Thread: [\[Release \] IP Tracer.](#)

Teruz14 - September 29, 2014, 12:13 pm

?

Hello Hackforums, Swagalistic Kat here.

I've been learning the basics of batch coding these few days. I've come up with a few basic programs for noobs / pro's the first ones

#Swag Of Death A.K.A ping of death im sure we all know what that does.

#IP Tracer Invented to do command ' Tracert / Pathping ' On the desired URL/IP.

#More updates to come.

I'll post links as soon as i get a few comments :)/code][i]/font]
