Thread: [\[Official\] Omnicoin MyBB plugin development](#)

SIM-2015410 - October 12, 2014, 1:20 am

Hello everyone,

This is just a small update from the Omnicoin team. You may not have heard or seen any activity from us but we want you to know we are working hard behind the scenes with a few projects and ideas, and will never give up on the coin.

We are currently developing a plugin for MyBB forums which will allow an Omnicoin address to be added to your profile. Our aim is to eventually have full integration with the forum, with displayed balances and tipping, but this is the first step.

Omniscient has said that this plugin will be added to HF if it is up to his standards. This first step to more integration will be a huge booster for the coin.

There is also another project currently being worked on which was brought to us by another member, which we will not reveal until more progress is made.

Here is the Github repository for the plugin we are developing:

<https://github.com/OmnicoiN-Project/MyBB-Plugin>

If you have experience with MyBB plugin development, or think you can help, please contact us!

The plugin is being tested on <http://omnicoinforum.host22.com/index.php>

Feel free to have a look at it. I think that captchas are not working on the site, so just PM me and I will make you an account if you want to join and have a look at the plugin.

Thanks, Mesh and the Omnicoin team.

Programming - October 12, 2014, 1:21 am

If you work with Omnicoin and are part of the OMC team, why don't you have the OMC award?

SIM-2015410 - October 12, 2014, 1:24 am

(Oct 12, 2014 01:21 AM)Programming Wrote: [\[CITE\]](#) If you work with Omnicoin and are part of the OMC team, why don't you have the OMC award?

I was about to buy it when the price went up to 50k.

But not having the award does not mean I cannot be part of the team.

Do you guys have an ETA for the plugin?

Doctah - October 12, 2014, 1:28 am

(Oct 12, 2014 01:26 AM)Rvaveo Wrote: [\[CITE\]](#) Do you guys have an ETA for the plugin?

There's no point in asking for an ETA because you never know what's going to happen.

SIM-2015410 - October 12, 2014, 1:29 am

(Oct 12, 2014 01:26 AM)Rvaveo Wrote: [\[CITE\]](#) Do you guys have an ETA for the plugin?

Perhaps a week, but I am not sure, because none of the team have actually made a MyBB plugin before, so this is a new experience for us. As stated above, we never know what unforeseen issues may arise during development which could hinder progress.

After development, the plugin then needs to be tested for bugs and security, before it could be added to HF.

Rvaveo - October 12, 2014, 1:57 am

(Oct 12, 2014 01:28 AM)[M]aven Wrote: [\[CITE\]](#) There's no point in asking for an ETA because you never know what's going to happen.

Well that uncertainty is present in the Crypto market but not in the development of a plugin.

(Oct 12, 2014 01:29 AM)?eshCollider Wrote: [\[CITE\]](#) Perhaps a week, but I am not sure, because none of the team have actually made a MyBB plugin before, so this is a new experience for us. I am sure mybb has a ton of documentation to help you with any extra ordinary circumstances.

Aceman - October 12, 2014, 8:34 am

(Oct 12, 2014 01:57 AM)Rvaveo Wrote: [\[CITE\]](#) Well that uncertainty is present in the Crypto market but not in the development of a plugin. There are things that go along with the plugin that are crypto related obviously. In order for the balances to be accurate there must be a blockchain which is constantly referenced as well as error checking to make sure that the displayed balance propagates properly if you were to tip somebody else. There are many things which will need to be tested and worked out before Omni pushes this out to a live version. All we can do is be patient and wait.

SIM-2090815 - October 12, 2014, 1:14 pm

Thanks for keeping is updated Mesh, I had been waiting for an update.

Perfectionist - October 12, 2014, 1:16 pm

This sounds awesome, I hope this is going to boost the OMC market :P

Legion. - October 12, 2014, 2:34 pm

Could you please PM me on a list of things that you guys are working on? I would like to work on something too, but I don't know if it's going to be done and I'm just curious! Thanks!

Doctor Blue - October 12, 2014, 3:52 pm

(Oct 12, 2014 01:21 AM)Programming Wrote: [\[CITE\]](#) If you work with Omnicoin and are part of the OMC team, why don't you have the OMC award?

MeshCollider is part of the team.

(Oct 12, 2014 01:57 AM)Rvaveo Wrote: [\[CITE\]](#) I am sure mybb has a ton of documentation to help you with any extra ordinary circumstances.

MyBB has terrible documentation, most of the variables you need in plugins (Like user data and the db handle) are almost completely undocumented.

Storm- - October 12, 2014, 3:53 pm

I've sent MeshCollider a PM regarding the plugin. Happy to help in whatever way necessary.

SIM-2015410 - October 12, 2014, 8:36 pm

(Oct 12, 2014 03:53 PM)Storm- Wrote: [\[CITE\]](#) I've sent MeshCollider a PM regarding the plugin.

Happy to help in whatever way necessary.

We would greatly appreciate your experience with MyBB plugins. I will add you on skype, thank you very much for your offer ?

brian188246 - October 12, 2014, 8:39 pm

I think that this plugin is a great idea, I will definitely always keep OMC on me so I can easily tip people and send money to friends easily.

SIM-2015410 - October 17, 2014, 3:55 pm

Updated the OP with a link to the Github repo for the plugin (<https://github.com/Omnicoins-Project/MyBB-Plugin>). Anyone with MyBB plugin experience, please contact me, any help would be greatly appreciated.

Doctor Blue - October 17, 2014, 6:08 pm

I don't think Omniscient is going to install a plugin that calls `file_get_contents` on a host completely out of his control. I believe you can do it all with a locally running omnicoind though, or alternatively have Omniscient host his own copy of the API.

.Matt - October 17, 2014, 6:16 pm

(Oct 17, 2014 06:08 PM)Doctor Blue Wrote: [\[CITE\]](#) I don't think Omniscient is going to install a plugin that calls `file_get_contents` on a host completely out of his control. I believe you can do it all with a locally running omnicoind though, or alternatively have Omniscient host his own copy of the API.

I was going to say this also. `FileGetContents` isn't the most secure or even reliable function to use. Maybe try converting that to `Curl` (easy change) and find a completely secure way of running it.

SIM-2015410 - October 17, 2014, 7:04 pm

(Oct 17, 2014 06:08 PM)Doctor Blue Wrote: [\[CITE\]](#) I don't think Omniscient is going to install a plugin that calls `file_get_contents` on a host completely out of his control. I believe you can do it all with a locally running omnicoind though, or alternatively have Omniscient host his own copy of the API.

I actually already asked omni whether he would like to run a daemon or use an API, and he told us to use an API.

If we want to make this plugin available for all MyBB forums eventually, then it needs to be easy to install and setup, and usable on all forums. So that API is the best solution. Using `omnichain` API does not pose a security risk to HF. We will sort out solutions to issues like that later when the plugin is working.

Anyway, .Matt has modified the plugin so it no longer uses `file_get_contents`, as he suggested above.

Crypto™ - October 18, 2014, 4:49 am

(Oct 17, 2014 06:16 PM).Matt Wrote: [\[CITE\]](#) I was going to say this also. `FileGetContents` isn't the most secure or even reliable function to use. Maybe try converting that to `Curl` (easy change) and find a completely secure way of running it.

Not to mention `cURL` vs `file_get_contents()` can sometimes be a timing difference that's measured in full seconds. `file_get_contents` is mainly a utility function, that doesn't allow a whole lot of extensibility.

Magicmann - October 18, 2014, 10:58 am

You all should definitely look into Bitcore. It's a bitcoin core developed by Bitpay that would be perfect for this usage.

<http://bitcore.io>

It looks like it could be used to create a wallet à la Blockchain.info, but that's a huge project.

Magicmann - October 19, 2014, 4:11 pm

(Oct 19, 2014 02:50 PM)Crypto™ Wrote: [\[CITE\]](#) It looks like it could be used to create a wallet à la Blockchain.info, but that's a huge project.

Well, while most great and successful projects are (coughNOMPcough) it claims to be in trial stages and not ready for production use; however, as we know from many great projects, that can mean very little.

Also. Bae. Y u no Skype? ?

Mikavw - October 20, 2014, 8:13 am

Cool idea, I can't wait to see this actually working!

Good luck, with the plugin!

adampelletgun - October 20, 2014, 9:41 am

Sounds good.

Can't wait to see this added.

Cyber Saint - October 20, 2014, 12:42 pm

Thanks for the fantastic update, looking forward to the integration of this MyBB plugin if it is up to par with Omniscient's standards.

SIM-2015410 - November 2, 2014, 1:14 pm

An update on progress.

Have a look at our test forum here: <http://omnicoinforum.host22.com/index.php> to see the progress we are making, and the current state of the plugin. Currently, the viewing of addresses in the profile and the address history is working well. We are now working on the actual function to add addresses to your profile.

PM me for an account because the captchas are broken.

If you find a bug in the plugin, please contact us.

(Nov 3, 2014 06:53 PM)xadamxk Wrote: [\[CITE\]](#) A bit irrelevant to the OP, but if someone sent me 1k OMC, about how long does it take to receive them?

They should appear in your wallet almost instantly, but you will have to wait for a few confirmations after that to make sure it is a legitimate transaction, before you can spend them.

Crypto™ - November 4, 2014, 2:24 am

(Nov 3, 2014 06:53 PM)xadamxk Wrote: [\[CITE\]](#) A bit irrelevant to the OP, but if someone sent me 1k OMC, about how long does it take to receive them?

As Mesh said, it should be nearly instant, showing up first in the unconfirmed balance, then automatically confirming with a little bit of time. If someone claimed to have sent them, but they haven't shown up in your wallet, ask them for the transaction ID, and look it up on Omnicha.in, which is a well connected node, so it should have transactions earlier if they haven't fully propagated through the network.

SIM-2015410 - November 6, 2014, 1:03 pm

The MyBB plugin for Omnicoin is now on beta release 1.0! The plugin is tested and seems to be working well.

Primary Functionality:

- Displays addresses on profiles and usercp
- Displays full history of addresses
- Ability to add an address to the profile via User CP "Edit Profile" page (after verification of address).
- Shows balance of current address on profile
- Shows balance of current address on user posts. (only if an address is added)

Full source can be found in the Github Repository:

<https://github.com/Omnicoi-Project/MyBB-Plugin>

Documentation, including screenshots and a usage tutorial, can be found here:

<https://github.com/Omnicoi-Project/MyBB-Plugin/wiki>

As you know, we will further development on this plugin to include a "search by address" function, and eventually a tipping system, so watch this space!

The team will be in contact with Omniscient about the addition of this plugin to HackForums.

Feel free to have a look at the forum/plugin, give us feedback, point out issues, and contribute to the repo on github. Any help is greatly appreciated!

Thanks, Mesh and the Omnicoin team. ?

SIM-2015410 - November 6, 2014, 1:44 pm

(Nov 6, 2014 02:14 PM)xadamxk Wrote: [\[CITE\]](#) Is the feature to show the balance of current address on posts toggle-able?

Surely not everyone wants what they have to be publicly known?

It displays the balance of their current address, which is available to everyone anyway.

For example, if you know my address (which is in my signature) you can look up the balance:

<https://omnicha.in/?search=oMesh62joeab2yMoJUH28mGE8h2suDzcYc>

You can easily just add an empty address to your profile if you don't want your stash to be revealed.

LiveSupport - November 6, 2014, 1:46 pm

NiktoKan - November 17, 2014, 8:02 am

I try to open following URL but is blank
omnicoinforum.host22.com/misc.php?action=omcsearch

Anyone same with me or just me? I am using Firefox

Uncle Drew - November 17, 2014, 8:04 am

Sounds interesting. What is omnicoin's value nowadays?

SIM-2015410 - November 19, 2014, 12:29 am

We have made some changes, based on feedback from Omni. The plugin is looking really good so far. Only a couple more minor changes and it should be ready for HF.

Abe Washington - November 19, 2014, 9:25 am

Can you make me an account? I'll be willing to help if I can.

This seems like a really cool idea. The tipping feature is something I really like.

Moen - November 19, 2014, 9:45 am

I would like a option to remove the adress from the user, Also that link
"omnicoinforum.host22.com/misc.php?action=omcsearch" i cannot find out how to get it to work.

Abraham Lincoln - November 19, 2014, 9:48 am

I believe the site is running a far outdated version of the plugin, thus causing issues.

SIM-2015410 - November 19, 2014, 1:53 pm

(Nov 19, 2014 10:48 AM)Abraham Lincoln Wrote: [\[CITE\]](#) I believe the site is running a far outdated version of the plugin, thus causing issues.

No I updated it yesterday. It has got the plug in with the coins.php page.

I gave a test login a few pages back. Use that that if you want to log in.

We moved the search and history pages to coins.php?action=search

(Nov 19, 2014 10:45 AM)Moen Wrote: [\[CITE\]](#) I would like a option to remove the adress from the user, Also that link "omnicoinforum.host22.com/misc.php?action=omcsearch" i cannot find out how to get it to work.

You can not remove addresses, the point is to help fight scammers. If someone uses an omni coin address to scam, it is linked to their HF account.

SIM-2015410 - November 20, 2014, 5:35 pm

The plugin is now completed. Omni has taken over development to customize it for HF exactly as he wants it, so don't expect to see it released for a little while, but the plug in itself is now going to be officially released to the MyBB community.

Edit: What about profile integration?

The idea was suggested multiple times, not just by you ?.

The entire plugin is designed for profile integration. What are you asking? Addresses are added to the profile, and balances are displayed on profile and posts just like in your thread. There is no "give" ability though, because that would either require a wallet embedded in HF or more integration with the online omnicha.in wallet.

Moen - January 30, 2015, 2:58 pm

How is this project going? kind of interested, and a while since i have heard from it.

That is not a question for us. It'll be whenever Omniscient gets it working and coded the way he wants it. If you want the code however, it's already available on Github.

<https://github.com/Omnicoins-Project/MyBB-Plugin>

Nutar - January 31, 2015, 9:12 am

It's nice to see that this idea put into work, and is being considered by Omniscient. I believe that this is the first step to innovate. Also, I'm really interested in contributing in the development of the plugin.

Are you going to accept pull requests to contribute?

EDIT:

I just realized that development of this plugin is already done.

ObscureCoder - January 31, 2015, 10:09 am

I'm not trying to be judgemental but wouldn't it of been smarter to write an OmnichainAPI wrapper in PHP then incorporate it into the plugin? Would be more work but a lot easier to shift development to other web-based projects.

By wrapper I mean like (meh, static methods erryday):

PHP Code

```
<?php
```

```
// internal wrapper class
```

```
$args = array('address' => 'someaddress');
```

```
$resp = Omnichain::request(OMG::GET_BALANCE, $args);
```

```
echo $resp['balance'];
```

```
// external wrapper class
```

```
echo Omnichain::getBalance('someaddress');
```

```
echo Omnichain::getInfo()['version'];
```

Jus sayin' y0.

Doctor Blue - January 31, 2015, 11:26 am

```

```
$resp = Omnichain::request(OMG::GET_BALANCE, $args);
```

```
echo $resp['balance'];
```

```
// external wrapper class
```

```
echo Omnichain::getBalance('someaddress');
```

```
echo Omnichain::getInfo()['version'];
```

Jus sayin' y0.

Way ahead of ya:

Well some of it is already doable by using the EasyBitcoin class. It connects to omnicoind and you can make RPC (remote procedure calls) directly from PHP.

<https://github.com/aceat64/EasyBitcoin-PHP>

Some other parts (Such as getting the balance of others' address you can accomplish using my ABE class. This, however, requires you to have a running ABE instance. It's not amazing, but it works okay. I already have some simpler queries I can stuff into it, just haven't gotten to it yet.

(Jan 31, 2015 10:12 AM)Calypo Wrote: [\[CITE\]](#) It's nice to see that this idea put into work, and is being considered by Omniscient. I believe that this is the first step to innovate. Also, I'm really interested in contributing in the development of the plugin.

Are you going to accept pull requests to contribute?

EDIT:

I just realized that development of this plugin is already done.

Yes, we accept pull requests to most of our projects. I personally wouldn't like substantial pulls on my Rackle repository, but go ahead with everything else (Omnicoind, Omnicha.in, omnicoindj, omnicoind-seeder etc.).

Very nice.

I started one in Java a while back: <https://gist.github.com/ObscureCode/abe981d0c46a8f8c45cd> but quickly gave up on it when I realized that I don't use virtual currencies.

lol. I like watching the OMC progress though - fun stuff.
