Thread: [\[Preview\] New Theme](#)

?eumonic - October 10, 2014, 2:43 pm

So, I haven't done a theme thread in a while and I figured people would want a preview of the new theme I plan on releasing later today. I started it about 4 hours ago and this is the progress I have so far. I plan on adding a ComboBox, NumericUpDown, ProgressBar, TrackBar, ContextMenuStrip, MenuStrip, StatusStrip, TabControl (Vertical and Horizontal), and maybe a ListBox and ListView.

So far, this is all I have, (I am working on the vertical TabControl now), but it will be coming along all day.

Hopefully you like the horizontal tab control then. I'll post a picture in a few minutes. Development was temporarily halted today due to some serious personal issues that arose, but I just got back to it, so it should be coming along shortly.

Naywyn - October 11, 2014, 1:54 am

You did a great job there, in my opinion you should reduce the rounded borders.

SaketSaket - October 11, 2014, 2:35 am

Looks pretty cool! I was working on this theme as well some time ago but never had time to complete it. Isn't it based on a japanese antivirus UI?

Yes it is, actually. But like anything I do, it's never exact. I only use them as inspiration. I like putting my own twist on the work.
