Shike - October 3, 2014, 12:46 am

Everyone talks about the bending problem, wouldn't the simple solution be putting a sturdy case on it?

samschneider1 - October 3, 2014, 12:50 am

I actually got two, one for my wife and one for myself.

Mefie - October 3, 2014, 5:50 am

Every device bends if you try to bend it with sufficient force. Just mind it and don't forget to return a feedback for us!

Android users are so mad. Soon they will be using laptops to make phone calls and they'll be like "yh but specs".

6????? - October 3, 2014, 5:53 am

Who cares about it "bending," you need to actually apply pressure for it to bend lol. A case will solve this problem.

Tyler? - October 3, 2014, 5:53 am

I don't have it. No need for a phone that bends in my pocket. Plus, they added things Android has had already, so it's nothing new to me.
