I know it's not really a signature or anything because I just wanted it to look as clean & HD as possible and still maintain it's quality if I need to resize it.

Here's a link to my album: <https://imgur.com/a/KhpSm> Feel free to comment and rate both images and which you preferred the most and why!

I would definitely say the first one, but it can easily be the second one if you widen the spotlight. Good job!

I prefer the first one, reason is that it's the perfect brightness for the text to be visible.

Both are stunning though.

I think they both look great, but yeah for me its gotta be the first one. Still, great editing skills man.

1st one, maybe consider trying to darken down one side of his face so it's as if he's got 2 parts of himself (obviously he has as Bruce Wayne by day then batman by night).
