Hello guys.

This giveaway is basically to advertise some of the Hackforums themes that aren't as well known as they should be.

I'd like to clearly state I didn't make these themes, however if needed I do host the .css files (If any are required) for users.

You can get the themes here;
<http://#/HFThemes/>

Simply click the "Click here" button, and install the theme using either of the following Chrome/Firefox Plugins;

If you have any questions about/and/or how to use these scripts, feel free to PM me.

You're welcome.

Also if someone knows of any good themes which should be better known, drop me a PM with them & I will host them & add them to the list.

No they do not, I use HFES & the HF Chatbox plugin, none of these themes have ever disturbed those scripts (In my experience).

UPDATE: Pictures added at Nature's request.

~Sky ?Thanks, the themes are very good!

By the way, do you know where to get the HF Chatbox Plugin and is there an option to add HackForums Logo on the Midnight Theme?

Thanks.
