Thread: [A way to spread a Rat/Keylogger.](#)

DongersMe - October 2, 2014, 6:36 pm

Are you guys wondering how to spread a Rat / Keylogger, but find it difficult?

I use this method all the time. It works 95% of the time.

1. Go to <http://messenger.yahoo.com> and sign up. Use a sexy name like, "ImSexy" or whatever you want it to be. (Note: Make it a feminine.)

2. Then after that go to <http://messenger.yahoo.com/download/> and download yahoo messenger.

3. Install it and sign in. Go to the romance chat and you will get a lot PM asking you to chat. But before that crypt your Rat / Kelogger and change it so it looks like picture. Just do it like this:

server.exe change to myhotpic.jpg and it will look like picture.

<https://groups.yahoo.com/neo/dir/1600086917> <-- for the chat room.

How do you find the romance section? I'm to lazy to spend a ton of time searching Dx
