I was just wondering what "fake webcams" you guys are using?

I can't seem to find a free full-version of many cam..

I started e-whoring today and actually scammed 2 guys with the huge ManyCam logo hahah..

Please PM a link if you know anything good! ?

Why do you want a free full version of ManyCam? Just download a manycam from a few years back and you'll have a lot more features than what the updated ones are like.

I don't eWhore at all, but I'd recommend you get a free vcw, and with your profits buy a good unsaturated pack on here.?
