90s playing my old games and My favorite game has to be Dragonball z Budokai on the PS2, I had to have spent more than a 100/hr playing that game as a kid. I am a open-mined person, I find myself looking for game with a good story as well as a open world to explore. I will fit right in cause I'm a chill person and hate drama. Would love to be apart of the best group on HF and Have fun time being part of the group.

Thanks Hope I can join ?

Username: Grievous

Country of Residence: United States of America

Gaming Platforms: PC, PS4

Most-Played Game: I usually switch around from CS:GO, CS:S, Garry's Mod, and Battlefield:4

Primary Genre: First Person Shooters (FPS), RPG, MMO's, games that generally take a lot of time to actually do something in. I hate playing a game where you can get to end of it in the matter of a couple of hours.

Why I Should Be Accepted: I've been wanting to join Instinct for a while, I've heard many great things about it and how active the users within the group are. I've been around hackforums for a while and have yet to find a decent gaming group/community in which will accept those who are interested into competitive gaming, even if they're they usually are harsh against one another. Instinct has the potential from what I've heard and I would love to give it a shot and try and join and see what goes on within the group. I've also been playing video games ever since I was about 6 year's old when my father gave me my computer, I've been hooked on games off of Steam such as Garry's Mod, which is where I started to learn about Lua, a language that is used within the game for creation of plugins, addons, etc. Now, enough of my programming side, I would just like to say that I am a prestigious gamer, I do not take losing lightly so when it comes to playing competitive I guess that's where you will see me turn into a "try-hard" like everyone know's each other one is during these times.

More Information about things I do: My two mainly played games are Garry's Mod and Counter Strike, although I enjoy playing many other games. I currently have 3,843 hours on Garry's Mod, with 243 hours on the game in the past 2 weeks. I have more than 1000 hours on Counter Strike split between all of my accounts. I'm the owner and developer of a well ranked Garry's Mod community. We currently own 7 different servers, that almost always have tons of players. I spend a lot of time on Garry's Mod playing with my community members and constantly developing new content. I've been apart of the Counter Strike scene for a while, beginning on 1.6. Since then I've moved onto the Competitive Scene of CSGO, with my highest ranking at one point being Global Elite. As of writing this application, my current highest account is Legendary Eagle Master. I would enjoy putting together a team together within the sector, and helping members learn the game better, and go up the ladder. Currently I have no contributions to the gaming section of the forums, but I'd like to change that. I could work along side some other members and put together a completion of various tips and tricks to help the hack forums community as a whole. I'm also very active within the Counter Strike skin market, I currently have about \$1000 worth of knife skins. I've worked my way up the marketplace from nothing to everything I have today. I'd be willing to share my experience within the market to help other members trade there way up from \$0.50 skins to \$50 skins. I really enjoy both the casual and competitive sides of gaming. I've devoted a lot of my time to gaming, and I'll continue to for years to come as it's a passion of mine that I deeply enjoy.

Most-Played Game:

- On the computer I normally play Counter-Strike: Global Offensive, Football Manager, Age of Empires, Arma 3 or Counter-Strike: 1.6

- On the Xbox, I normally play WWE 2K14 & Fifa 15(got it yesterday - played Fifa 14 alot beforehand)

Primary Genre:

- It honestly depends really. I like Warcraft, Age of Empires so strategy type games, shooter games in CS:GO, shooter/role play in Arma 3, strategy/fun for Fifa... It honestly depends how you'd class it. I like many games and I'd like to play games with others within the group and bond with fellow members as well as possible.

Why I Should Be Accepted:

- Although I'm a new user, I've got the willingness to learn the ways of the Instinct Clan, I'm also hoping to make new friends, bond with people and most importantly have fun. I'm always up to play people at Fifa, always up to play CS:GO, I have a microphone and so on, I have no issue with socialising with other members.

Although I may not be the most favoured applicant, I'd like to have a try at being a member of a group with such a great reputation - such as Instinct. Thanks!

Why I Should Be Accepted: I am extremely active in League of Legends ; I have played with people on Hackforums and I am currently Gold III. I haven't been active in the League forums lately but I am trying to converse more in those particular forums. I enjoy teaching people in League. I was trying at one point to sell one of my main accounts as I have two mains and I wasn't playing as much before. But as I am staying more time at home due to school I will be playing more and soon be opening a free duo service where I will teach people in Silver & Bronze how to get better in certain areas. I have been playing league since the beginning of season 2 and hopefully will soon hit platinum before this season ends. I used to play minecraft and I used to moderate on one of the biggest servers in 2012 called TheBattleCraft, you can google it if you wish. I then moderated on smaller servers and quite minecraft overall for league. I want to learn how to get better by those who are more skilled than me in Instinct, I also want to teach those who I am more skilled than. I also wanna get to know more people around here and overall I just want to have fun. I also play CoD sometimes with friends on Xbox, you can also add GTA V to that list. If you wanna 360 noscope 133t trickshot online just let me know and I'm in.

Edit: I also have youtube videos of me playing minecraft which I have received a couple thousands views on a few of them. Especially one in particular since I was raiding with avengeuiwull. I did raiding and pvp videos, if you want the link to my channel PM me because I rather not share it.

Why I Should Be Accepted: I think I should be accepted because I enjoy discussion of video games and strategies within them, but as much as I love doing just that, playing games are way more fun than talking about them. I'd really like to get a game or two with fellow Instinct members, knowing they enjoy games as much as I do. I feel like I will fit in just fine in the group and contribute as much as I possible can when it comes to games/subjects that I am familiar/knowledgeable with. Even though I have knowledge in a lot of games, I feel like I can learn a lot more to improve. I know there are Instinct members who are pros at games I require more practice and information. Applying to Instinct, I have a feeling that everyone in the group is willing to help as much as I am myself. I hope to join you in the future and best of luck to everyone else applying.

Background: I have been playing video games since I was about four years old. My first console

was the PS2. My first game was EA Sports F1 2000. I loved that game because I all I ever did was go backwards and try and make the largest crash ever! Black flag for days... Anyways, I loved my PS2 so much. My absolute favorite PS2 game was the Jak and Dexter series, hands down. I had way too much fun shooting and driving around deserts and random places. A few years later, I decided to get an Xbox 360 when it first came out. I was so happy to be the first one in my school with an Xbox 360 and was probably the first one to even play call of duty in my elementary school. Halo 3 came out in 6th grade and I absolutely fell in love with it. I enjoyed wrecking everyone online and making them rage. Only thing that was better than that was finding the super bounces and custom maps. After that, I fell into a COD slump. I think every gamer has been there before. Played a lot of Modern Warfare up until Modern Warfare 2 and got really tired of the same thing over and over again, as well as wasting \$60 every year for the same game with different guns. After going broke from blowing money on way too many video games, I decided to invest in a computer since I would be able to get a lot more games and play them for free. I played quite a lot of Runescape and I never look back at that game. Although it taught me a lot of life lessons like to not trust everyone. Aside from that, I fell in love with League of Legends. I am pretty garbage at it, staying at Plat V for so long but I enjoy having fun with all my friends. The league community isn't the best but I love watching and learning new things from the pros and streamers. As of right now, I'm saving up all my money for college but I still like to play all the games I bought prior to college.

Why I Should Be Accepted:

I believe I should be accepted into Instinct because of the love I have for gaming, I started playing when I was very young, I started from the bottom (Gameboy) playing Pokemon, instantly fell in love, I eventually kept playing different games & consoles I just couldn't get enough, once I got a Xbox 360 I started playing competitive Call of Duty (CoD 4) I attended a few local LANs, played in a couple of GB tournaments & played a few wagers on UMG, I earned over \$4,000 from all of this over the years & I plan to continue earning as long as I play but yeah I would really love the opportunity to join Instinct & meet people who share the same love for gaming as I do, I may be able to help out a few members as well also with anything Call of Duty related ?

Why I Should Be Accepted: Have been playing video games for a few years now, not the best at any of them, but definitely in the top 90% of players on BO2 for PS3. I'm OK at League, have a few games here and there, I'm currently working through my first 10 provisional games and, according to a few friends, should be near Silver 1-2 when I finish them. I like to have a strong team that I can count on to communicate with and work together to obtain the win, and I feel that Instinct could offer me the community to formulate said team.

Why I Should Be Accepted: I'm an odd hybrid of casual and hardcore gamer. I have a very hardcore playstyle and a casual play schedule. I strive to be the best I can be at the games I play, and attempt to increase the cumulative IQ of the game lobbies I join. Always friendly, always cheat-free, and just a generally chill guy to play with. Your group seems to fit me well. IRL I'm a paramedic and part time police officer who loves hunting, fishing, and trapping. I enjoy many things and would like to get to know you all.

Why I Should Be Accepted:

I believe I should be accepted into Instinct because of the love I have for gaming, I started playing when I was very young, I started from the bottom (Gameboy) playing Pokemon, instantly fell in love, I eventually kept playing different games & consoles I just couldn't get enough, once I got a Xbox 360 I started playing competitive Call of Duty (CoD 4) I attended a few local LANs, played in a couple of GB tournaments & played a few wagers on UMG, I earned over \$4,000 from all of this over the years & I plan to continue earning as long as I play but yeah I would really love the opportunity to join Instinct & meet people who share the same love for gaming as I do, I may be able to help out a few members as well also with anything Call of Duty related ?

Contribution wise, I can bring many things into the group. First and foremost, I'm known for my positive attitude in LoL games and can help others' mentality in games. I know my way around many champions, and have a lot of experience in game knowledge, mechanics, and mentality. Though I can admit I'm not the best playing in LoL (Gold), I believe I can bring many things into the group including discussions, tutorials/guides, and of course by staying active. I will try my best to bring

quality posts and information into the sub-forum, and am willing to play games with other Instinct members. I'm humorous, and a fun guy to play with overall. Last but not least, I'm a graphic designer. I can edit profile pictures, make signatures, and banners. Anything to help the group and contribute to it. I highly regret being inactive before, but I will promise to stay active and contribute whenever I can.

I want to play with others. I want to climb the ladder with others. I am looking for a family to play games with.

Thanks for reading my application.

Why I Should Be Accepted: I've been trying to get into Instinct for quite a while, but I never had the money to buy in or the will to put effort into it until now. I've been in the Brotherhood gaming sector for some time and enjoyed every bit of it. It seems that whatever group you're in, the gaming sector is the one that has the most fun. And Instinct is an entire group dedicated to just that. Everywhere I go, I see the Instinct userbar. It makes me realize that the group members enjoy it so much that they're willing to proudly display it on their profile. Why do I want to join? It's a place where I can hang out with friends and fellow gaymers, meet new people, and just enjoy myself playing video games. I'll always stay active in the group and I won't miss checkins. I've seen my fair share of groups in the 1 year I've been here, and Instinct honestly looks like the most fun in my opinion. It might not be the most "hq," but it's definitely the most fun. And that's why I want in, so I can enjoy myself and have fun.

Oh and also Zach is my nigga. :)

This is getting off-topic, but just one last thing. What's the difference between me joining Instinct versus 6 Instinct members being in Titans? Spying? Gaming and Titans do not relate. And you want to have ~500 members in Instinct, it's bound to have a good % of Titan members. I wouldn't have taken you for the guy to be so immature and reject a member of Titans(regardless of their position) because you have beef with the owner. Oh well, good luck with your group, no hard feelings.

I was even on a few pro teams during the MW2 days. Around the time MW3 came out, I quit Xbox because both of my OG tags got banned lol. [img]http://gfx.net/images/2014/09/22/headerf72c0.png[/img] What's Your Username
My Username is Tri?ngle and there is currently no meaning behind that.

Where Is Your Country of Residence:

I currently live in Canada and have lived here my whole life and never even left the country.

Whats Your Current Gaming Platforms?: I only play on Xbox 360 & Xbox One and have been an experienced gamer for the past five years. I've also attended a lot of competitive events for the Call of Duty series and have come in the top hundred on Game Battles which is basically a gaming network that holds events every years for professional gamers all around the world. I also have a PlayStation but I do not really play on it as I don't know a lot of people that play on that console but hopefully I can meet some people on this forum in the future that I could play games with or even just chill with randomly in an online session.

Whats Your Current Most-Played Game?: As I've said before I currently only play games from the Call of Duty series but I do however tend to play Halo: Reach a lot with my friends because it's the free game of the month and I've always enjoyed playing shooter games. On a monthly period I am more playing Call of Duty then any other type of game as all of my friends enjoy playing games within this series. Grand Theft Auto is also a most-played game of mine and I could honestly say it's one of the most well put games in the entire GTA series as the campaign is well put, along with multiplayer events and the game-modes.

Whats Your Primary Interested Genre?: I am mostly interested in First Person Shooter such as Call of Duty and or even other games such as Grand Theft Auto or even one of my strong favorite games Max Payne 3. I enjoy this genre because you are able to compete with other people around the world and show of the skills that you may have or may not have. First Person Shooter campaign is also one of my favorites no matter how bad the game could be, the campaign would still be fun and I am pretty sure that anyone could side with me on that opinion.

Why I Should Be Accepted to Instinct?: I strongly believe I should be accepted into Instinct and or group name *#@?&%! because I am a high-class gamer and I could do a lot for this group such as hosting gaming events, and giveaways such as recorders and more. I'd also like to be accepted to this group because I feel like I could meet a lot of people that have done the same things I have and or meet people that have the same interests that I currently have. I hope I could be accepted to this group and cheers for reading my application to you're group and I wish all other people the best of luck of joining this wonderful gaming sector.

Spoiler ([Click to View](#)) Username: [Squeaker](#)

Country of Residence: USA

Gaming Platforms: I usually game on the PC mostly because it towers over consoles and is better than consoles. I tend to explore new and bigger things on PC.

Most-Played Game: League of Legends is my most played game being that I am always playing either ranked or normals trying new things or improving my play style with other champions.

Primary Genre: I usually am drawn to shooter games, mostly because most of them are competitive and I always like competition. Games like Call of Duty not some much being that I don't like how they lay out their game. Although, Modern Warfare 1, and 2, were very good in my opinion being that they were big games for their age.

Why I Should Be Accepted: I have been in Instinct before and I had a blast. I was kicked for inactivity due to my life being busy. I could have prevented this but that's my fault for not posting on the sf. Now I am active as hell and I'm always on the skype chat. I also love meeting new people as well as keeping in touch with other friends I've made being in Instinct. I think I am able to put one foot forward and be a dedicated member of Instinct again.

Most-Played Game:

GTA V, Minecraft and Skate 3.

Primary Genre:

The primary genres that I like is open world, free roam and racing games.

Why I Should Be Accepted:

I should be accepted to become a part of Instinct because I have a passion for gaming.

The best thing I know is to play together with people and I love to meet new gamers with the same interests online.

I'm Playstation enthusiast and that's were my main focus is, I mostly play Playstation 3 & Playstation 4.

I know a lot about the consoles both software and hardware wise. I'm a Playstation 3 modder so I got the ability to give people mods if requested but I rarely play with mods myself.

I also game a bit on PC but I'm mostly playing Minecraft on PC. I was very active on Minecraft when the HackerCraft server was up so I'm really excited to see that Omni is thinking about bringing it back.

I got my own speculations that a lot of Instinct members will be active on the HackerCraft server which makes me even more excited.

I have great activity in the gaming section so this is a good opportunity to get a active gamer into Instinct.

[Sony Gaming](#) Is the section I got 2nd most posts in.

Gaming Platforms: Ps3 & Ps4.

Used to have Xbox original, Xbox 360, Sega mega drive, Super Nintendo, Nintendo 64, Gameboy colour, Gameboy advance. I pretty much owned every console since I was a child.

Most-Played Game: PS3: Fifa 13 (because of the speed, much better than fifa 14.) GTA V and CoD Black Ops II. For ps4 It would be Fifa 15 and soon to be CoD Advanced Warfare.

Primary Genre: I mainly like shooters, I don't mind if it's 3rd person or 1st person.

Free Roam games such as GTA V and DC universe.

I love sport games such as Fifa. I love challenges on pro club and can play for hours.

Why I Should Be Accepted: I love gaming, I have a mad passion for it. I have done since I was a kid. I wouldn't say I am a very competitive gamer. You cannot not love gaming though, Whether it's on GTA driving about and blowing up people for the fun of it, or getting ranked up legit on CoD. It's just completely fun to play. I think I should be accepted as I play my games and I have done since I was a young age and probably will still be playing games when I am 40 years old. I would be very active also. Gaming is my first love. I can also be very mature too. I am 25 years old after all.

I have never been into a group on HF. I think a gaming group would be perfect for me.

It would be awesome to get to know other gamers also within the HF community and even play online together depending on the console they have.

Best of luck to all applicants!

Gaming is a part of me where I can do my own things as in reality I'm just that one kid whos fucking popular jk but I'm a true gamer and I've been loving my gaming experience. I love to interact with gamers or people just like me. This forums is a great way to interact and have fun. This group will be my 1st group and I want it to be that way. Gaming is fun and you can do whatever the fuck you want.

I love to play games and I'm active and post a lot on HF so i'll be representing Instinct. I'm friends with a lot of people in the group and Zach is my nigga. I'll be the most HQ member and strive to be the best. Also, I love to meet new members and to interact within this sub community. Seems like a wonderful and HQ group and the leaders are chill as fuck. I love to play competitive gaming and I would dedicate my time to this lovely forum. This group is amazing and can't wait to see what It has in store for me.

I hope to have a wonderful experience with this beautiful group. This group has a lot in store for whoever gets accepted and thank you for considering my application. I'll be the most HQ member and strive to be the best. Thanks for reading this and have a wonderful rest of your day.

After having such a passion for Halo, at the age of 6 I bought the expansion pack, which gave me 3 additional maps for multiplayer (which I kicked ass at by the way), and at the same time, I started playing my first RTS-Strategy game: Conquest Frontier Wars (PC). At 7, I began playing more and more of Star Wars games, as well as RTS-Strategy games, though I would still play Halo, as well as my recently (then) acquired Call Of Duty: United Offensive game. At the age of 10, I played Halo 3, Assassins Creed 1 and 2, and Call of Duty: Modern Warfare, Call of Duty: World at War, as well as Call of Duty: Modern Warfare 2. At the age of 14, I played Gran Turismo 5, Forza Motorsport 4, and I also started to increasingly play League of Legends (also a PC game). At the age of 15, I played Lego: Batman (fuck yeah), Call of Duty: Black Ops 2, League of Legends, as well as Halo Wars (AGAIN DON'T JUDGE). Now, at the age of 17, I still occasionally play LoL as well as both Halo and Call of Duty, however I usually tend to stick around and observe people play, for the sake of my mindset (strategy-based), as well as the fact that I enjoy watching streamers rather than actually engage nowadays (I'm weird, kk). Overall, it's due to this vast history of me playing these games, as well as how they've affected my life in general, that I believe that I should be accepted into Instinct, because as a gaming vet, I can help improve guides, give strategies, and overall be a real awesome guy to hang around with ;)

Country of Residence: Norway

Gaming Platforms: PC, Also own PS3+XBOX360 I don't really use

Most-Played Game: Archeage, WoW, LoL, CS:GO & most new big AAA-games (Assassins Creed, GTA, The Witcher 3, Dragon Age Inquisition, those kind of things)

Primary Genre: Impossible to answer. I play such a wide range of games. I love MMORPGs, I enjoy some FPS, I also love to play strategy games. Furthermore I love exploring single player games

(Dark Souls 2, Skyrim, any of the ones mentioned above as AAA-titles really)

Why I Should Be Accepted: First a little bit about me. I'm 18, live in Norway and have a passion for games. I currently study in what you'd call college most places I guess. Currently in my spare time there's not much to do, so unless I'm out with my mates or whatever I'm probably spending my time playing games with other friends or watching anime or something like that. I'd love to become a part of another community where I can share my experiences and ideas, get help/help out others and find new people to play with. I'm an active member of HF and it's safe to say that I play games pretty much every day. While playing singleplayer games is great, I also enjoy playing other games with people. So being a part of this community to find a group would make things a lot easier. I'm also certain that I'll be able to contribute by being helpful and taking part in discussions and whatnot. I used to be a member of the HF gamer group several years ago, but I'm not exactly sure what happened to it. I haven't really checked up on the situation and furthermore I'm not really part of any kind of gaming community at the moment. Therefore being a member here would be great for me. I mainly play PC games however as mentioned above I also own a PS3 and an XBOX360, and I only use them to play exclusive games really (Gran Turismo, Forza...). Back to PC, I currently play a lot of Archeage due to the freedom of the game. I'm eagerly waiting for WoD to be released and then I'll probably jump back on WoW, at least for a while. These days I usually hit up some CS:GO or Robocraft games with friends, I also spend a bit of time playing Stronghold Crusader 2 that just got released, because of the nostalgia I get when thinking of the late night playing the prequel of the game when I was younger. I used to play a shitload of League of Legends (Probably somewhere near 4000 games played in total) ever since around the beta of the game. I don't really play anymore though, it's starting to get a bit boring honestly. I hit plat somewhere and I've probably decayed right now tbh. In the future right now I'm waiting for WoD to be released, GTA 5 to hit PC, and also a few AAA-games like AC:Unity & Dragon Age: Inquisition. I'm also kind of curious to Shadow of Mordor which released tomorrow iirc.

Bottom line I'm probably mostly a casual gamer at the moment, although when I play some sorts of ranked games I definitely competitively to win. Looking forward to hopefully meeting a lot of new people. Thanks!

At the age of 15, I played Lego: Batman (fuck yeah), Call of Duty: Black Ops 2, League of Legends, as well as Halo Wars (AGAIN DON'T JUDGE). Now, at the age of 17, I still occasionally play LoL as well as both Halo and Call of Duty, however I usually tend to stick around and observe people play, for the sake of my mindset (strategy-based), as well as the fact that I enjoy watching streamers rather than actually engage nowadays (I'm weird, kk). Overall, it's due to this vast history of me playing these games, as well as how they've affected my life in general, that I believe that I should be accepted into Instinct, because as a gaming vet, I can help improve guides, give strategies, and overall be a real awesome guy to hang around with ;)

this user is not a real gaymer and shouldnt be accepted

Why I Should Be Accepted:

I've been in the gaming community quite sometime and haven't wanted to be apart of Instinct since it took over the gaming sections. I know a lot of people in the group who love halo just as much as I do, and we would connect so much more once the MCC is out. I'm a competitive & laid back gamer, and I like to get along with people who share the same interest as I do; gaming.

Honestly, I would never trade my friendship with Rofl Gun for a position in a group. It's just pathetic how a leader is immature enough to blacklist people who are good friends with someone he hates JUST because he's leader and hates him. Friendships are worth way more than a position.

Why I Should Be Accepted:

I feel that I should be accepted because I am a very active member on Hackforums. I am here on a daily basis where I spend most of my time browsing through the gaming sections such as the CS:GO sections or the Gaming Lounge. I previously ran a gold store for Runescape [HERE](#). I enjoyed running it and was sad when I had to shut it down. I have enjoyed gaming from a young age which sparked my interest specifically in IT which has lead me to become an IT Engineer today. I began my early years playing games such as Runescape and World of Warcraft. It has now led me to playing Counter Strike: Global Offensive, Fallout, etc. I have thousands of hours across my list of steam games and aim to continue. I have even spent a large portion of my paycheck buying a good computer so I can play all the games at the highest of graphics. I take pride in my knowledge of both gaming and computing. I have enough time to contribute the group and would be happy to.

I attend multiple LAN events every year with friends where we take part in competitions and friendly games. I feel that this group would be perfect for me as it is the biggest gaming group on HF. I have run and administrated multiple gaming communities in the past including setting up game servers and teamspeak servers for people to use. I have also made a fair few contributions to the gaming community here. Ultimately, I enjoy meeting people online and would love this opportunity to meet new people and expand my knowledge.

Thank you for taking the time to read my application.

I'd have to agree with this, but in a nicer way.

Your application was lacking what was needed in order to be accepted, it was , and by the way you wrote it, it seemed like you aren't as passionate about gaming itself.

If you weren't blacklisted, I'd probably tell you to add more detail and thought into your post.

But hey, I don't have any word in who comes in, so that's just my two cents. ?

Country of Residence: 'Merica.

Gaming Platforms: PC, Xbox 360, PS3, Nintendo Gamecube, and Nintendo 64.

Most-Played Game: While there are several games in the CoD franchise that I have logged countless hours on, um I would say maybe FF VII or IX.

Primary Genre: FPS and RPG.

Why I Should Be Accepted: I should be accepted into Instinct because I enjoy playing games in both a single and multiplayer setting. I love starting a game and immersing myself in the story. Games such as the Final Fantasy series, Kingdom Hearts, Resident Evil, Castlevania, and the Mario franchise started my love for gaming. I have owned a majority of the consoles over the years and have enjoyed each on of them to the fullest. I am not the best in any game, by any means, but I am really competitive and like to win. That being said, I still play a lot of games just for fun. Even though I'm not the best at most games, several years ago I did play on a MLG team for Tom Clancy's Rainbow Six Vegas 2. I don't really play games competitively anymore except for the original Super Smash Brothers where I play in local tournaments and occasionally online. I love getting online and grinding matches. The teamwork aspect is something I especially enjoy. Being able to work with people in a strategic manner to outsmart, outplay, and out rotate the enemy team is something that attracts me to FPS games like CoD. I have begun to expand my library to other games such as Garry's Mod and DayZ. On top of your usual RPG's, sports games, and FPS's, I also enjoy playing visual novels. I watch a good amount of anime (I know that's not something most people would be proud of, but it really doesn't bother me) so I enjoy playing/reading these novels where every choice I make can take me down a different route. I am down to earth and a pretty cool dude to talk to. Whether you want to talk about games, news, or life I could offer a real teammate mentality to Instinct. I feel as though I can bring my teamwork to Instinct and give other members a pleasurable playing experience. Lastly and most important, I'm a gaymer at heart and always will be.

As much as I would like to join Instinct and whether you read my application or not, there are several others that deserve a spot over me so good luck to all of them.

Most-Played Game: Call of Duty: Black Ops II, I believe this was the best Call of Duty that was ever made. I've been around since MW2 honestly, and that was a hell of a game itself. They did a whole lot of work on Black Ops II, made Zombies a hell of a lot better, added awesome maps in the games that they knew everyone would enjoy. I still feel like, everyone is on Black Ops II, then playing Call of Duty: Ghosts, overall I think Ghosts is a 70% remake of Modern Warfare 3.

Primary Genre: First Person Shooting Games. I was first introduced to Halo 1 and Halo 2 when I was around 7-8 years old when I saw my uncle playing it. That's what got me into gaming, and ever since then I've gamed pretty much my whole life.

Why I Should Be Accepted: I think I would be a good addition to the group Instinct, I'm not a soar looser who doesn't quit easy and doesn't give up without a good fight. It would also help me meet new people around HF's forum, and get along with/them. I also like to have fun it comes to gaming, crack some jokes, and just over-all have a great time with the HF Community.

Why I Should Be Accepted:

Hi there, I think I should be accepted because I'd be a great addition to the group. I'm really easy going and great to get a long with and I'm very relaxed when it comes to gaming but I can also become very competitive if it's a competitive tournament, I play video games to have fun mostly, but it's even more fun when you have people to play the video games with and people that share the same interest in video games, and to discuss video games within the sub forum. It would be great to have a chance to be in the group as I've heard so many great things about the group and I just love that I finally have an opportunity to apply for the group. I've played a lot of video games in the time that I've been playing, and I've enjoyed it through and through, gaming has a rather big community here, but being in Instinct will involve me in a somewhat smaller gaming community to discuss gaming and share interests with other members of the group along with the group's sub-forum. I'm passionate when it comes to gaming, but I'm also passionate when it comes to being a friend.

I am on Hack Forums quite a lot and that will give me a chance to post a lot in the sub-forum and play games with the other members of the group. I've been in other gaming groups on Hack Forums in the short time I have been here and I've enjoyed it, but Instinct seems like more of a broad group for gaming. For example, I was in Nexus - but that was only for League of Legends and at one point Minecraft, and I enjoyed that, but I really felt like it was WAY too focused on one game, but yea - that is the point of the group, but Instinct seems a little more broad and that's why I think I'll be able to contribute more to the group and have better discussions with other members of the group when the time comes to do so if I happen to get accepted.

I know that there are a lot of other members applying for this group, it's a great group and from what I know an open-recruitment hasn't come for a while. But I'm just glad that I had the chance to apply. A lot of my friends are in the group and I've been interested in joining the group for a while now. Hopefully I can have the chance to join the group and befriend the other members of the group and have fun. The group is about gaming and while I have many other passions, gaming has always been up there. I play so many games and I play all genres, so I'd be happy to play any game I can get my hands on with the other members of the group. The group seems pretty laid back and that's something I like about it as well and makes me want to join, because I'm a laid back person - it's a cool combination, a perfect match.

I don't want to make this application too long, but I put quite a bit of effort in so I dearly hope that it pays off. Thanks again for this recruitment opportunity!

-Username-:

Raptorr, however my in-game alias is usually RaptorrHD

-Country of Residence-:

I live in the United Kingdom, South of England

-Gaming Platforms-:

PC mainly, however before I had my PC I heavily leaned towards my Xbox 360. (Despite maybe the lack of relevancy, before PC and 360, I played on my PS2 and Megadrive a lot!)

-Most-Played Game-:

Easily Minecraft, with probably in excess of 1000+ hours played! I love Minecraft, and everything Minecraft related, have spent tons of time experiencing all different types of game-modes within Minecraft, and would also consider myself a veteran staff member, being admin on over 4 successful servers(based off of money and players opinions)

I also spent many hours playing Call of Duty, starting off when CoD:WaW was first released, and have played all the CoD games since then, dibbing into the competitive scene in Black Ops 2 by competing in GameBattle matches, and UMG matches.

Going back to before I ever played Call of Duty I played GTA: San Andreas, and also lots of driving games, most significantly Need for Speed: Carbon (Best NFS in my opinion, with perhaps the exception of Underground 2)

-Primary Genre-:

I don't really limit myself to one genre, and merely play games that I enjoy, no matter what the genre is. Me and my friends use to kind of just play any game we enjoyed, moving from game to game frequently!

-Why I Should Be Accepted-:

I'm a nice guy. I'm friendly, charismatic, genuine and an all round cool person to be around or talk to. I enjoy playing all sorts of games, so if any members needed someone to game with, or clearout on CoD or something like that, I feel like they'd be comfortable with asking me.

I'm also extremely active on the forums and on my PC in general, I have lots of free time in the evenings, and also study computing at college, so am constantly on my computer and able to communicate with users regardless of what they need to speak about. I also enjoy gaming with new people, and looking for new people to play with, especially as the group of people that I played Minecraft with has dissipated, leaving me playing by myself, which is nowhere near as fun as talking to people and being able to joke and laugh whilst playing.

This will also be the first group I have applied for. I've always been active on HackForums, however only recently did I purchase L33T, and HF is becoming more and more a part of my internet life, I find myself on here constantly, just browsing and posting wherever I feel relevant. To further my interest, I wanted to join a group, and had seen a few Instinct products and things around before, so I was happy when I saw the Open-Recruitment! Instinct is a group that fits my *cringey* 'gamer' lifestyle.

Thankyou for opening the recruitment, and I hope to hear from you!

Most-Played Game:

I have 3 games that I play a lot

Black Ops 2

GTA V

Saints Row (2,3,4)

I loved the entire feel for Black Ops II ever since it came out in 2012. I loved Zombies, Campaign, Multiplayer, and just all aspects of the game. They innovated so many new things into the COD series with this game that it is insane.

GTA V has to be, by far, one of the best video games that I have played ever Because of its graphics, and hilarious storyline that kept me playing the game for about a month before actually being able to complete the game. I love a game that is time consuming haha.

The entire series of saints row has made me laugh my ass off from start to finish. They have got to be some of the funniest games that I have seen of all time, and I have played a lot of video games.

Primary Genre:

I like RPG games the most because of the story line to them, I also, for some reason, enjoy the feeling of acting out the character in a way while I'm playing.

Why I Should Be Accepted:

I should be accepted because of my chillness which would be great for the lounge portion of the group, for my broad knowledge of gaming, and for my modding skills.

I used to mod COD all of the time, I even came up with my own mod menu for MW2 (Videos will be below)

Why I Should Be Accepted:

I also love to teach and help members out on HF, so if a member needs to be taught how to mod a game, or wants help with me giving them free cash in GTA or something, I can be there to help haha.

Why I Should Be Accepted: I believe I should be accepted to Instinct because I want to be in a group of gamers with similar interests as me! I am looking to join instinct to have a greater connection with other people on HF. I believe I don't bond or connect with others on this forum enough, if I game with them I believe that would change. It would be fun and entertaining to game with others as we are now united as a group. I would be an active member, I am on HF everyday. I game almost everyday and it would be an honor to be accepted to Instinct. I would consider myself as a recreational gamer, I am skilled and can game pretty well but I would help others & share techniques if possible.

HydR4's *#@?&%! Application

Username:

My username is Hydralisk, but most call me HydR4

Country of Residence:

Born in the USA

Gaming Platforms:

Mostly game on my PC, but I do have a 360 as well.

Most games that I play are on my computer because I spend 10+ hours on it everyday.

Most-Played Game:

Probably Minecraft. I help out manage servers and also assist server owners with whatever may arise.

Minecraft is a game I probably spend the majority of my time on.

Was a HackerCraft Admin for a short period of time, but I mainly devote myself to helping manage servers right now.

My second most played game, would have to be StarCraft 2.

I grew up playing this game a lot and I still do, but not as much as before.

Some other games I play, include the several different ones that people play on the Instinct TeamSpeak and I sometimes join in on.

This mainly consists of League of Legends, but sometimes, a few other games as well.

Primary Genre:

Not sure what Minecraft would be considered, maybe sandbox?

First person shooters also interested me as Call of Duty and Counter Strike are both games that appeal to me.

RTS games like StarCraft are also a big genre that I enjoy playing.

Why I Should Be Accepted:

I believe that I would be a great addition to the group because I love gaming and I also enjoy playing games with Instinct members.

I usually hang out between 2-4 hours a day on the Instinct TeamSpeak.

On the weekends, I probably spend between 6-8+ hours on the TS talking with members and playing games with them.

I've met a lot of interesting members on the TS (including Package) and I would love to be apart of this high quality community.

Hope you consider my application! ?

Why I Should Be Accepted: Gaming is my absolute passion, and I love being surrounded by fellow members of the gaming community. I started off on PC playing RuneScape for hours on end, grinding my stats. If you're curious about my RuneScape history, you can journey into my tale [here](#).

When it comes to my stay here on HackForums, I'm a down to earth member who is indefinitely committed to displaying my generosity and professionalism. If I'm not giving away free items (giveaways), I'm actively giving advice to members who seek it in the "Innuendo" & "Xbox 360, One, and Live Gaming" sections as these are two topics I can relate to very well.

In Conclusion I appreciate anyone and everyone who has taken their time to read this. Good luck to all fellow applicants! ?

Gaming Platforms:

I play games like Minecraft on the PC, and I play other games like FPS-styles on my PS3.

Most-Played Game:

Probably Black Ops I & II, MW3 (PS3), and Minecraft. (PC)

Primary Genre:

First Person Shooters (FPS) and Role-Playing Games (RPGs)

Why I Should Be Accepted:

People tell me I'm funny so I guess I have that going for me. They also tell me I have soft hair and beautiful green eyes. I'm good at playing games I guess, I get the best ratios in-game. I'm usually a dick to everyone, but I know how to have & give a good time. I've been playing games for as long as I can remember. The first time I was like six years old playing on the first generation of XBOX. I'm an enjoyable person to be around, and I love making people happy.

I play many games on Mobile and test them out and speak with the community about the thoughts about the game and new upcoming updates and things.

Also, Wii is a cool platform I play to have fun sometimes with friends and look for a community to speak with. PC gaming is the best platform, many

diverse games and diverse communities. Contributing is very easy.

Most-Played Game: Call of Duty Ghosts, COC, Turbo Dismount, FIFA, and Destiny
Any game really as long as it's not shit or boring.

Primary Genre: Shooting/FPS and Sports
All around gaming.

Why I Should Be Accepted: I should be accepted because I'm HQ and I've contributed to the forums various times and will be representing Instinct.

I've been gaming as far back as I can remember. I remember sneaking into the computer room to play games before school started at like 5 AM. I was very dedicated and needed to get my extra leveling and grinding, haha. I contribute greatly and would like to get back into gaming ALOT more. I used to own a Minecraft server called Sewercraft, 200 players a day, \$4k a month. I usually now just play flash games on PC or just test out Mobile Games and discuss with others and express our thoughts. I will be representing the group Instinct and this group seems amazingly HQ, which is what I am ? I love to play games and pass time and not just play, but talk with the community. This group seems very fun and we can interact together. I am very active and hope to be accepted, thank you.

[Username] My current username is ?Average

[Country of Residence] I am currently living in the UK.

Gaming Platforms

I play only PC games.

I do have an xbox i like to play on that when im bored.

I also have a PS3 Downstairs wich i someones play The Simpsons games on. But im mainly on my PC all the time.

[img]http://x.hackforums.net/images/modern_bl/groupimages/english/instinct.png[/img]

Most-Played Game

I used to play minecraft all the time. On a range of servers and vanilla i still play it now. And im trying start a server up. I forgot alot when i went away from minecraft i only got back into this game a week ago. And realised what im missing when i went back to it.

I also play alot of Garrys Mod. I think its a great game and would be happy to host us all an Instinct Garrys Mod server.

My main game when i left Minecraft was battlefield 3 i think that games just truly awesome.

Primary Genre

I dont have a primary Genre. I like a range. My main three are probally, Racing,Shooting,Building. I enjoy them kind of games alot.

Why I Should Be Accepted

I think I should be accepted because I enjoy games and the obstacles within them, as much as I love doing just that, playing games are way more fun than talking about them. I would really like to get a game or two with poeple in Instinct , knowing they enjoy games as much as I do. I feel like I will fit in just fine in the group and contribute as much as I possible can when it comes to games/subjects that I am knowledgeable with.

~ Username ~

My Hack Forums username is Filthy Frank (also known as ~OpTic).

~ Country of Residence ~

My Country of residence is the the Netherlands.

~ Gaming Platforms ~

I own a laptop, mutiple ps3's and one ps4 (also some older consoles no one ever plays on).

I usually game on my PC.

I used to play a lot on my ps3. but since I discovered LoL, minecraft and many other, I spend a lot of time on my PC.

If I'm on my ps3, I play games like CoD, skate 3 and GRID, but I do have like 30 different games.

I'm also planning to upgrade to an desktop instead of using a laptop in like 3 months.

~ Most-Played Game ~

My fout most played games would probably be Runescape, Minecraft, League of Legends and CoD Modern Warfare 2.

I've played Runescape for like 60 days of total game playing time. I must admit I've been botting my woodcutting, but that's not so important I guess.

I've also spent a lot of time in minecraft, I've been playing that since the alpha of minecraft, that's like 5 years ago. I enjoyed playing the game but I must admit, after 5 years, I only play it when friends force me to play it.

also, I've spend a lot of times on LoL, I'm at the moment Gold V with 120 ranked wins and 1.1k normal games wins (950+ normal wins on Summoner Rift). I play since end season 1, beginning of season 2. I've spend like 2k hours on this game. I still enjoy playing that game, so HMU if you're from EUW and want to game with me.

Last but not least, I've been playing MW2 a lot of time on the ps3.

I've played it for 2k hours the legit way. But there was a time when PS3 could jailbreak and host modded lobby's.

Well, that's what I basically did. I enjoyed being the walking AC130.

I think my stats got reset by some douche, so I asked someone tho host a modded lobby for me and make me 11th perstige.

When I was growing up I really enjoyed playing GTA games, I played GTA games like GTA 1 and 2, sometimes 3 and I enjoyed playing GTA SA the most.

Also GTA IV wasn't that bad. I currently also own GTA V where I got 100 mill of cash on + lvl 121 (modded by some member on HF).

~ Primary Genre ~

I don't really have a primary genre, I'm really open to any genre there is as long as it's a fun game. I do usually enjoy a lot of: Driving games, open-world games, and FPS Games.

It's really easy to adapt to a new game / new genre if it has a lot of content that's interesting and engaging, or a good competition.

~ Why I Should Be Accepted ~

I think I should be accepted because I think I'm fun to play with. I also think I can contribute to the private forum by hosting some cheap ass boosting service for LoL or something (I have friends in diamond who are willing to duo queue or something with some other player.

I also think I can be a good asset because I'm most likely good informed on new "hacks" for games. Like the ps3 jailbreak, I was the first of all my friends who figured it out how everything worked and such. Also, if you're feeling bored or w/e you can always PM/Skype/Steam/PS3 message/LoL ingame message me if you're bored because I'm most likely also bored.

I have experience as a network recruiter and YouTube partner. I helped start up Vexon a few years ago, work as a Fullscreen recruiter, and have a partnership via Machinima.

I started playing MineCraft in 2009 when it first came out. I had a channel documenting the progress made by Notch (I was a member of <http://darkdemon.org> and Notch posted there advertising once, so a few friends and I got interested). That channel (InjexMineCraft) has since

been shut down, but I was a director of The Archives, the first multi-world creative server (before Survival was released and before World of MineCraft came up with a multi-world system).

I played Call of Duty competitively for a while when MW2 was out as the main game. I learned to do graphics, web design, and edit videos during this time period. I also made a lot of the friends that would help me attain my goals as a YouTube partner/ network recruiter. I later made a deal with Lionsgate to monetize off of their trailers.

Shortly after becoming competitive, I started collecting OGs (which led me to HackForums... I had lurked this forum in 2008 with a friend from Dark Demon named Code Machine but had never actually joined).

I created the first popular HungerCraft server using a custom-coded bukkit plugin a friend and I made. This is where I started to monetize off of my servers and began working for support for FluctisHosting.

I'd like to join Instinct in order to gain more friends on the forums, expand my gaming knowledge, and join teams on different games in order to have a better time and have fun. It seems like an enjoyable group and I'd like to interact with the users by playing games and goofing off online together.

[[Here is the FaceBook page I made while documenting MineCraft's progress in 2009, which has since grown to 20k likes.](#)]

[[Here is my current YouTube channel \(although I have been inactive for a while\).](#)]

Thanks for taking the time to review my application. I hope to see you all on the inside of the group :-)

Why I Should Be Accepted: I've been on HF for quite awhile. I have never experienced a group before(because i have never applied). I think that I could really support and help the group grow. I game a lot and know a lot about Battlefield and other games to the consoles I listed above. I could help and offer tips to people who are stuck on a mission or need a strategy. I love to meet new people and I think this would be a great opportunity to meet some new members and interact with others. Need something that relates to Minecraft, I am your man. I would love to setup a server for the Minecraft Instinct players for free. I believe I could really help the group get to know each other and become a group of friends. Have any other questions? LMK.

Why I Should Be Accepted:

I have a lot of gaming experience, and I am also fairly good with games. I have a tendency to pick up on game mechanics very easily. Although this sometimes is my downfall. I often get bored of playing a game, because I advance too quickly through it. I find that LoL offers a wide variety of play style.

If you wanna know if you got denied, no solution I guess.

If you've not had a PM from Inxy, me or Zach at this point, you're probably denied. We've all added several members so far.

I would suggest anyone applying for Instinct, to put a little more effort into their applications. Rather than one line answers for each question. Which is what some users seem to be doing..

My name is Gunnar, I live in the US. I enjoy playing Xbox, and browsing forums. On these forums I like to buy, sell and trade SMs and GTs, not so much GTs anymore. I like to listen to rap and pretty much any music besides country, rap is overall my favorite though. I spend most of my time inside and am severely an introvert. I've been using social medias such as tumblr and instagram for a few years and I still continue to use both. I like to talk to new people and converse over the internet with other users. I have been trying to be more active on this forum as opposed to the other major site.

I play most of my games on my PC. I have more games on my PC then on my PS3 and Xbox combined. I am interested in getting a PS4.

Most-Played Game:

I have a few games that I play the most. I am very competitive and love to play competitive and

ranked games.

My first game I would have to say is League of Legends. I have been playing League for around 1 year and a half. I have loved playing it and I probably have over 800 hours on it. I love how competitive the League of Legends community is. The game never gets old because you keep getting better and moving up in ranked. I primarily play ranked games. PM me for my lolking.

My second most played is definitely CSGO. I have around 300-400 hours on CSGO. I am a Gold Nova Master. I have been playing CSGO for about 4-6 months. I have progressed a lot and played around 130 ranked games. CSGO is one of my favorite and most played games. CSGO is another game with a very competitive community and ranked system.

I have a lot of games that I play a LOT. Some games that I do play a lot are Dayz, Arma 2, gmod, Arma 3, BTF 4, and Payday.

Primary Genre:

To be honest. I wouldn't say I have a Primary Genre. I play all sorts of games from Minecraft to League of Legends. I have a few Primary Genres but there are almost no Genres that I don't like. I play all sorts of games. I really like Horror, FPS, and Survival games.

Why I Should Be Accepted: I think I should be accepted into Instinct is for my passion in gaming. I have been gaming since I was able to walk. I have had a gamecube, PS1, PS2 all those old systems. I have also always been competitive when playing games. For as long as I can remember I have always loved gaming and being competitive. I hate losing in any game. I don't care what game it is. I game for at least 5 hours a day. On the weekends I game for even longer. Between School, sports, and a social life all I do is play games. I would love to meet new people and play games with members of Instinct. I think meeting new members of Instinct and playing with them would be great. I only know a few people on HF that I game with. I would love to meet people from Instinct. I am really laid back and love to joke around. I don't get mad or rage at games or get mad at my team mates. I really like team games like League and I love learning and helping other. For example if someone messes up I am not going to yell at them but going to help them and change what they did wrong. I think Instinct is a great group for me and I have a lot of things I can bring to Instinct. I would love to participate in Gaming nights and bring a lot of fun to them. I also have a Youtube channel with around 2k subs. I upload different gaming videos from Minecraft PVP to League of legends. I have always loved editing and recording gaming videos. I would love to create or be apart of an Instinct youtube channel. I think that would be really cool and a great thing for Instinct if there isn't already one.

Why I Should Be Accepted: I believe I should be accepted because I have been a gamer for as long as I can remember. It'd be a great opportunity to meet gamers who are just as enthused about gaming as me, if not more. I'd love to meet new people to game with, or even find new and fun games. I believe being accepted into this group, it'd be a stepping stone for me to meeting new people, and expanding my range of games. And not only would I be benefiting from being accepted into this group, I'd be more than happy to start doing giveaways and some other high quality threads!

Country of Residence:

Currently the country I live is the United States.

Gaming Platforms:

I'm more into the Microsoft platform, consoles such as:

*Xbox 360

*Xbox One

I do dabble with Playstation Network platform, consoles such as:

*Playstation 2

*Playstation 3

*Playstation 4

I have some other different platforms from Nintendo to others, such as:

*Nintendo Game Cube

*Nintendo 64

*DS Lite

*Gameboy Advance

*Atari

I have some older computer games as well, but I would rather not get into those, I will take several hours to do so.

Most-Played Game:

I was addicted to Halo 2 on the Microsoft platform until they had shut down the only servers. So I

usually play the campaign when I'm either bored or want to remember the good memories with the game. Now I mostly play Halo 3 on the Microsoft platform, it isn't as good as the previous version, but the gameplay is just as well.

Primary Genre:

I'm come from a newer age, don't get me wrong I love the Mario series but my favorite games have always been the fantasy and simulated war types. With that said I love the Halo series, with the great character dialogue and the detailed map structuring.

Why I Should Be Accepted:

I have been interested in games even at a very young age, the simulations are just very exciting to me. I'm a very active member on the forum, it may not seem that way though since I'm a newer member to the forum. I'm also a very friendly person and easy to get along with, especially when it comes to gaming. I have always saw this group, but I'm just realizing that it is based around gaming. If I would of known this earlier I would of applied. (even if I got denied)

Thank you for taking the time to read my application for Instinct.

PC only at the moment due to the fact my PS3 Broke...

-Most-Played Game-

My most played game would probably have to be minecraft. it wasnt my favorite game but i definitely spent the most time playing that game. I played it for 3 years pretty much and i've done everything with the game so it doesn't appeal as much to me as it did. Coming second would have to be a tie of GMOD and CS:S because i've played those games on and off my whole life. Then at

3rd and 4th it would have to be LoL and CS:GO.

Lately i've been playing alot of CS:GO because my favorite source server was finally shut down :c

-Primary Genre-

To be really blunt, i do not have a preferred genre. I like to play all sorts of different games. I dont think its the genre that matters its the actual game content :P You could a game and it would be shit than play another game of the same genre and it will be one of the best games you've played

-Why I Should Be Accepted-

Well long ago i was in the group respawn, back then i was actively giving to the community by doing giveaways, tutorials and just helping people in general but after that ended i kinda slowed down and started to chill out. I think that Instinct could give me the push i need to get back up and start doing these things again more often, it would definitely boost my activity as well. I also think it would be a great chance to meet alot of new people and have alot of fun working/playing with them. If i am accepted i can guarantee that i will take the group seriously, meaning i will stay active and post multiple times a day in the subsection as well as outside of the subsection. I've been pretty bored lately as i haven't been playing with friends just online randoms, i would love to play with anyone in instinct, i remember having community nights in respawn and i really miss having the chance to play with a bunch of people from the same group. I just want to say that gaming has had a big impact on my life, My whole life i can remember playing games because i started at an early age... 3. I can actually remember the first video game i played, Crash Bandicoot Warped 3. The game is still one of my favorites.

thanks

[img]http://gfx.net/images/2014/09/22/headerf72c0.png[/img] What's Your Username

My current username is Wizard, but I'm also known by the name Tedious.

Where Is Your Country of Residence:

I currently reside in the UK, England where I plan to spend the rest of my life.

Whats Your Current Gaming Platforms?: My current gaming platforms go as my Xbox One, Xbox 360, PlayStation 3 and my PC. My Xbox (both 360 & One) is what I spend most of my time on. The main reason on why I have a PlayStation 3 is because I have a lot of friends from HF in-which play on the PS3, so I can join in on their active sessions. I'm hoping Instinct will help grow my gaming friend base and I hope to meet some cool people to play with.

Whats Your Current Most-Played Game?: It goes without saying that the Call Of Duty series (Modern Warfare 1 & 2, Black Ops 1 & 2 and Ghost) is what I mainly spend my time playing. I have been a fan of the Call Of Duty series since Call Of Duty 2 was released in 2005. On the odd occasion, I'll be playing other games. These other games include Grand Theft Auto (San Andreas, GTA IV, GTA V and rarely GTA 3 on the PC), Halo series (ODST, Reach, Halo 4, Halo: Spartan Assault and Halo 5: Guardians), League Of Legends, World Of Warcraft, Day Z, Minecraft and FIFA (14 and 15).

Whats Your Primary Interested Genre?: I have always been a fan of First Person Shooter. As I stated above, I'm a big Call Of Duty enthusiast. That being said, I recently have been playing a lot of MOBA's (Multiplayer Online Battle Arena) such as League Of Legends. Last year was a big year for MMORPG's with me, such as Runescape, Tibia, World Of Warcraft, Rift and so forth.

I really enjoy First Person Shooters as there's plenty of styles of playing the game. Starting from playing competitive, playing in a clan or even just chilling with friends. Another thing I really enjoy about First Person Shooter's is the wide range of games that there are. Although I find the Call Of Duty series the best out of the bunch, but there is a huge collection of FPS's in-which players can choose from.

Why I Should Be Accepted to Instinct?: I could twist your leg on how I'm going to be the best player in this gaming sector and that I'm better than everyone else, but I won't lie. Although I can assure you one thing - gaming is not a hobby of mine, it's a lifelong passion. The amount of time I've spent throughout my life playing games is surreal, starting from saving the princess on Mario, to getting an awesome kill feed on Call Of Duty.

Activity is not a problem with me; you won't find a day where I'm offline. I currently work in a gaming store at my local town in-which I get discounts from in-store and online purchases (stated how it benefits the group and HF below). The income that I earn is what I'd like to propose to the group. From 2009-2011, I was a part of a successful gaming YouTube channel, a channel in-which done a lot of giveaways and competitions. I'd like to do this to the HF community on behalf of Instinct. I could very well provide:Discount Codes (I work

Written & Video Tutorials (We've all been confused on certain things at one point, so I'll be more than happy to provide tutorials to the members of Instinct to expand their knowledge of certain aspects of gaming).

Walkthroughs (It goes without saying that at one point on the game you're playing; you're bound to get stuck. That's why I'll be here to provide detailed and thorough walkthroughs to help you move on; doing so without spoiling anything).

Giveaways & Competitions (Whether the giveaway will include the giveaway of a game, XBL Gold Membership, money, custom controllers or even a console. I'd be obliged to host big winning giveaways on behalf of Instinct and even to group members on a monthly basis).

Thank you for reading, and good luck to any other applicants.
