I am maybe looking to buy this. But I do not have that much money so I am hoping this would be a worthwhile investment for me as it seems better than any other methods. I never made money online and have no experience, and I am not a pro gamer so I probably will not be able to do boosting. I also have school and need a lot of time to focus on school also, will this method still work for me? Also if it doesn't will I be able to get a refund, although I know it says I am allowed as long as evidence is provided. (Will it be refundable if say I make \$10 and not \$25 to exceed the buying price)

Thanks

Wheezy Gang - October 13, 2014, 2:01 pm

1) Does this involve any of the following: Tournaments, Wager Matches, GB, UMG, or any other forum of eSports ,Twitch, livestreaming, YT, Video making

2) What consoles will this work on?

The method doesn't contain boosting, and you will be perfect of to do it with little time aswell. The refund will only be provided if you show me evidence that you actually tried to use the method, and you failed.

Yes, it will. You don't need a high end PC to use this method, nor do you need some super internet speeds.

Susta1nz - October 14, 2014, 8:47 am

Another thing, how long do you think it will take to make that \$25 back, will it take something like a month or so? I don't want to buy it and not be able to refund if I'm making money, just at a super slow speed. I just wanna make sure because this looks really worthwhile buying and wanna make sure. Also how much will I have to invest in it to make that money back and how long will it take?

You should be able to make this back in a day, the profit will increase as you keep getting to be familiar with the method and the more you invest. However, with no investment at all you should be able to make \$25 daily.

For the past 3-4 months I've made a little over \$3k in BTC, I also got a M9 Bayonet Night MW (Fn looks) which I bought for 180k, so roughly \$340 there too. PayPal wise, I'd say abouts \$1-2k. Im very familiar with this method now though, so I know how to use it the most efficiently.
