Be wary when dealing with this member, has taken my money and been 24 hours, 0 installs.

He did a service for me earlier on in the week and never ran?

Try contacting him and ask what is going on.

I messaged him on Skype 2 hours before his last online time. He is shown offline for me now.

The service was requested 23 hours 14 minutes ago.

There's nothing wrong with my exe either. I tried the crypted one on a virtual machine and it worked fine.

Guys I sent your installs and did your rat spreading. I did everything I could on my part. Your rat or whatever you're using had to be very unstable

You have a lot of fake vouches and unhappy customers.

You'd probably want to give out a vouch copy to someone, or else people will speculate your just receiving money and delivering a promise that will never be reached.

I bought this service from this user and I have yet to receive them and he is not opening my PM's when he's online. He said he would settle it today from yesterday, and it's already almost tomorrow. I wish to hear from you very soon.

edit: pretty much this actually.

inkbird - October 16, 2014, 12:38 am

Im interested in this service. You can pm me when you're online or contact me on Skype. I've added you

Peppermint Butler - October 16, 2014, 12:41 am

I highly suggest not dealing with this user until there is legitimacy to his spreading and he REAL vouches happen to post.

@NadeFame - October 16, 2014, 9:17 am

Bro. Before you bash me like that please read the ToS. Thanks.

Mi2414 - October 16, 2014, 10:45 am

Interested in service, will be contacting you soon :)

grosseteub - October 16, 2014, 11:05 am

spreading like this is too many works and will never spread 24 hours without any pause or something , and i don't think if some members receive no installs it is because their rat is unstable ^^ (an unstable rat receive connections but lost them , in their case they did receive nothing :/)

will wait for more feedback to try your service , btw , good luck with this service

4/20 - October 16, 2014, 12:48 pm

Please reply to my private messages, I'm getting really irritated man.

If you wanna jew me out of \$8, I'm gonna have to laugh at you.

@NadeFame - October 16, 2014, 9:52 pm

Service is still up and running! Just got a new way to spread also!

Cecilia - October 16, 2014, 9:56 pm

It seems like there are a large number of unhappy customers and some regular members with vouches.

It all seems a bit shady to me. Perhaps someone else would like to give feedback.

He's denying giving out REAL vouch copies and he's settled in on getting fake vouches from his friends, whilst there hasn't been anyone that purchased his service to receive any slaves.

VERY SHADY

4/20 - October 17, 2014, 7:43 am

I have yet to receive a response from this user. I have regarded another PM towards you, OP, so hopefully you can please respond.

Just dropped a scam report on this kid. Lol, \$8.

Don't buy any services from this user, expect to be scammed with several others.

I know you're not talking to me, because I know your lazy ass never uploaded my server as a torrent like you said you did. Never once have you said you sent my installs. Don't bullshit the forums bitch boy.

Rask0 - October 17, 2014, 8:37 pm

Lmao keep on trying to contact him through skype. Still haven't received a response and stated that he would crypt my server fud and upload it, still haven't done either.

-Ebola- - October 17, 2014, 8:40 pm

Seems really fishy lol....and service idea is terrible to spread someone's RAT for them. Dont know why you wouldn't just buy installs its a lot more convenient and straightforward than this

Ninetales. - *October 17, 2014, 8:41 pm*

Member scammed me as well, DO NOT trust his services.
