Thread: [CoinPayments.net OMC Explorer Launched](#)

cycloid - September 30, 2014, 8:31 pm

Hi There,

I am speaking on behalf of [CoinPayments.net](#)

We just launched OmniCoin Block Explorer and hope you guys enjoy using it and spread the word about our service.

[OMNICOIN EXPLORER](#)

Note:

Our block explorer's search function, automatically detects which coin you are looking up from the list of coins supported by explorer.

Eventually we will launch explorers for all CoinPayments supported coins and integrate search right in to home page.

Hopefully you find it useful and feel free to link to it.

Alex. Alexandrov

That is great news. Glad to see some progress in the currency.

Impervious. - September 30, 2014, 8:35 pm

I like this announcement. It looks nice, might use it in the future for other coins as well.

Indeed good to hear news around omnicoin again.

Aceman - October 1, 2014, 6:32 am

Thank you very much for the block explorer incorporation into your website. It is greatly appreciated. ?

w34k - October 1, 2014, 6:52 am

I'm sure this will help a lot of people. Nice work and thank you for the share. ?

Aceman - October 1, 2014, 3:42 pm

If you could post a link to somewhere on the website where they list this address I would be happy to donate. While I am very grateful of everything CoinPayments is doing we don't really have any proof that you are affiliated with them. I'd just like to see somewhere where they mention a faucet and the address. If you can do that I'll send a couple thousand right now.

100% Understand the concern! Main site reflecting updates as of now, we also added "Faucet" links to all explorer supported coins and donation addresses below on each page.

We want to be transparent in every way and as useful to the community as we can be.

[CoinPayments Block Explorers & Faucets](#)

Thank you for the donation pledge we defiantly need communities of supported coins to help fill those up.

To avoid ? cheating :

Limits to 1 payout per 24 hours by IP/address/email (if any of them match it counts)

Then it has 2 captchas

An email confirmation.

Fantastic! Thank you for the link and the update. I'm glad to hear you guys are being so transparent about it. I truly think what you're doing will benefit OMC which is why I donated 2k to it. I'll speak to the devs about this, they may be willing to contribute as well.

SIM-2015410 - October 1, 2014, 6:18 pm

This is great news. It is really good to see omnicoin expanding.

I have updated the official wiki with links to your Faucet and Block explorer:

<https://github.com/Omnicoi-Project/Omnicoi/wiki/Pools,-Faucets,-Online-Wallets-and-Tools>

By the way, this should really be in the omnicoin subsection ?

Thank you :)

First time using this forum and was not sure about the appropriate subsection.

Admin, if you can move us to correct place that would be much appreciated. ?

Oh this is great. That's pretty cool. Props and thanks.

SIM-2090815 - October 2, 2014, 7:53 am

One of your first posts and a reply from Omni, nice :P

Crypto™ - October 3, 2014, 1:00 am

Glad to see this! Feel free to PM myself, or anyone on the team for information or anything! :)

cycloid - October 5, 2014, 10:54 am

Hi, not sure it is related to Explorer but some of you might find it interesting.

We rolled out Zero-Confirms Plugins for Digital Download and WooCommerce, Perfect for Instant Checkout, but with higher Risk.

Updated plugins which include "zero-confirmation" options in control panel found here : [Merchant Tools](#)

This will work on secondary IPN pushing order's complete status the moment coins hit the blockchain, but before full confirmation. This is great for services like digital download, music, ebook, prOn & private membership access sites. Basically everything where buyers dont want to wait 30minutes to get in.

I would personally use it on pretty much any service under \$100, as you still get notification if double spend is detected or transaction is reversed by the network. The idea here is to speed up buyers experience by 20-45 minutes. In reality that is all the time they get if something to go wrong with payment, so plan accordingly.

We do not cover losses as this is a High Risk Plugin, but to anyone understanding crypto this could be a powerful tool :)

Kind Regards

Alex Alexandrov

Hey everyone,

We changed our Extended Validation Certificate to Digicert.com

You should now see it active on all our domains.

Also we are now the third website on the planet after facebook and blockchain to receive an official SSL Certificate for our .onion site.

Url can be found at the bottom of our main page under "Official Tor URL" in the footer.

[Coinpayments Official Domain](#)

Worth noting we are the First in the Wold payment processor to offer protection from Rogue Tor node attacks to our customers with proper SSL certificate.
