A good designer would know that you should never rush designs :)

I see what you mean.

It wasn't exactly rushed.

What I meant was, I haven't added prices etc. to it yet, there's more to come; so I published already, and now I'm working on the other sections.

I would never "rush" a design the way you think about it.

EDIT: I haven't added prices yet, because I want to closely inspect other designers prices; since I want to be one of the cheaper.

Being the cheapest doesn't mean being the worst.
