Thread: [\[TuT\] ? ULTIMATE KEYLOGGER/RAT SPREADING GUIDE! ? - TOP METHODS ?](#)

Ted - May 29, 2010, 5:07 am

TED'S SPREADING GUIDE

Hello all from HF! I thought I'd make a tutorial today showing you all the best and easiest spreading methods out there! Before I begin, I would just like to make something clear

I do not hold accountable for any actions people take after reading this. I wrote this guide for educational purposes only and am not responsible for any illegal actions people take.

I may have -3 rep but that is entirely because of 1 immature person, who didn't believe that my friend had died from throat cancer, had got very cranky and done what I call "rep abuse".

The other -rep is because I used to have an animated gif signature of an animated man falling from a building. I have learned that it is not entirely what everybody wanted to see, so I changed it. At least one person found it funny (thanks Teh). Hopefully I can gain more support from this guide! :)

So let us start on spreading now. There are a lot of ways to spread your malicious software on the internet, some can even earn you money! Here are the top 4 methods

1. Fake Programs + Youtube (Press Ctrl-F and search for "str1" without the quotes)
2. Hyperlinks (Very similar to a drive-by. I will explain. Ctrl-F for "str2")
3. Skid Exploiting (Ctrl-F for "str3")
4. Limewire (go to "str4")

str1. Fake programs + Youtube - My best method!

For this you will require some decent programming knowledge and some imagination. I find this the best method of spreading, because it has got me over 50 infections a month. Make a fake program in Microsoft Visual Studio 2008 or download one. Use a programming language of your choice (I use Visual Basic). Make it an "Ultimate Password Stealer Gold Edition" or something like that which will get lots of hits. Make sure it always says that the "hack" was successful! If you like, you can make it a phisher but I cannot tell you how to do that on Hackforums. So once you have made your fake program. Get a screen capture software and a Video editing software. Try not to use Windows Movie Maker as it makes you look amateur. When you have got them, make a fake readme file for your fake program and put them in a zipped folder. It helps to also make a folder full of random fake "data files" such as methods.data (Just go into notepad and save anything as a .data file.) Then add that to your zipped folder. Now, Don't worry about your keylogger/RAT yet. You want to record a video of you unzipping the file and opening your fake program and using it. If your fake program requires the users password for whatever reason, be sure to censor it out if it isn't all ready, in your editing software. This encourage your viewers that you are putting your real account into the fake software. Then show an example at the end of the facebook account you "hacked" or whatever. Now edit the video to make it look nice and upload it to youtube. DO NOT WORRY ABOUT YOUR MALWARE YET. JUST USE THE DOWNLOAD LINK FOR YOUR FAKE PROGRAM! Be sure to be punctual in your video's description. You can find file hosting for free at <http://www.mediafire.com/> . So now you should make some more youtube account and comment on them saying things like "Wow it works". Then click the "share" button below the video on your main account, then click "Email" and choose which friends you want to send the video to. Delete the negative comments you get and you will be fine. After your video reaches about 200-500 views (this may take 1-2 weeks depending on how well you shared it) you should add an annotation to the beginning of your video

saying that "Because of many sites blocking this type of hack, you now have to download the framework before running this. Please look in the description.". Heres the tricky part! Make a batch file with this code: <http://pastebin.com/fFeb5Xtg>

This is a kill Anti-Virus script. DO NOT RUN THIS! You need to call it "click here to install delphi framework". After you have zipped up your "Framework" and uploaded it to mediafire you go to your zipped folder with your fake program in it and change the fake program to your keylogger/rat. Reupload it. Now change your youtube videos description to "download this framework FIRST <insertlink> Then download the program <insertlink> double click on framework to install it". Then sit back and watch the effect. You should get your first victim within 3 days and then as the views increase you will get more and more victims daily! Here is my video example!

<http://www.youtube.com/watch?v=ZXENOVxfDQk>

As for money making, you can use linkbucks on your links or sharecash!

str2. Hyperlinks

Ahh, Hyperlinks! How great they can be when it comes to spreading! In this section you may need some experience in flash but it can always be done without flash. First make an account on <http://bit.ly> [WARNING: potentially infected]/mxsAb (I had to change the link to avoid the HF spam filter) and upload your malware to the my files section. Now, whats great about r1pway is that you can make html documents right from it. It's quite awesome but in this guide we are just going to be uploading html documents. Now you have to Make an swf movie of the my computer screen saying "virus detected by the C:\ drive, This is an old well known trick in the history of malware.

Here's an example. Please be aware THIS SITE IS DANGEROUS IF YOU ALLOW THE DOWNLOAD TO OCCUR It was made by some russian guy and NOT by me. The download on it is an EXTREMELY dangerous Rouge antivirus, accompanied with a virus toolbar known as the zlob trojan. Please visit this site at your own risk because I do not know if it contains drive-bys or not. But from my experience, you have to allow activex controll to download if you want to be infected. This site will not load in google chrome. Info on the zlob trojan can be found at

http://en.wikipedia.org/wiki/Zlob_trojan

Spoiler ([Click to View](#))[Example Site](#)

Anyways, now that you've had a good look at that. You will see it is a flash movie. With a hyperlink attached to the "Remove All" button. Now once you make your flash movie add it to a html document in adobe dreamweaver or microsoft office and add a button over the "remove viruses" button in the flash movie. Go to your r1pway download for your malware and add the hyperlink for that download to the button. Now save the html document and upload it to r1pway like you did with your malware. Go to <http://bit.ly> [WARNING: potentially infected]/ and change the link for your html document to something more sexy and volia! You've just made another way of spreading. Send your bit.ly [WARNING: potentially infected] link to your victims. Or you can add a CPAlead survey to the page to make money!

str3. Skid Exploiting

This is a very cruel but working method, and in some cases you will think that your victim deserved to be infected. First let me explain about Skids. Skids are Script Kiddies. Aged around 10-14, They like to take source code, compile it and tell all of their friends that they are leet hackers. They also tend to spread on Hackforums (which is retarded) and normally end up getting caught. They will scan keylogger builders on VirusTotal, ruining the coders work and laugh about it. On hackforums there is usually a -19 at the top of their posts. This is how script kiddies are in general, but from my experience, there are 3 different types of script kiddies: The fake virus skid

The find and leave skid

The forums skid

Fake virus skids usually find out how to make message boxes in vbs and start showing them to

their school mates on a usb stick. They also copy batch codes and claim that they also made them. They will spend hours on youtube searching for "Fake Viruses" and will name the batch files (or whatever they copy) things like "Shutdown Trojan VIRUS" or "Super Virus" even though they are merely making messageboxes. I once found a usb stick left in a year 7 ICT classroom and took it. When I opened it I noticed there was a folder called "Viruses" Inside it were a load of copied, one-line vbs codes to make iconless messageboxes appear such as

Code lol=msgbox("this is a virus and now u will die",0,"haha") They had names such as "Dont click here" or "Deadly Virus" so yeah, you can imagine I was laughing my brains out.

Find and leave skids are f*cking annoying, it is the find and leave skids that we will be infecting in this guide! Find and leave skids are normally aged 10-12 and spend their time searching youtube for "Hacking Tools". They have no intention of actually learning to hack, or joining a forum, they just want to hack ONE person and then they're done. I bet there is nobody on this forum who spent ages learning just to get one facebook password. Anyway, The most annoying thing about the find and leave skid is that They do eventually come across a RAT or Keylogger TUT on youtube. They will instantly go and download it, then set it up incorrectly and start messing up completely. They will start screaming and running to their mothers when their AV detects the builder OR even the keylogger they just made themselves. From My experiences, I have spied on a few RAT victims and seen one of them open Brutus and enter somebodys email address into the "Upload Passwords File" textbox. How retarded can that get? Another person downloaded teamviewer and started crying on webcam when AVG Antivirus Resident shield recognised it as a threat. He started running Ccleaner, Malwarebytes and ESET online scan all at once just because he didn't know anything about RATS. Basicly, Find and leave skids don't know enough knowledge to hack and mess up on real hacking tools. They use youtube as their source for info, but sadly, its not enough.

Forum skids are basicly what you find crawling around on HF. They are not as stupid as the other 2 kinds but still quite. They take source and modify the GUI's, ect. They leak threads from other forums without putting credit.

Now what we are going to do is simple. Simply Bind a real keylogger builder with a RAT :D and put a video up onto youtube saying. Cybergate RAT with all the right info. When a script kiddie learns what a RAT is, he will search youtube for it and will take your video as a professional hacking tutorial. Or you can even get a RAT victim from a previous method, (and trust me, they will come across rats eventually) when they do, close their window in their web browser and open up your video. Without taking control of their mouse. In Cybergate there is a feature called "Open Web Page in browser". Use the "Framework" Kill Av script I showed you in str1. So, this process is quite simple; When the time comes, why not recommend a well known RAT to your Skiddie Friend?

str4. Limewire!

This is simple. Bind a rat with a music file or porn video. Something that will be downloaded on Limewire. Try to use new songs or movies that are long out of the cinema but still not on DVD yet.

So I hope you enjoyed my guide! Have fun spreading?

PS. Static FBML works well to but I won't go into that in this thread.

Please can you post after you have read this, because It took AGES to type this and now it is just going to end up on page 40 of this forum ;(

texeon - May 29, 2010, 5:13 am

Looks great, and good to see a new member contributing, Great guide, if i wasn't on my mums computer right now, I would favourite it, but as I don not want to get caught, i'll look it up later.

Good Job!

Ted - May 29, 2010, 5:18 am

(May 29, 2010 05:13 AM)texeon Wrote: [CITE](#) Looks great, and good to see a new member contributing, Great guide, if i wasn't on my mums computer right now, I would favourite it, but as I don not want to get caught, i'll look it up later.

Good Job!

Thanks! Come on!! More views please

shockz - May 29, 2010, 5:57 am

Nice looks good just get this finished asap i want to look at str5 :P

Ted - May 29, 2010, 8:59 am

(May 29, 2010 05:57 AM)shockz Wrote: [\[CITE\]](#) Nice looks good just get this finished asap i want to look at str5 :P

So what? So you can infect other Hackforums members and be like all the other people you have ripped. By the looks of your reputation you do not seem to understand the NO SCAMMING rule and you have upset a lot of people

Come on? Anybody? It took AGES to write this :(

mehaxdi5w0rld - May 30, 2010, 4:10 am

Great TuT. The hyperlinks method sounds like an epic idea!

crawl7 - May 30, 2010, 4:32 am

You will get like only 10-20 victims per/day ...

Forex - May 30, 2010, 5:56 am

thats a nice amount of victims

especially if you choose run on startup

Green Arrow - May 30, 2010, 5:58 am

nice tut, but how do you put stuff on limewire 0.0

T3rabyt3 - May 30, 2010, 10:01 pm

Awesome tutorial, thanks for posting.

Enter Shikari - *May 30, 2010, 10:05 pm*

Don't forget Omegle (as I'm doing now) pretend you're a chick and post a link to a "slideshow" .exe file and you're good.

av3ng3dwarri0r - May 31, 2010, 12:38 am

good tutorial man! im gonna have to look into that russian trojan now!

bhkfsq - May 31, 2010, 12:49 am

Nice tutorial. Good job :-):-):-):-):)

kakemonster - May 31, 2010, 3:46 am

thanks, great tut. I'll comment positive on your video =D

Sweatybtard - June 2, 2010, 1:05 pm

W00t tyvm. I got mah infectionz!

nak15 - June 2, 2010, 2:37 pm

Nice,

I used the youtube one on 5/29/2010, with a dns spoof at a hotel.
The fake program was free \$20 when staying at holiday inn.

21 people downloaded it, but only 7 where from hotel.
And only 16 successful live victims.
I need a new crypter, anyone know of any?

Ted - June 3, 2010, 10:48 am

Don't crypt, it always needs updating. I just make them kill their own anti-virus! Make a batch file claiming it's "Framework".

Impulseee - June 3, 2010, 12:20 pm

Thanks for this bro, I'll be sure to use this.

KryG - June 3, 2010, 12:30 pm

Awhhhh man i dont got my rat with me atm D:

Ted - June 3, 2010, 12:42 pm

(Jun 3, 2010 12:20 PM)Roro Wrote: [\[CITE\]](#) Thanks for this bro, I'll be sure to use this.

Are you spamming?

To short

SryIPwnedU - June 3, 2010, 1:11 pm

Sweet tutorial dude.

I'll try this out as soon as my RAT gets crypted...

SIM-119661 - June 3, 2010, 1:13 pm

This is actually a very good tutorial thanks alot :D If i could i had make a + rep

Impulseee - June 3, 2010, 1:23 pm

(Jun 3, 2010 12:42 PM)Ted Wrote: [\[CITE\]](#) Are you spamming?

To short

Am I spamming?

Why would be asking me that, I thanked you for your efforts.

Your post would be considered spam since you responded with a post that was too short.

Valour - June 3, 2010, 1:28 pm

Awesome post..

thanks..

will help me for sure

m0nk3y - June 3, 2010, 1:32 pm

I am proud to be a forums skid. though i don't release it to the world(because that is sooo stupid), plus i make source modifications and use snips to use in other products. Plus i use to learn how its made, how the thing is coded and how i can use this in my OWN application (Or make it better =D). though, i admit i am a forum skid.

Liked - June 3, 2010, 3:28 pm

I dont want it to go to page 40 :(

Sweatybtard - June 8, 2010, 8:40 am

did I just double post :L

avidhacker - June 8, 2010, 8:47 am

nice tut will come in handy

iPwnage - June 8, 2010, 9:31 am

Nice tut... another really good way to spread is through omegle or teenchat, pretending to give pics.

Ted - June 8, 2010, 11:10 am

(Jun 8, 2010 09:31 AM)iPwnage Wrote: [\[CITE\]](#) Nice tut... another really good way to spread is through omegle or teenchat, pretending to give pics.

That never works for me :P They just want cam sex!

mehaxdi5w0rld - June 10, 2010, 8:43 am

Lol wut, Framework ftw!!!

KryG - June 10, 2010, 4:28 pm

Youtube is boss!

actually the best way i think :D

Dykersoft - June 10, 2010, 4:41 pm

Awesome guide.

I had thought of using these methods before,
but this just made it a lot easier to put together.

Nice work.

Ted - June 11, 2010, 11:38 am

Thank you all for your feedback!

Jackal King - June 11, 2010, 12:42 pm

Seriously nice tutorial, and i laughed so hard at the skid exploiting section. Great Job! ?
(off-topic) Btw, the quote in your sig is AWESOME

ramprasad - June 11, 2010, 3:21 pm

nice clear tutorial about spreading ,thanks dude

Saustin - June 14, 2010, 4:43 am

Some asshole infected me with their own copy of Zlob (brother, but he never says shit) and... Well... IT'S A IMMENSE pain to remove! Reformated, switched to linux till win7 came out.

Anyway, nice tutorial, glad to see an old tutorial unlike all the other flaming copied rep grabbing

pieces of crap you see 'round here.
A+

dr0wsy - June 16, 2010, 10:58 am

Very good guide.
Helped me alot :D

tyler179898 - June 16, 2010, 11:38 am

What a great TuT. I never thoguht about the whole Framework thing. thats a great idea. Youtube
Here i come!

humble55 - June 16, 2010, 11:47 am

Thx you its usefull
bye thank for posting.

hackerdz - June 16, 2010, 4:57 pm

thanksmys friend forthis informations

Oreos - June 16, 2010, 6:49 pm

love this dude. gotta bump it up so others see it.
thanks for a great post ?

Ted - June 19, 2010, 5:31 am

Hmm..I still have 1 word to say
Spoiler [\(Click to View\)](#) bump

`00Synch_ - June 19, 2010, 5:38 am

Great TuT. I definitely agree on your views about skids. There are many people like that these days, and you can either prove them wrong, or watch them get caught and fall. Torrenting, and other P2P spreading methods are also good. I know you mentioned lime wire, which I thought was a great tip, because people go crazy over a free popular song.

King - June 22, 2010, 6:46 pm

Great contribution mate , keep it up :D

HACK3R9 - August 9, 2010, 3:52 pm

Cheers, great methods!! (Msg Too Short)

CleX - August 9, 2010, 4:39 pm

An awesome tutorial thank you bro hope 2u all the best

nsblackdevil - September 14, 2010, 7:51 am

great tut, thanks for all the effort.

Vladimir_332 - September 21, 2010, 2:09 pm

Thanks bud will use some of your techniques for my spreading as well ^^

Jesta - September 21, 2010, 4:42 pm

The Limewire trick work's amazingly

b-ball-1 - September 21, 2010, 4:47 pm

Nice Tutorial, thanks for writing it

jadoskills - September 21, 2010, 6:12 pm

Nice tutorial , good job keep it up , very nice :)

livonia2007 - September 21, 2010, 6:41 pm

Thanks for taking the time to share your experience!

dragonrider1806 - September 22, 2010, 5:32 am

thx ... nice TUT and it was helpfull !:D

Professor - September 22, 2010, 9:05 am

Thanks, I'll use the limewire method, quite often! :3

Galaxy Wave - September 22, 2010, 9:23 am

Very Very Nice tutu thanks for this.

Ted - September 23, 2010, 8:27 am

(Sep 22, 2010 05:32 AM)dragonrider1806 Wrote: [\[CITE\]](#) thx ... nice TUT and it was helpfull !:D
You're not spamming are you?

Manwë - September 23, 2010, 11:18 am

Thanks alot for taking your time to write this.

I hope I can use it when I get my port forwarded for RAtIng.

netw0rk tr0jan - September 23, 2010, 11:33 am

Great TuT. The hyperlinks method sounds great

Fern™ - September 24, 2010, 6:58 pm

Great tut, thanks for posting. :D

Jal knight - October 2, 2010, 12:07 pm

Wow, Good job man. Great tut.

saveursocks123 - October 3, 2010, 12:53 am

Nice post. Great info on 5 different ways to spread. I like the Limewire one.

CursedPX - October 5, 2010, 9:17 am

Awesome TuT.

Thanks 4 sharing ;)

bzarccc - October 5, 2010, 9:57 am

how i can hack password in facebook, yahoo and hotmail..please teach me

dwarf - October 5, 2010, 12:32 pm

thanks for the methods, you should have done torrents too imo, but thanks anyway!

?????.??? - October 5, 2010, 12:59 pm

thanks a lot this is vry good thread

invalidtarget - October 5, 2010, 4:02 pm

lol @ how there's always someone asking "can you teach me -insert unrelated topic here-" in good tuts.

Great tut, lots of basics are covered here :)

Foxaris - October 5, 2010, 4:19 pm

(May 30, 2010 04:32 AM)crawl7 Wrote: [\[CITE\]](#) You will get like only 10-20 victims per/day ... its decent tho, builds up over time. but it depends what u need the bots for. 10-20 wud be good for me.

Chuckles2010 - October 5, 2010, 7:48 pm

Awesome tut, easy to learn and worked perfectly.

Syntic - October 5, 2010, 7:58 pm

Bookmarked ! Ima look over it if I have time ! Keep up the good work !

NEW KID ON THE BLOCK - October 5, 2010, 10:36 pm

Whao super great tutorial mate i love you!!

silverfrancis - October 5, 2010, 10:58 pm

Great tutorial and very informative.

Now it is time to exploit some script kiddies on youtube!?

Itzah - October 7, 2010, 6:57 pm

very detailed i like it, thanks for sharing it.

ppparticles - October 8, 2010, 11:13 pm

Awesome post! Thanks for providing this as it was informative yet amusing.

malone - October 9, 2010, 4:30 am

Nice tutorial, thanks for your thread

[??????](#)

[??????](#)

Account Closed - October 9, 2010, 11:53 am

Hey nice tut man i jus read that all and it took like 10 min haha.
good job tho (:

KLDM - October 10, 2010, 3:29 am

very very good job man, i like

Ghost Hack?r - October 10, 2010, 4:44 am

You know that the skidz can actually now know about the type 3 of your spreading.
Thats disgusting.

Araw - October 10, 2010, 5:34 am

Quick question:

I'm using a binder (Shockwaves File Binder) that can bind exe-files with images, songs or other exe-files.

But the output file will still be a exe-file anyway.

If I share this file on Limewire and renaming the file to Artisname - Songname. Are there really so dumb persons that will download it when it stands .exe behind the filename? :S

Don't see how I can spread it on Limewire when all file outputs will be .exe

ZeeBeast - October 10, 2010, 11:39 am

To infect People I just use like Runescape Duper etc and i keylogge it and i make a fake vid but on a privates erver to proove it and it gets belivers xD

The W3 - October 12, 2010, 9:26 pm

Nice guide, but its kind of mean infecting skids...

devnull - October 13, 2010, 7:28 pm

thanks for the share dude :)

Kwizzy. - October 14, 2010, 7:48 pm

Thanks I might try this tomorrow.

Glory - November 6, 2010, 4:28 pm

This definitely deserved this ...

Malitastic - November 6, 2010, 4:55 pm

Fantastic guide, very detailed. Glad to see people putting time and effort into tutorials instead of writing "This is what you do: end of".

IVludKipz - November 13, 2010, 6:43 am

Awesome guide loved it :D should help a lot of people out.

Travis202010 - December 3, 2010, 1:25 am

Just joint today, the only reason is cause i got hacked on Gamebattles an i got a bunch of loses cause he gave himself free wins an i wanted to get this random kid back, but i have no skill for this kind of stuff. So if any of you yall are feeling dirty an want to help me out an give me this kids password that would be great. This is his main page on Gamebattles.

<http://gamebattles.com/profile/apksnipers>

if you could help me out that be awsome.

Ted - December 4, 2010, 12:52 am

(Dec 3, 2010 02:25 AM)Travis202010 Wrote: [\[CITE\]](#) Just joint today, the only reason is cause i got hacked on Gamebattles an i got a bunch of loses cause he gave himself free wins an i wanted to get this random kid back, but i have no skill for this kind of stuff. Nobody wants to help you if you can't use grammar or spell properly. Also hacking doesn't work like how you think it does. There is no magic program or site where you can instantly hack.

harris21 - February 3, 2011, 2:56 pm

nice share dude...keep hacking :))))

AppleCrack - February 3, 2011, 3:24 pm

Ashamed to say that im a skid, but i dont relate to any of your examples. I am trying to learn how to hack, but sometimes i get caught up in personal problems and cant make my own RAT in the 10 mins i have to have someone dl something. Good guide, will bookmark it for the future.

Dark Cap - February 3, 2011, 3:52 pm

Not going to lie, this was a great tutorial, but i am slightly offended because im 14 and i am NOT what you said 14 yr old hackers are? no offense intended, happy hacking?

Indigent - February 3, 2011, 6:29 pm

I enjoyed the find and leave skid section :D

Imm?rtal - February 3, 2011, 8:13 pm

Nice tutorial m8 helped me

Xenomorph™ - February 3, 2011, 10:08 pm

i cannot believe i was like that 2 years ago... but since then i have learned more, and now i hate those little fuckers. nice tut by the way ?

doutry - February 9, 2011, 10:10 pm

(Dec 4, 2010 01:52 AM)Ted Wrote: [\[CITE\]](#) Nobody wants to help you if you can't use grammar or spell properly. Also hacking doesn't work like how you think it does. There is no magic program or site where you can instantly hack.

its sad that a few years ago when i was learning about hacking thats what i really thought happened. that you could get someones ip and insta hack them haha... since then ive taken c#/java/html classes in 2 years(teacher was a bad ass)

and actually got more serious into hacking. im still new i consider myself but i know alot haha. its awesome.

p.s guy hacked my account on this game :(please hack him!!! his name is.... hahahahahaha. glad i never begged like that.

RyannMay15 - February 10, 2011, 12:46 am

Thanks man, i especially like the hyperlink way. But how come we cannot talk about phishing on hackforums?

hemescool - February 10, 2011, 1:20 am

Great tutorial bro :)

Thanks

KillYou! - February 10, 2011, 4:58 am

Great methods thanks very much!

Chris.. - February 10, 2011, 6:54 am

Nice tutorial man will help alot of users out in there quest.

Good Job.

bredsticks - February 10, 2011, 10:31 am

I personally use YouTube too.. It allows spreading while you are sleeping. Thanks for the kill ani virus script

Root - February 10, 2011, 10:33 pm

thanks i might try some of these

doutry - February 12, 2011, 3:28 pm

will the kill av script kill the avg firewall aswell?

tormenter54 - February 12, 2011, 3:39 pm

good tut man, really helpful thanks

D?V?? - February 12, 2011, 8:43 pm

Sweet thanks dude! great ways im gonna try em

koolmoedee1000 - February 12, 2011, 9:12 pm

fantastic tutorial i love the youtube method and your explanation of the skids

Volgare - February 12, 2011, 9:57 pm

I like your definition on script kiddies XD.

ds321 - February 12, 2011, 10:31 pm

nice guide. going to try some in future :D

Must - February 26, 2011, 9:04 am

Great tutorial ! Thanks for this

j337 - March 2, 2011, 4:40 pm

cheers dude :D will definitely be using this next time i need some slaves :D great tut

musculaire - March 5, 2011, 8:40 pm

This is the only guide that I found that could actually help me with making a fake youtube video, thank you.

Shad0w_St3p - March 6, 2011, 1:38 am

very good guide, I will use this for youtube :)

Mr.Feelgood - March 6, 2011, 2:17 am

Great tut bro! Time well spent, coz this is awesome!

Spirit Dracul - March 10, 2011, 1:51 am

This was an excellent tutorial. Thanks mate.

SIM-135152 - March 10, 2011, 3:04 am

Well explained and great looking.

Thanks for sharing.

Mr.thinker - March 21, 2011, 1:29 am

thats a nice amount of victims

ghost_rider - March 23, 2011, 6:40 pm

nice tut.

still learning....

asian@sabertooth - March 23, 2011, 10:33 pm

nice work mate! i've -3 rep but have no idea why..

jorjus - March 24, 2011, 3:05 am

awsome tutorial, thanks for posting.

HaXd - March 29, 2011, 3:55 pm

I like these methods a lot! Good job typing all of this up, because to me, this is pure gold. I knew most of this already, but I think it's great to help the community with these tips. Thanks a whole lot!

†gRiFFint† - April 13, 2011, 2:59 am

heey nice tut but, about that .Bat kill anti-virus script if heard that is not possible to kill/turn off a anti virus with Hacks/rat's/.bat etc.

well correct me if im wrong

cheers up.

Evil Genius - April 30, 2011, 10:26 pm

Nice i look forward to trying this out.

Threadlocks - April 30, 2011, 11:12 pm

WOW Nice Guide dude! This will really help people.

N3me\$!s - April 30, 2011, 11:40 pm

Awesome tutorial, thanks for posting.

paganxxxpride - June 23, 2011, 9:09 pm

looks great! I was laughing my ass off when you were talking about skids I have came accrossed so many of them. I cant help but to laugh at them when they think they are soo l33t because they downloaded VB 10 and stole a code off the internet for a msgbox popup and compiled a fake msgbox "virus".

I cant wait to infect some skids. Thanx for taking the time to make this thread. You can tell you spent a good amount of time on this.

Thanx for your contribution.

HACKUNIT - June 23, 2011, 10:13 pm

I'm to tired to read this right now so I bookmarked it, thanks for the share.

paganxxxpride - June 24, 2011, 2:33 pm

nice tutorial. thanx bro. veary usfull.

paganxxxpride - June 24, 2011, 2:33 pm

good contribution. I'm going to strart spreading today.

slimshadylover - June 25, 2011, 8:22 pm

Hey i just had a quick question, if i use a .bat to .exe converter and convert the "framework" batch code into an executable file will it work just the same? thanks!

FaDe Reload - June 25, 2011, 8:24 pm

looks good ill try this asap

wanna booter - June 25, 2011, 9:41 pm

This is a very good tut keep up the good work!!

chris.z28rx7 - June 25, 2011, 10:03 pm

Great tutorial man, I'm going to try that Limwire method soon.

charlie3478 - June 25, 2011, 10:58 pm

im a n00b and i really liked this thread, anyway you would be interested in helping me get better at understanding keylogs and such? pm me if soooo:)

but my point, this is a really good TUT

stdio - July 13, 2011, 8:41 am

nice to read all this..!! though most of the methods you mentioned are for beginners.. anyways great effort..!! i liked it.. =) thanks

Vats - July 27, 2011, 5:33 am

Hey bro this is really awesome piece of writing!!!
Its great to have guys like u on HF
:)

abyssal who - July 29, 2011, 12:43 am

lol at how half of the thread was about skids ;D
oh well, made me lol. nice job :D

tomtom1996 - July 29, 2011, 8:47 am

VERY Good TuT nice done DuDe :D

SIM-574702 - January 21, 2012, 5:38 am

nice thread, I found it accidently but it has nice spreading techniques.

P.S it doesn't deserve to be on page 40

JediNutSack - January 21, 2012, 12:11 pm

im going to use the youtube method bro.
I just need a website to upload my RATS that doesnt check for viruses.

m-xox - January 21, 2012, 1:59 pm

Great guide . and Awesome tutorial, thanks for posting

SkySpy - January 22, 2012, 1:27 am

thanks for sharing! lots of useful info in your tut!!

cheers mate!

Sunk - January 28, 2012, 2:16 pm

Very good and detailed guide. Thanks allot for writing and posting it.

biohazardhosting - January 28, 2012, 8:21 pm

method of spreading is nt bad its good.

thank you dude :)

Frowdoo - February 11, 2012, 2:39 pm

if you bind the file will antiviruses detect it ? (for the like frostwire or limewire)

James Kirk - February 11, 2012, 4:27 pm

(Feb 11, 2012 03:39 PM)Frowdoo Wrote: [\[CITE\]](#) if you bind the file will antiviruses detect it ? (for the like frostwire or limewire)

Yes binding does not affect antivirus detection, I would recommend getting a crypter, chrome crypter is a good, free crypter. Very HQ guide, got me my first slaves when I first starting RATting :)

sb7766 - November 7, 2012, 1:59 pm

Really cool post. Pretty HQ. Helps a lot. :)

hosc - December 9, 2012, 6:20 am

thanks awesome tut
35 chars
aasdasdasd

The Collector - December 9, 2012, 7:44 am

Love you tutorial mate! keep on going!

jgkilian777 - December 9, 2012, 9:08 am

thanks for the tutorial im going to use it :) would rep you but one little kid -repped me too :(

Anvhunter - December 9, 2012, 10:05 am

Good tutorial, thanks for posting .

MeaningOfLife - December 9, 2012, 10:11 am

Very nice tut, you took your time I see. I appreciate that you made this btw, ty.

Squeak - December 9, 2012, 12:07 pm

Nice guide I will be using this in the future.

Interpret - December 9, 2012, 12:45 pm

wow, that must have taken forever to type. thank you for the tips.

im Diz - December 9, 2012, 10:49 pm

this helped alot thank you very much for posting. :)

Sir Cyrano - December 10, 2012, 1:47 am

Nice looks good just get this finished asap i want to look at str5 :P

SuicideTheet - March 28, 2013, 8:27 pm

hey man i read this and enjoyed :)..

Bamarah - March 29, 2013, 12:26 am

This thread is 3 years old nonetheless it's still good so great job on the Killer script as I didn't open it but my AV checked it right away after saving it as a regular txt file.

hellgate7 - March 29, 2013, 12:55 am

Enjoyed reading your post ..really simple and helpful...thanks a lot!!

pow_pow_xd - March 30, 2013, 3:59 am

just came here to look at what ive missed over time, great guide to start spreading. and as u said at one point imagination goes a long way in the case of spreading. there are ENDLESS ways to spread.

Angryflash - March 30, 2013, 8:39 am

When I first started out, I thought youtube was a reputable source to find download hacking tools.
facepalm

Yes, skids are annoying, but that is the way a lot of people start out.

MoeOps007 - March 30, 2013, 10:02 pm

Really nice job on this, appreciate all your work :)

lhaxjava - April 7, 2013, 6:39 pm

I don't know if this is what I was looking for, or the maybe I was in the mood for reading. But I really enjoyed this article maybe is all those 12-14 year olds read more shit like this. They wouldn't be script kiddies..but hell we all were at one time. That's why my rep is still butt fucked.

sonny403 - May 9, 2013, 12:18 pm

Thanks, for the tips! going to give limewire a try :)

Cletus Kasady - May 9, 2013, 1:30 pm

Great HQ thread. I will definitely use some of these methods. Thanks a lot OP !

rejoin14 - May 9, 2013, 2:36 pm

Very usefull for new member! Thanks

Zero0150 - May 9, 2013, 3:50 pm

Nice - can you make a tut about Usenext Spreading?

DarkSlide - May 10, 2013, 2:40 am

Thank you for the share was a good tutorial anyway

reypupil18 - May 10, 2013, 6:54 am

Nice Tutorial, thank you for this explanation.

jak9875 - May 11, 2013, 12:26 pm

Really good spreading guide, well done.

--Alexander-- - May 11, 2013, 2:59 pm

thanks a lot nice and detailed info thanks for sharing

Jibbs_27 - May 11, 2013, 4:24 pm

Well explanation of the a skid. :) I lold

you112233 - May 11, 2013, 5:42 pm

Amazing tut, will try out some of these methods.

Frosty Thunder - May 11, 2013, 10:34 pm

Tried some of the methods, some work; other's dont. I recommend the Bind to video method

cickozg90 - May 12, 2013, 6:23 am

nice tut man, thanx for sharing this. will try it asap

vierus330 - May 13, 2013, 12:18 am

Very nice tutorial, thank you for the post.

-Bren - May 13, 2013, 3:25 am

Nice tut mate, keep up the good work

Markdavybullets - May 19, 2013, 2:07 pm

Nice one there man..But these ain't what people wihtout the programming knowledge needs. Anything simpler?

gemen - May 19, 2013, 4:17 pm

Nice tutorial, really interesting, thanks

BadBoy - May 19, 2013, 6:49 pm

I kinda like the youtube idea, but disabling the like/dislike would trigger doubt in peoples thoughts. its kinda hard, but great TuT :D

UnKoWn-Gam3r - May 20, 2013, 12:32 am

Great tutorial, very simple. I have success to config my hacktools with these informations!

keygate - May 20, 2013, 5:31 am

Good Tuts, how many Slaves can u get on this, also tell of other spreads technique

DEVIL X - June 5, 2013, 7:46 pm

good guide, some tricks out of these i tried, but doesn't work too well...!

Jambo01 - June 5, 2013, 11:06 pm

thanks for posting that, great tutorial

vortex_temp - June 6, 2013, 8:40 am

thanks for the tutorial man really appreciate it.

Di?mond - June 6, 2013, 10:24 am

Old tutorial but this will be very useful for people. Thank you for posting.

you10 - June 6, 2013, 1:42 pm

Awesome tutorial, this will help me a lot

Dark Skies - June 6, 2013, 2:54 pm

Great tut, gonna try all this l8er when i get my dc set up :/

?ouse - June 7, 2013, 12:30 pm

Nice tut! ill be sure to use some of your idea's. My personal favorite is also the YouTube video one :D

MiRP_Anon - June 8, 2013, 3:22 pm

Thanks a lot for this, it was well written and informative.

Undefined7 - June 9, 2013, 12:53 am

need a try . i know about phishing type also . but keylogger seems better here.

Paela - June 9, 2013, 1:18 am

awesome tutorial thanks for posting

pbhuvanesh1193 - June 9, 2013, 8:47 am

Nice Tut bro :-)!Hope you will post more such tutorials on HF :D

Thank you :D

mwddar - June 9, 2013, 8:50 am

awesome post, thanks a ton bro! :)

Black Blade - August 21, 2013, 3:46 pm

nice guide and knowlage on skids I just learned thanks :)

DevilGangsta - August 21, 2013, 4:24 pm

really nice tutorial dude, thanks helps a lot!

NeedSomeHelp - December 5, 2013, 4:17 am

Thank you for spending time on helping a forum skid such as myself :)

Surreem - December 5, 2013, 8:05 am

looks good, may give this a shot thanks for posting.

StuffIsKewl - December 5, 2013, 4:19 pm

Nice tutorial. HQ Tut. This looks super cool. Thanks!

dongrat - December 6, 2013, 6:24 am

This is great, will definitely try it out later.

MrSketch - December 6, 2013, 6:41 am

Nice! Thanks for posting. Gets you a fair amount of victims

WrathTheAbaddon - December 22, 2013, 6:20 am

thanks man, awesome tutorial, thanks for sharing

Stros - January 29, 2014, 1:22 pm

Great guide

Jai Ho - January 29, 2014, 1:30 pm

Nice looks good just get this finished asap i want to look at str5 :P

Dragonsbane247 - January 30, 2014, 7:14 pm

Thanks for the great guide, really helps a beginner :)

Proximity. - January 31, 2014, 2:35 pm

Thanks for sharing. I already knew most the methods but I'm sure it will help many people.

mathiash98 - January 31, 2014, 2:45 pm

Very good methods :D

I would definately use them

humblehacker1337haczor - February 16, 2014, 4:29 pm

Hey nice Spreading methods :D

to short of msg lol i hate that

manhast - February 17, 2014, 12:32 am

mmhhhhh looks interesting I'll try this later

aj753 - June 27, 2014, 9:17 am

nice thread, was a good read. nice tut

lelpoop - June 27, 2014, 10:32 pm

Dude, why'd you put your example youtube link ;-; all people will do is be like "this is a virus from HF DON'T CLICK IT" etc. Video already got removed from Youtube.

Xerox Bit - June 28, 2014, 5:40 pm

Nice tutorial, Gonna maybe try and get some Script Kiddies later never knew there where definitions for them... Ill vouch if this works :)

tunechi28 - June 28, 2014, 11:24 pm

Nice thread, man!!! This comes in handy...

ANT. - June 29, 2014, 4:49 am

cool tutorial man!... learned something slightly new with the hyperlinks

BalloonShop - July 12, 2014, 9:30 am

These methods are going to work wonders with a FUD keylogger, no need for the framework download. Thanks for some fresh ideas, insights and a well written post.

MyNickNameisencrypted - July 25, 2014, 5:59 pm

Great tutorial , thanks for posting and for your time !

Iterator - December 4, 2015, 6:22 am

Awesome tutorial, thanks for sharing

ballsdeeper - December 4, 2015, 10:16 pm

Nice thread! Very handy tutorial...

tomas14 - August 3, 2016, 4:33 am

thanx men nice tutorial !!!!

ZeroCoolAZ - August 3, 2016, 2:54 pm

Nifty little guide. A lot of humorous common knowledge, but still good for the total newbs!

?ch?m?ll?? - November 2, 2016, 1:13 am

This is quite awesome tho. Well written too. Now feeling a lil bad cus im not to good at scripting. Thanks to the environment im still currently growing up in.

mr.bn - November 2, 2016, 6:10 am

Could I get this? I would appreciate it very much :) Thanks

tuhinbc2 - November 2, 2016, 11:09 pm

awesome. thanks for this tutorial.

soft_boy - November 5, 2016, 1:14 pm

Nice TUT, Thanks will try it out now

private.member - February 13, 2017, 9:20 am

Awesome tutorial, thanks for posting.

downban3R - February 16, 2017, 7:55 am

Looks very solid! Thank you for the help!

weirdo1987 - February 17, 2017, 4:04 am

great guide thank you for posting this!

philwill80 - March 23, 2017, 6:24 am

Excellent tutorial! Many thanks!!!

Kristtik - March 28, 2017, 7:20 am

nice tut, tn timer bro! Work for me rly!

barcathebest201 - April 4, 2017, 6:27 am

Really great tutorial, learned a lot from this, thanks so much :))

TwistedGaming1 - April 5, 2017, 1:20 am

Thanks man for the post. I loved reading and kinda learning new ways of spreading a rat.

anwar212 - April 5, 2017, 2:42 pm

Thank you for the tutorial

TRiXX77 - November 11, 2024, 8:56 am

tutorial. HQ Tut. This looks super cool. Thanks

zphinxx - November 11, 2024, 12:03 pm

wowwowow this is nice

zmihaly90 - May 16, 2025, 9:20 am

Old but gold, thank you!
