Thread: [Kovexel - A friendly general discussion board.](#)

KLAF - *October 3, 2014, 2:32 am*

We are the latest general discussion board being run mybb. We currently only have a few posts, one admin (me) and a support member. The theme has been personalized to our liking, with a custom post-bit and custom plugins. We have all of what a normal general discussion board has and more. For example, we will have an education sub-forum where people will be able to talk about their studies, grades, how-to-write-this-essay type of thing and more sectors to be introduced. We actually listen to the constructive criticism that we receive. For example if we need a better logo, spoiler added, different smilies we will actually update them. We promise to respect the community and keep you all safe at Kovexel.

What awaits Kovexel in the future?

As I said previously, we will introduce:

An educational sub forum

Upgrades

Awards

Usergroups

Custom userbars/stars

Theme color changer

MyBB GoMobile

Like System

Alert System

Marketplace

Premium Sectors

Premium Lounges

New Smilies

Unique Postbit

.com domain

And so much more! So what are you waiting for? Register today at: <http://kovexel.netai.net>.

Realy? A subdomain? You won't get any traffic if you piggy back off another website.

Yeah I'm going to purchase a .com domain soon.
