Thread: [Celebrating 1 year of Internet Marketing, over \\$30,000](#)

Marko - September 30, 2014, 8:54 am

30 September 2013 was the first day I launched my niche site that I've been working for a lot. It is a great niche it ranked on no.1 on Google. And so far one year have passed and it made me more than \$30,000 :). All white hat. I get over 30,000 french visitors a month. But I have a really bad epc because of the niche. It's whitehat so the epc isn't \$1-\$0.80 but \$0.10 :).

Most of you might think, well good for you almost everyone here makes that much a year from IM.

Well for me it's very important that I've made that much money, why? Because I live in a third-world country. Where the average salary is \$330 monthly. I make more than \$2,300 monthly and I am 18 years old :). To put this in perspective, imagine you make 7x the average salary in the US, making something like \$490,000 yearly? Wouldn't that make your parents proud?

Well and after a year the site still rocks on. Currently of those \$30,000 I have:

- *Saved more than \$10,000 in reserve (just in case savings)

- *Paid all my dad's debt including my collage debt (\$400 yearly)

- *I pay half of my house bills (water electrical etc) even if my dad simply doesn't want me to spend money on that, he says he should pay that, not me.

- *Bought a car:

Bought some computer parts, spend some money on other stuff and so on.

It was hard to convince my parents that I make these money legally as they don't know shit about computers. But anyways my parents are so proud.

So now my goal is to make 2-3 new websites that can make even more. And invest more.

I currently don't have any debts 0 debts, own my own car, have over \$10,000 in savings, and I am spending around \$300 monthly (gas food clothes etc)

Just a simple brag :).

What country are you from though?

Congratulations, I'm proud off you to! You did good bro keep it up.

Anabolic - September 30, 2014, 9:34 am

That's brilliant, it really is. I don't think there are many people at all on this forum who make that kind of money, let alone people your age making that kind of money. It's a remarkable achievement for sure and I'm glad that your parents are proud of you because any parent should be. Congratulations on actually doing something with your life, unlike most our age. ?

Meow - September 30, 2014, 9:36 am

I remember seeing you wanting to get into Internet Marketing, then you got the first 200 dollar payment I believe and you were explaining how it's a lot in your country. I've been keeping an eye on your progress, that's grade A man. I'm glad HF is enabling people to actually make a living. Now if only I could do the same as you have done haha. Seriously though Marko congrats. Your one of the few people I can verify has taken the time to actually learn the shit and go through it rather than leeching off others.

Thanks for the support, I am now thinking of investing more in new websites and improving the one I have. Of all the money I earn I spend like 5% only :)

If you need any help with anything just shoot me a PM and I'll explain to you how stuff works :D

12Row - October 17, 2014, 12:38 pm

MysticParadox - October 18, 2014, 6:40 pm

What model is that? I think my family and I just got that same exact model except in blue with ~50k miles from 2005 for only \$15k.

WornCarSeat - October 19, 2014, 2:40 am

Really nice, good luck on future projects, I like this BMW E46 :)

E46 316i (this model is not sold in the US) 2004 with 65k miles :) I paid mine like \$8k-\$7k. They cost here a lot less than in the US. This is I guess the best car I ever driven, my dad has a hatchback from 2013 and my bimmer still rides smoother :D.
