I am sorry to say, But I am discontinuing this thread until further notice. I will be releasing a free crypter in the near future, (Possibly 6-12 months) but I have some important buisness to attend to.

I DID NOT CODE THIS, I merely edited the source so it is FUD, less buggy, and works better and more accurately.

That's insane dude. Really awesome move to give this away for free, knowing that you'd make quite some cash selling it.

Cool! ?

Cool! ?

Yeah, I have thought about saving a few hundred dollars so I can have someone make me a custom one, and really good. But then I just downloaded a source and I messed around with it.

Just updated thread with a fresh virus scan. Enjoy!

Always are people who upload to virustotal or distributing website... I guess that they really don't know what they're doing. Hope the coder will update the crypter and upload again.

PD: Should send the crypter via MP to ensure that the user is not going to scan it at VT...

**4h35i13n46u7** - November 6, 2014, 7:35 am

Came here to see if Rick's picture is in the program, too bad it isn't it would be pretty cool.

Still I'll try it when I catch some time, thanks for this freebie.

**AceVoid** - November 14, 2014, 2:57 pm

OP, nice thing you are doing and looking nice and HQ. But why are you making life hard for yourself?

Instead of giving a direct link to the crypter why not add noob protection? I mean people with 2 posts are downloading and using this... Probably not even FUD for 2 hours.

**Kylord** - November 14, 2014, 9:04 pm

Are you fucking autistic? jRat is 0/60 FUD all the time, to make it detectable you have to be the most Cringetastic downsy there is.

**Mr.Untouchable** - November 23, 2014, 10:07 am

Well someone recently recommended it? ive never tested it was giving it some thought so i wasnt aware of that ? because the guy who mentioned it said ill need a java crypter or something of the

Thanks for the crypter mate, but my av is not letting me download it , it deletes the files and says malicious malware gen.

i turned it off and as soon as i click the exe again it auto deletes the file.

Crypting and Ratting is much harder if you have an AV enabled. You should disable it and your firewall.

**iCryptex** - November 26, 2014, 12:26 pm

Thanks OP for this Crypter. And thanks again for taking the time to re-FUD this tool that you have given to the community for free. +1 for you RickAstley :).

how to run it now, my av avast. You should also disable Windows Defender. All of these Security programs conflict with your RAT program or any other 'Malware' tool (if you're going to be using it for illegal purposes) that'd you be using. Your AV would remove your files because of false positives so it'd be best to just disable them, and enable them later when you're not using your RAT programs (or whatever else you'd be using).

If you are being legit, (I don't think you are, because my AV let's it run, and I made it, no virus, other people use it, no infection), don't use avast. Use a cracked norton

You must be a complete utter retard if you think Norton is 'way better' than Avast. I recommend you do some research on Norton and you may end up changing your mind, but I doubt you'll do that, you're too thick-headed to take any suggestions and that's why you look like a total retard for suggesting people to even think about Norton.

?????

Are you kid kidding me? Is this a joke? Is this a legitimate joke?

First off, you probably hate norton because you can't afford it

Second, avast has loads of false positives, way more than necceary

Not only that, but avast comes with all kinds of adware and PUS.

Keep in mind, YOUR the one looking for a free crypter because YOU can't make your own, or because YOU are too poor to afford a crypter or a decent AV.

So don't fucking sit here and tell me that I am a retard you cringey autistic illiterate FUCK

I think I need to start using this

I am working hard to make sure it does

**iCryptex** - November 26, 2014, 3:36 pm

You don't even need an anti-virus. Just use an anti-malware program like Malwarebytes. It's the best thing ever.

I don't need your crypter, it's most likely copy-pasted or binded to your rat anyways. ?

You actually got that backwards, Norton is the one which comes with adware, not Avast. Norton is the one with the crazy amount of false positives, not Avast. I suggest you do some extensive research, you might learn something, but again, you are an autistic, so you'll never fully be able to learn. ?

Edit: Why so defensive? Is it because you know you're wrong? Yep that's the only reason why people get defensive. Keep arguing with me mate, only makes you look dumber. :D

Yes, I do need to do extensive research, on how to talk to people with mental retardation... Because you are obviously too edgy to get through your fucking head that YOU HAVE DOWN SYNDROME, and you have no clue what your talking about.

So I'm done with you, I am finished with this faggotry.

Now you resort to name-calling instead of refuting my facts, that's very childish of you Rick. It seems as though I win this time, and I'm sure it won't be the last.

Enjoy being a dumbass. ?
